Design and Construction

Plans, Maps, and Surveys: The drawings for the Madison Junction amphitheater development were received from WODC for review. Considerable study earlier in the month was made of this development by the Chief Park Naturalist McIntyre, Park Landscape Architect Mattson, and West District Manager Dick, and we are in general agreement with the drawing, believing that the layout is excellent.

New Construction: Bids for construction of the new teacher residences were opened on November 16. Successful bidder was Easton and Miller of Livingston, Montana, for \$44,613.00 for the three units. The contractor has broken ground and expects to complete work by March 1, weather permitting.

Grinnell Company of the Pacific has sent in a crew from Billings to install the sprinkler system in the new warehouse and expects to complete by mid-December. Work on the seasonal apartments at Mammoth by Nelson Brothers continued steadily but slowly. Cabinets and trim are being installed and boilers have arrived for the heating system but have not been installed.

The roof repairs on the warehouse at Mammoth by Reed Nelson were completed and accepted on November 23 except for replacement of broken ridge tile.

The dredging of Bridge Bay by Shellmaker has been completed except for a few minor spots and the contractor will move out shortly after December 1.

All other contract projects have been shut down for winter except for partial work at Madison Junction by Taggart Construction Company. He expects to complete crushing of material by December 12 and will then shut down completely.
