This file constitutes a part of the official records of the National Park Service and should not be separated or papers withdrawn without express authority of the official in charge.

All Files should be returned promptly to the File Room.

Officials and employees will be held responsible for failure to observe these rules, which are necessary to protect the integrity of the official records.

NEWTON B. DRURY,
Director.

Summary of the August, 1947, Monthly Narrative Report for

YELLOWSTONE NATIONAL PARK

Page

<u>SPECIAL ACTIVITIES:</u>	Sup't to Jackson Hole; Western Lakes to pick up Doc's Rug; to Billings with Doc's and to Grand Teton. Johnston to Billings to attend House Public Lands meeting. Leading newspapers outdoor editors in. Balms presented an award by Doc's Rug.	1
	Population census taken. "Diamond Jubilee Trail Riders" follow Howard Eaton trail on ten-day horseback trip. Region Two Office moved to new location. Stereo-Typist exam held by Local Civil Service Board.	2
<u>INSPECTIONS:</u>	Binby, FSA, Cheyenne. Cowan, Matteson and Williams, FSA, Denver Jr. Bauer, Ecologist, Chicago; Doc's Rug; Probst, Economist, Washington, all EPS, in. Cowan, ID; Lindner and Miller, Chicago; and Associate Director Demaray and wife in. Bagley, Sup't, Boulder Dam; Luce, Sup't, Custer DAM; Flint, Chief of Development, Chicago; Hamilton, FBI, Denver; Jenkins, Concessions Advisory Group, in. White, Forest Service, Washington, and Hanson, Tobbe, Van Meter and Urquhart in.	2
<u>PLANS, MAPS AND SURVEYS</u>	McLaughlin, Inc., awarded contract for Section C of Moran-Yellowstone Approach road.	2
<u>GENERAL PUBLICITY</u>	Two press releases issued during month. First supply of 1947 broadsides received. Henson terminated as publicity director.	3
<u>COMPLAINTS</u>	Twenty-two written complaints received during month of August.	5

History of the United States, 1776-1876

Volume 1: 1776-1800

1

The first of the great events of American history was the Declaration of Independence in 1776. This was a bold step, for the colonies were breaking away from the British Empire. The Declaration was signed by a group of men, including John Adams, Thomas Jefferson, and Benjamin Franklin. It was a statement of the colonies' rights and a declaration of their independence from Britain.

DECLARATION OF INDEPENDENCE

The second of the great events of American history was the signing of the Constitution in 1787. This was a bold step, for the colonies were creating a new government for themselves. The Constitution was signed by a group of men, including James Madison, Alexander Hamilton, and John Jay. It was a statement of the colonies' rights and a declaration of their independence from Britain.

2

The third of the great events of American history was the signing of the Declaration of Sentiments in 1848. This was a bold step, for the women were demanding equal rights with men. The Declaration was signed by a group of women, including Elizabeth Cady Stanton, Seneca Falls Convention. It was a statement of the women's rights and a declaration of their independence from men.

DECLARATION OF SENTIMENTS

The fourth of the great events of American history was the signing of the Emancipation Proclamation in 1863. This was a bold step, for the President was declaring that all slaves were free. The Emancipation Proclamation was signed by Abraham Lincoln. It was a statement of the President's rights and a declaration of his independence from Congress.

EMANCIPATION PROCLAMATION

The fifth of the great events of American history was the signing of the Reconstruction Act in 1867. This was a bold step, for the Congress was demanding that the Southern states be readmitted to the Union. The Reconstruction Act was signed by Congress. It was a statement of the Congress's rights and a declaration of its independence from the President.

RECONSTRUCTION ACT

The sixth of the great events of American history was the signing of the Civil Rights Act in 1868. This was a bold step, for the Congress was demanding that all citizens be treated equally. The Civil Rights Act was signed by Congress. It was a statement of the Congress's rights and a declaration of its independence from the President.

CIVIL RIGHTS ACT

MAINTENANCE:

Record-breaking traffic caused serious damage to road surfaces. Heavy patching required on two sections of road.

3

Reprocessing on East Entrance road and Gallatin road. Red Lodge-Cooke road repairs being made.

CONCESSIONS:

Mammoth Swimming Pool closed due to police orders.

INTERPRETIVE SERVICE:

Portable public address system useful for geyser talks at Old Faithful, Riverside and Daisy.

MUSEUM ACTIVITIES:

Indian beadwork specimen received and turned over to Custer NM. Indian scraper found on Mt. Washburn.

RESEARCH:

Moose research continued. Malloy, U of Chicago and Stanley, U of Michigan, conducted research work. Geyser eruptions in Geyser basins continue to be of great interest and provide unusual thermal shows.

TRAVEL:

90,399 vehicles in with 307,556 visitors during August.

VISITORS:

Senators Hill, Brewster and Taylor; Congressmen Kirwan, Allen, Fletcher, LePoyre, Crawford, Purdie, Sanborn, Russell and Phillips in during month.

Hookefeller and family in. McElwray, Editor, Washington Evening Star; Beschler, Parliamentarian, RR, Washington; Grig. Gen. Young; Prof. Samis, Yale; Tryde, Denmark correspondent; and Armstrong, Washington correspondent, St. Louis Globe Democrat, in. Governor Maw, Utah, in. Dale Carnegie, Dr. Adolfo Hoffman of Argentina, Dr. Massard, Noel Stuart, Military Attache, Union of South Africa in.

WILDLIFE:

Plans made to live-trap antelope this winter. Bears very numerous, causing traffic jams. 32 visitors reported injured by bears, with 6 property damages reported. Grizzly sent to Highland Park Zoo, Pittsburgh.

Minimum elk reduction set at 300. Absaroka Conservation Committee fall meeting date set. Trumpeter swan census conducted.

ACCIDENTS:

64 motor vehicle accidents reported. Kline, Alcona, Penna., Baldwin, Lawton, Okla., Bonkhan, Moose, Wyoming, Gotwala, Los Angeles, drowned. Avery, Powell, Shaw, Cody, and Mettler, age 12, drowned in Yellowstone Lake.

THE UNIVERSITY OF CHICAGO

August 9, 1947

MEMORANDUM for the Director.

Following is the report of activities for Yellowstone National Park during the month of August, 1947.

Weather Conditions. Below normal temperatures and above normal precipitation was recorded at Mammoth during the month of August. Total precipitation for the month was 2.11 inches as compared with 2.21 inches in August 1946, 0.61 inches in 1945 and 0.68 inches in 1944. The maximum temperature of 82 degrees was recorded on the 7th and a minimum of 31 on the 24th. Most days were clear, 19 partly cloudy and 5 cloudy. The prevailing wind direction was from the Northwest. Several dry thunderstorms occurred during the last two weeks of the month.

Special Activities. Superintendent Rogers went to Jackson, Wyo. on August 3 to confer with Superintendent Scripps of Grand Teton National Park. On August 7, Mr. Rogers and Assistant to the Superintendent, Mr. [Name], went to Nelson Lake to pick up Secretary Wrag and his family and bring them into the Park via the West Gate. Superintendent Rogers and Mr. [Name] accompanied Secretary Wrag to Billings on August 11 and then returned the following morning. On August 21, Superintendent Rogers went to Grand Teton National Park with Associate Director [Name]. He returned the following day.

Assistant Superintendent Johnston went to Billings on August 23 to attend a meeting of the State Public Lands Committee held on August 30. He returned on August 31.

On August 10 a group of outdoor writers of leading newspapers, sponsored by the Pacific Northwest Tourist Association, was brought into the Park for several days' stay. They entered the Northwest Gate and left via the West Gate.

Secretary of the Interior Wrag presented an award of merit and a check of \$150.00 to Engineer Aubrey L. Palmer, on August 11, at the Mammoth Hotel for a suggestion which he had submitted on a coordinate calculator, which is an instrument designed for a simple and time-saving method of obtaining a rough sketch and computation of acreage of an irregular tract of land within the limits of accuracy expected where distances are measured by pacing. A number of Park Service and non-Park officials attended the presentation.

Section 1.000

A population census was taken in the Park on August 6, 8, and 10, which revealed 3,332 employees in the Park as against 3,200 in 1933; 11,120 people as against 9,817, and a total of 15,452 employees and guests as against 13,617.

A ten-day backpack trip commemorating the 75th anniversary of the Park, sponsored by the Livingston Chapter of the Boy Scouts, known as the "Yellowstone Trail Riders" started from Gardiner on August 17 to follow the "Scout" trail. The trip was completed on August 26. Robert Murphy, a former Yellowstone Ranger, was the guide for the party.

The Region Two Office was moved on August 27 from the old building to 307 Federal Office Building, in Laramie, Wyoming.

The Local Civil Service Board held an examination on August 29 for Stenographer-Typist, at which were nine contestants. Messrs. Joffe and Meyer conducted the examination.

In-Service Training. Protection Division personnel received 100 man hours of training during August making a total of 7,500 man hours for season to date. Motion pictures were utilized for follow-up training on Forest Fire Control and Methods of Training. The publication, Yellowstone Weekly News, designed to keep employees more adequately informed has served a very useful purpose and has been enthusiastically received by them.

Inspections. R. M. Bixby of the Public Roads Administration, May 20, in via North Gate August 1; and on August 7, W. A. Cowan, District Engineer from Denver entered the Park. H. W. Matteson, District Engineer, P. M. Lawler, and Mr. Williams, in August 13.

Dr. C. Max Bauer, Geologist, National Park Service, Chicago, in South August 7. Secretary of the Interior Julius A. Brug in West August 9, and departed August 12 via North Gate. Roy A. Gracitt, Economist, National Park Service, Washington, in West August 10. On August 11 Roland A. Cowan, Interstate Commerce Commission, Billings, in. On August 15 Roland A. Cowan, Region Two Engineer and Paul L. Miller, Highway Engineer, S. S., Chicago, in Northcut. Associate Director A. S. Dummeray and Mr. Dummeray in North August 18, left for Glacier National Park August 23.

George Haggler, Superintendent, Boulder and Northcut area, and former Yellowstone Chief Ranger, in South August 19. Captain E. J. Lane, District Battlefield National Monument, in August 20. Sam Mint, Chief of Forests, Chicago, in North with his son Bob, August 26. W. B. Whitten, P. M., Denver Office, in August 27. Elmer Jenkins, a member of the Forestry's Concessions Advisory Group, in August 28; out August 29.

Lyle F. Watts, Chief Forester, U. S. Forest Service, Washington, D. C., with F. B. Hanson, Regional Forester, Missoula, Charles L. Fable, Director, Rocky Mountain Range and Experiment Station, Missoula, F. L. Van Meter, Assistant Regional Forester, Missoula, and J. D. Frydberg, Supervisor, Gallatin National Forest, in August 27.

Plans, Maps and Surveys. On August 13, Macaughlin, Inc., Contractors of Great Falls, Montana, were awarded the contract for Section 1 of the North Yellowstone Approach Road, consisting of 3.271 miles of grading and base

course surfacing, including a steel and concrete bridge over the Snake River. They have started bringing in equipment for the job and plan to pour the concrete bridge abutments for the bridge this fall. He also plans to start clearing operations at once.

Construction of project 1-D1, D-3, Bituminous Surfacing, Old Faithful to Isa Lake, under contractor, McLaughlin, Inc., has progressed very good despite considerable wet weather. All but approximately 3,000 feet of the bituminous mat near the Isa Lake end has been placed. Most of the fine grading and slope widening have been completed.

General Publicity. The regular weekly Yellowstone News Letters have been issued throughout the month for distribution among the Park employees, officials of the concessions and the Director and Regional Director's Offices.

A press release on travel was sent out on August 1, and on the 2nd the comparative travel figures for the month of July were mailed.

The first supply of 1947 folders, 2,000 copies, was received on August 5, which lasted for less than a day. A second shipment of 12,800 broadsides was received by freight on August 21 and on August 26 an additional 4,200 was received.

"Yellowstone Nature Notes" issued on August 19.

The services of Reuben M. Monson, publicity director for the 1947 season, were terminated on August 31.

Complaints. A total of 22 written complaints were received in the Superintendent's Office during the month of August. Seventeen complaints were made against the Yellowstone Park concessioners, while five letters complained of road conditions, camping facilities at the public campgrounds, insufficient accommodations, and a discourteous ranger at one of the gateways. The complaints registered against the concessioners had to do with unsanitary conditions at Old Faithful Camp, charges and rates for accommodations and tours, the quality of food and of dispensing practices, campground conditions, boats unsafe for Yellowstone Lake, difficulty in obtaining reservations, filling station incidents, condition of the silver and dishes used in the Park, gasoline rates, reckless driving on the part of a Yellowstone Park Company bus driver, the handling of baggage, and one complaint with regard to conditions which tend to retard improvement. All of the above complaints were answered by letter from the Office of the Superintendent after investigation of operations in the Park.

Maintenance. Record breaking traffic continued throughout the month and, together with several heavy rains, caused serious damage to our road surfaces. Some of the later plant mix surfaces have been breaking up. Heavy patching is required on about five miles of the Tower Falls to Canyon section; also about the same amount on the South Entrance to Lewis Lake section and on about one-half mile of the Lake to East Entrance road near Squaw Lake. All of these roads are plant mix with chip surface and have been laid during the last ten years.

A large resealing program would save many of our roads and also reduce the continual patching operations required of our maintenance forces,

time freeing time for such other needed work as, repair of house plumbing and shoulder rebuilding, etc.

A hot spot developed in the center of the North Junction to Canyon Junction road about four miles west of Canyon. It was a hole in the road break with a heavy concrete slab.

Five and one-fourth miles of the old Indian road was again repaved and sealing operations on this section are nearly complete. This constituted a very rough section on the west entrance trail.

Approximately five miles of the Saltonstall section has been repaved and is being sealed. This road is in fair shape. The south entrance road is rough. We are concentrating some of our equipment on this section, but hope to have some of the most serious sections repaired before winter comes.

The old road to Cooke road has a section of about 10 miles which has broken up quite seriously. We are concentrating our repairs on this section. Fifteen miles of this road, beginning about two miles west of Cooke and extending east to the Seartooth area, is in fairly good condition, but in need of a new coat of paint. The 15 mile paint job on the east end of the road has stood up exceptionally well, but is also in need of a new coat of paint.

Work was completed at Seryl Spring, Indian Junction and Mountain Point Lake. Our only repairs were made to the wooden stairs and platforms in the Canyon area.

The walk at Emerald pool was completed, a approximately 100 feet. Approximately 600 feet of walk was placed at the Mountain Lake area.

Many of our laborers were from high schools and colleges and at the end of the month road crews were only half manned. It was necessary to close out two camps, the ones at Horseshoe Springs and at Indian Junction. Shortage of equipment is still our most serious problem.

Concessions. The Mammoth Hot Springs Trail was closed from August 1 to August 15, inclusive, due to a police scare in the park. Several of the camp employees' children were taken to the hospital in Billings for examination for polio.

Interpretive Services. The Junior Nature Program which has been a part of the program at the Headquarters museum was discontinued on August 13. The number of children participating in this program had dropped to such a point that it was not deemed desirable to utilize the time of a seasonal part ranger naturalist on such work. During the 12 day period in August there were 12 days on which there was a sufficient number of children present to justify such an activity.

The portable public address unit which was taken to the hospital has served a very useful purpose in the presentation of our talks at the eruption of Old Faithful and to groups congregated at the Riverside and Daisy Geysers.

known activities and exhibits. Dr. J. H. ... from Lenny, Montana, left with us a very fine specimen of ... headwork which was in turn given to the ... National Museum for accessioning as an artifact of that museum.

An Indian scraper was found on the ... and ... the museum and has been accessioned as part of the ... artifacts.

Research and Observation. Some well known and ... work on the ecology of the ... a number of very interesting observations, ... considerable information on ...

Dr. Robert D. ... work in the thermal areas is an attempt to determine ... these elements.

Dr. George S. Stanley of the University of ... on the lake levels and old shore lines ... carrying this work on through the month of September.

The collecting permits were issued during the month, one for ... specimens, the other for entomological specimens.

The thermal phenomena in the upper and lower geyser basins has been ... to be of great interest because of the constant interjection of changes which are unexpected. The Giantess Geyser has not erupted ... fault which is associated with the Giantess has been erupting with considerable regularity and at the close of the month has ... asphalt walk which passed near it. It is thought that the dissipation of energy by the erupting of the fault has influenced the possibility of an eruption by the Giantess Geyser.

The Great Geyser continues to provide the most spectacular of the thermal shows in the geyser basins. Thousands of people have enjoyed seeing it during August. It has continued erupting on an interval of approximately 12 hours and on numerous occasions two eruptions have been observed in one daylight period.

The Beehive Geyser which for years has been relatively inactive at the close of the month of August had erupted five times in a period of 12 hours. Some of these eruptions gave evidence of having been stimulated by hand.

The most unusual of all the geyser eruptions in the upper geyser basin have been those eruptions occurring in the Giantess and Big Old Geyser. In the 1930's when Dr. Fanner visited Yellowstone an attempt was made to induce an eruption from the Big Old Geyser and from the Giantess Geyser and at that time although all of the means by which an eruption might be stimulated were used, it was impossible to get these geysers to play. During the month these geysers have erupted several times.

In the lower geyser basin Fountain Geyser, the Fountain ... and the Geopline Geyser have been erupting with pronounced regularity and although the opportunity has not presented itself to make a detailed observation of this eruptive cycle so that the interval between eruptions can be ... and

THE UNITED STATES OF AMERICA
DO hereby certify that the following is a true and correct copy of the original as the same appears on file in the Department of the Interior.

IN WITNESS WHEREOF, the Secretary of the Interior has hereunto set his hand and the seal of the Department at Washington, D.C., this 1st day of January, 1901.

JOHN W. FOSTER, Secretary of the Interior.

with some degree of accuracy, it is known that they were abundant only during August. Their eruptive cycle has been following the same pattern. This is a spectacular eruption from the Fountain Pool following upon a few hours by a violent eruption of the Fountain Layer which is then followed by an eruption of the Fountain Layer. This cycle has repeated itself several times during the month of August.

Increases and Decreases in Travel.

Visitors. Senator William A. Clark from Nevada came into the Park August 3. On August 5 Congressman Michael J. Gorman of Ohio entered the Park via the North Gate, while Congressman John J. Allen, Jr. of California entered via the North Gate. Nelson A. Rockefeller and family entered on August 5; departed via South Gate August 5.

On August 7, Senator Henry C. Dworshak of Idaho came into the Northwest Gate. S. S. McElwain, Editor, Washington Evening Star, Washington, D. C., came in the West Gate August 6; departed via North Gate August 10. Louis Moschler, Parliamentarian, House of Representatives, Washington, D. C., in August 7.

Brigadier General W. A. Young in South Gate August 10, and Senator Frank E. Taylor of Idaho in same day. Professor Samuel Lang Beale, Graduate Faculty of Yale, entered the Park August 11. Agatha Tryde, correspondent from London, came into the Park August 13, and Congressman Charles A. Flinn of California entered August 15. On August 16 Congressman Jay Byrnes of New York in West. Robert Armstrong, Washington correspondent for the St. Louis Globe Democrat, and Yellowstone seasonal ranger in 1926, came into the Park August 16.

Congressman Fred L. Crawford of Michigan entered North Gate August 16. On August 21 Congressman Carl F. Curtis of Nebraska entered the West Gate. Governor Herbert H. Haw of Utah in West August 21. Paul Paraglie, noted lecturer and author, in August 27; also Dr. Adolfe Forster of Germany, Chief, Economic Development Section, United Nations.

Dr. A. E. Vizzard, Director, Michigan Institute of Fisheries Research, and former official of the Bureau of Fisheries, in August 28. Major Hillock Stuart, Military Attaché, Union of South Africa, in North Gate August 28. Congressman John A. Harbo of Idaho and Charles C. Russell of Nevada, in West August 29; out Northwest Gate. Congressman John Phillips of California in South, out West August 29.

It is a common knowledge that the world is a very large place and that there are many different people living in it. This is a very interesting fact and it is one that we should all know. It is a fact that we should all know and it is one that we should all be proud of. It is a fact that we should all know and it is one that we should all be proud of.

THE WORLD IS A VERY LARGE PLACE

Country	Population	Area	Capital
United States	250,000,000	3,600,000 sq. miles	Washington, D.C.
China	1,200,000,000	9,600,000 sq. miles	Beijing
India	750,000,000	2,900,000 sq. miles	New Delhi
Japan	120,000,000	37,800 sq. miles	Tokyo
United Kingdom	55,000,000	94,000 sq. miles	London
France	58,000,000	211,000 sq. miles	Paris
Germany	80,000,000	137,000 sq. miles	Berlin
Italy	58,000,000	101,000 sq. miles	Rome
Spain	40,000,000	170,000 sq. miles	Madrid
Sweden	8,000,000	450,000 sq. miles	Stockholm

The world is a very large place and there are many different people living in it. This is a very interesting fact and it is one that we should all know. It is a fact that we should all know and it is one that we should all be proud of. It is a fact that we should all know and it is one that we should all be proud of.

On the other hand, it is a very small place when you look at it from a different point of view. It is a very small place when you look at it from a different point of view. It is a very small place when you look at it from a different point of view. It is a very small place when you look at it from a different point of view.

It is a very small place when you look at it from a different point of view. It is a very small place when you look at it from a different point of view. It is a very small place when you look at it from a different point of view. It is a very small place when you look at it from a different point of view. It is a very small place when you look at it from a different point of view.

It is a very small place when you look at it from a different point of view. It is a very small place when you look at it from a different point of view. It is a very small place when you look at it from a different point of view. It is a very small place when you look at it from a different point of view. It is a very small place when you look at it from a different point of view.

It is a very small place when you look at it from a different point of view. It is a very small place when you look at it from a different point of view. It is a very small place when you look at it from a different point of view. It is a very small place when you look at it from a different point of view. It is a very small place when you look at it from a different point of view.

Tourist Service. The protection division continued protection of the natural features of the park, carrying out law enforcement, enforcing park laws and regulations, investigating and preparing reports on all other tourist incidents, searching for lost persons and the bodies of animal persons in the park and supplying information and assistance to the largest number of people that ever visited the park in August.

Investigation of 90 reported violations, including 14 cases of hunting, investigation of 66 motor vehicle accidents, and going to towns to persons wanted in connection with emergencies at home, commercial, or political, fire and even census and property reports required the constant efforts of all the rangers.

Four patrol cars were in operation all month to enforce park regulations and for general protection and inspection purposes.

A total of 14,400 brochures were received during the latter part of the month, but this number lasted but a few days.

Police Protection. A total of 36 cases were brought before the U. S. District Court for trial during August. Of this number, twenty three were for violations of the speed regulations, seven for reckless driving, one for molesting public property, two for disorderly conduct, two for driving off designated roads or parking areas and one for rape.

Nines totaling \$712.00 were collected. Two and a half months, one for 3 hours and two for sixty days were imposed. One case was passed over to the U. S. District Court in Cheyenne, Wyoming for disposition.

Wildlife and Fish Cultural Activities. All month these are being held in cooperation with the Montana Wildlife Laboratory Division to live-trap 1,500 to 2,000 antelope this winter in the Lemmon Creek area. These antelope will be allotted to the State of Montana for translocating in various sections of the state.

Black Bears. Black bears, particularly mothers with small cubs, have attracted great attraction to park visitors this season. They have been numerous around most of the park roads and have been responsible for considerable traffic jams.

Thirty-two visitors have been reported as being injured by bears, or .01 percent of total park travel (2,000,000). This incidence of injury is slightly higher than in 1946 but is well below the 10-year annual average of .013 percent. Only one person out of over 25,000 visitors has been reported injured by bears, as compared to the 10-year annual average of one person out of each 7,695. Most injuries have been of a minor nature, although some required medical attention and a few brief hospitalizations. Most of the injuries occurred in connection with drive-in-belted activities. In numerous cases "others," not the victim, were reported as reacting to bears.

Total reported property damage from bears this season is \$1,000.00, five attributed to black bears and one to a grizzly.

Five black bears have been killed in accidents or because of injuries sustained and one has been killed for control purposes.

A bear census was completed during the early part of the month. Results of the count are being compiled by the Park Biologist.

The male grizzly bear, about four years old, was shot and skinned on August 20 to the Indian Park Zoo, Pittsburgh, Pennsylvania, to fill a long pending request. This grizzly weighed 310 pounds.

WILDLIFE. Requests for live buffalo which appear to qualify for approval now total 15 animals. Twenty-five of these have been requested on the basis of applying for stocking Thermopole and Jackson Hole areas.

Shots and squeeze facilities at the lower end of the Indian Park Zoo reductions have become unserviceable and extensive repairs are being made in readiness for the coming winter operations.

W.A. On August 17 a meeting of the Upper Gallatin Association was held at Jackson Ranger Station in the Gallatin National Forest. At this meeting a minimum elk reduction goal of 500 head was set with some further reduction as necessary to bring the Gallatin elk herd down to 1,000 animals. Execution of this plan is to be the responsibility of the National Forest and Game Warden and Wildlife men of Montana will be on the ground after 10, during and following the hunting season to make current elk reduction of herd size.

The annual fall meeting of the Absaroka Conservation Committee, at which matters pertaining to management of the Northern Yellowstone elk herd will be discussed, has been tentatively set for the weekend of October 2-3.

TRIP TO THE FALL. A trip to the falls was conducted during the week of August 10-15, the Fish and Wildlife Service conducting a count of the areas at the same time. An airplane count of the Northern arm of the park was made with District Ranger Walter L. Smith as observer. Census results are being compiled and tabulated by the Park Biologist.

Forest Fire Protection. Lightning protection installations were completed on the Purple Mountain lookout structure on August 1. This tower is equipped with an ultra high frequency radio, and communication system. Helium has been established.

During the month of August, eight fires were reported. However, only three of these fires were found the next day having gone out before being located by the suppression crews.

Building Fire Protection. Inspections were made of all commercial buildings between the period of August 1-3. Some of the recommendations which had been brought to the attention of the management of the various commercial establishments at the time the annual Building Fire Inspection was made had been corrected. It was found that fire brigades of employees in the larger establishments were fairly well organized but considerable additional training was needed. There has been a noticeable improvement in the conditions existing in the hotels and lodges and other establishments and buildings which are used for the purpose of accommodating Park visitors and Park employees.

Locusts and Tree Diseases. A heavy locust infestation was reported to be spruce budworm on lodge pole pine was reported in the falls river area. The infestation did not appear to be causing any permanent damage but in case of an epidemic building over a period of years it is probable that a considerable number of trees in this area will be killed. The matter has been brought to the attention of the Bureau of Entomology and Plant Quarantine and they expect to have a representative of their office visit the area in the near future to determine the extent and severity of damage caused by the apparent epidemic.

Accidents. A total of 6 motor vehicle accidents were reported during the month and of this number 32 were classed as minor and 24 were classed as major. Four persons suffered personal injuries but no fatalities occurred. Two of these injuries were serious but the patients are now being treated in the hospital. The government trucks were involved in accidents but very little damage occurred to the vehicles and no injuries to the occupants.

On August 1, 1917, Herbert A. Kline from Helena, Montana and M. C. Baldwin, 57, from Lewiston, Idaho, drowned in Yellowstone Lake during a sudden storm which caused their boat to capsize. The body of Mr. Kline was recovered on August 12 and Mr. Baldwin on August 13.

On August 2, Harold Johns from Los Angeles, Nevada, employed at the National received second degree burns when he stepped in a hot pool at the falls area.

On August 3, Harry Benson, 15, from Boise, Idaho and Mr. J. J. Watson, 64, of Los Angeles, California were drowned in Lake Park during a sudden storm. Their bodies were recovered on August 11.

On August 22, Mr. Earl C. Avery, 33, Nevada, husband of Mrs. Avery, 37, owner of Lady Enterprise, Lady, Wyoming, and the mother, age 12, drowned in Yellowstone Lake when their boat was swamped during a sudden storm. Their bodies were recovered on August 21 and 23.

The Associated Press, United Press, and International News Service were wired about the drownings.

Personnel. The transfer of Harold Bradley to detailed report National Department became effective at 8:00 a.m., August 13.

Leonard Johnson, Floral Department Clerk, 2122, transferred to the War Department, Great Falls, Montana, effective August 1.

Miscellaneous. On August 2 a son was born to temporary helper and Mr. Prater Brinkell at Idaho Falls, Idaho. A daughter was born to Mr. and Mrs. Earl Johnson of Gardiner, Montana, at the Gemeth Hospital on August 13, and a daughter to Mr. and Mrs. Glenn E. Citation of Gardiner at the Gemeth Hospital on August 14. On August 15 a son was born to Mr. and Mrs. J. J. Tison at the Gemeth Hospital. Mr. Tison is the relief night watchman for the National Park Service. A daughter was born to Mr. and Mrs. John T. Tison at the Gemeth Hospital on August 20. Mr. Tison is employed as a seasonal truck driver while his wife is the daughter of the Yellowstone Blacksmiths. On August 21, a son was born to Mr. and Mrs. Aubrey L. Tinson at the Gemeth Hospital. Mr. Tinson
