PARK AREAS AND EMPLOYMENT OPPORTUNITIES FOR SUMMER 1986

The attached list shows by Region, the park areas and the approximate number of new seasonal positions to be filled under the following position options: (1) Interpretation, (2) Law Enforcement, (3) General. The number of positions available in each park is subject to change due to unanticipated budgetary restrictions. The following letter codes represent the approximate number of vacancies expected for each position option in a park:

A - 1 to 5
B - 6 to 10
C - 11 to 20
D - 21 to 30
E - 30 or more

CLEMSON
LIBRARY

Brief descriptions of the three position options are listed below: (Use these position codes (1, 2, 3) when completing section H of the application.)

- (1) Park Aid/Technician/Ranger (INTERPRETATION) is responsible for developing and presenting a number of interpretive programs based on available source material; independently performs considerable visitor services such as presenting talks that explain a park's natural, historic, archeological or cultural feature; is accountable for the more complex audiovisual equipment; serves on roving assignments handling routine situations that arise. This option includes positions in living history, cultural demonstrations and historical interpretation.
- (2) Park Aid/Technician/Ranger (LAW ENFORCEMENT) patrols park roads and visitor areas; performs law enforcement duties and provides for visitor safety; assists visitor with interpretive and other type information; participates in and directs emergency operations.
- (3) Park Aid/Technician/Ranger (GENERAL) provides services in a variety of positions including fee collection, law enforcement, back country, campground, forestry or resource management, recreation, lifeguard, radio and telephone communication, statistical maintenance, dissemination of interpretive and general information in printed and oral form to the park visitor.

You should use this information to determine where your best employment opportunities may be depending on the education, training and experience you have as compared to the various type of work defined in the three position options. The National Park Service encourages applicants to consider a smaller or lesser visited park in the System as one of their choices for seasonal employment. Usually, the smaller or lesser visited parks receive fewer applicants and competition for a position is not as keen as in the larger natural areas.

* An asterisk appearing by a park area location code indicates that this area traditionally receives fewer seasonal applications.

LOCATION CODE:

Select the area(s) where you wish consideration and show the Location Code(s) under Block H on Application Form 10-139. REMEMBER THAT YOU CAN ONLY APPLY TO TWO PARKS WITHIN THE NATIONAL PARK SERVICE.
