L
E

This file constitutes a part of the official records of the National Park Service and should not be separated or papers withdrawn without express authority of the official in charge.

All files should be returned promptly to the File Room.

Officials and employees will be held responsible for failure to observe these rules, which are necessary to protect the integrity of the official records.

ARNO B. CAMMERER,
Director.

January 6, 1941.

MEMORANDUM for the Director:

Following is the report of activities for Yellowstone National Park for the month of December, 1940:

000 - General

O10 - December was noted for the large variation in weather conditions. Beginning on December 12, there was a "cold snap" during which the temperature at Mammoth went below zero every night for five consecutive nights. Temperatures went as low as 32° below zero at West Yellowstone for the same period. In contrast to this cold weather, it was possible to play golf on December 21 and 22 at the golf course near Gardiner. There was very little precipitation during the month.

On December 17 it was necessary to send the park snowplows to Lake to bring out the Yellowstone Park Company's Lake Lodge "interkeeper," who was suddenly taken ill. The trip was made with little difficulty and the road remained passable until December 27, although no travel was permitted over it except official trips.

020 - General Weather Conditions

December, 1940, averaged 5.0° warmer than normal, but this was less than the year ago record that was the mildest on record. The last eight Decembers have all been above the long period average December temperature. Precipitation this December was considerably below normal; snowfall was 6.6 inches, compared to the normal 12.5 inches of snowfall. 4.9 inches of snow fell in one 24 hours on the 26 and 27th of December. There was less snow on the ground at Christmas this month than for any Christmas since 1913, only a trace and a few scattered drifts appearing.

The following snow depths were recorded at the close of the month:

	1930	1939	1940
Snake River Station	.1"	11"	11"
Cascade Creek	22"	23"	6"
Bechler River Station	27"	20"	14"
Buffalo Lake	54"	36"	50" (Dec. 17)

Lewis River Divide	64"	25"	-
Harebell Creek	55"	24"	-
Boundary Creek	77"	26"	20" (Dec. 16)

1. Introduction

The present paper describes

the results of a study of the effect of the addition of MgO and CaO to the

silicate - SiO_2

system and the effect of the addition of MgO and CaO to the system Al_2O_3 - SiO_2 . The effect of the addition of MgO and CaO to the system Al_2O_3 - SiO_2 was studied by the method of thermodynamic calculations. The effect of the addition of MgO and CaO to the system Al_2O_3 - SiO_2 was studied by the method of thermodynamic calculations. The effect of the addition of MgO and CaO to the system Al_2O_3 - SiO_2 was studied by the method of thermodynamic calculations.

and the effect of the addition of MgO and CaO to the system Al_2O_3 - SiO_2 was studied by the method of thermodynamic calculations. The effect of the addition of MgO and CaO to the system Al_2O_3 - SiO_2 was studied by the method of thermodynamic calculations.

2. Experimental methods

The effect of the addition of MgO and CaO to the system Al_2O_3 - SiO_2 was studied by the method of thermodynamic calculations. The effect of the addition of MgO and CaO to the system Al_2O_3 - SiO_2 was studied by the method of thermodynamic calculations. The effect of the addition of MgO and CaO to the system Al_2O_3 - SiO_2 was studied by the method of thermodynamic calculations.

and the effect of the addition of MgO and CaO to the system Al_2O_3 - SiO_2 was studied by the method of thermodynamic calculations.

and the effect of the addition of MgO and CaO to the system Al_2O_3 - SiO_2 was studied by the method of thermodynamic calculations. The effect of the addition of MgO and CaO to the system Al_2O_3 - SiO_2 was studied by the method of thermodynamic calculations.

100 - Administration

110 - Superintendent's Special Activities

Mr. Rogers left the park by automobile on November 26 for a trip to Denver and the Regional Office at Omaha, Nebraska, and returned to the park December 4. On December 11 he attended a conference meeting at Gardiner, Montana, at which meeting Kodaslides were shown by Park Ranger Frank Nowak. Mr. Rogers left for Denver on December 17 on annual leave and expects to spend the balance of the month and part of January in Denver.

Assistant to the Superintendent Joffe received a temporary detail to the Washington Office to assist the Park Operators Division and left the park December 20.

120 - Park Inspections

George R. Morgan, Assistant Equipment Engineer, Omaha, Neb., in North December 9.

F. H. Bessolevrie and C. H. Collock, Postal Inspectors, in North December 9.

150 - Maps, Plans and Surveys

Drawings were started on the utility lines of the lake cabin area. The new cabin area for Marathon was staked for grading, and the new employee's cottage staked. Data was compiled for revision to the 1931 Master Plan.

160 - General Publicity

Several press releases with regard to the new cabin and areas were sent out during the month.

Considerable work was done on the preparation of studies for information booklets on the Big Hole Battlefield National Monument and the Custer Battlefield National Cemetery. These studies will be submitted early next January.

200 - Maintenance, New Construction and Improvement

210 - Maintenance

Several snowplow trips were made to roads at the Northeast Entrance.

Numerous rock slides were removed in the park during December and sanding of the Yellowstone River and Fort Benton roads extended to.

250 - Special Improvement Activities

CCC - Camp MP-1, Mammoth, and MP-7, Old Faithful, were the only two camps in Yellowstone Park during December. At the beginning of the month MP-1 had a company strength of 120 men and MP-7 had 17. On December 1st, 67 men from MP-1 and 53 men from MP-7 were sent home as the terms of their enrollments had expired.

Two jobs were reported completed during the month. Job 271, which covered the obliteration of the old water supply reservoir near the old Mammoth Lodge, and Job 412, Mahogany Cottages, were finished. Eight new cottages were constructed under this job, - all these small buildings and 6 of the 5-room buildings. Although this job was set up for 2 cottages, it was decided to extend it so as to provide one job for each additional building constructed.

On December 11, a working quarantine was placed on both camps and one case of mumps was reported. During the remainder of the month no more cases appeared.

300 - Activities of Other Agencies in the Park

310 - Park Operators

The 1941 proposed rates for Haynes, Inc., and U.S. Auto Inn were submitted to the Director during December.

320 - Cooperating Governmental Agencies

Public Roads Administration: Doctor Night Trail Company completed the last bridge on the East approach road and closed down for the season.

The Public Roads Administration dug five test pits for foundation investigation at the Yellowstone River on the Northwest entrance road.

400 - Interpretation

421 - Progress of Exhibit Plans and Projects

Work is being done on plans for the renovation and revision of case exhibits in the Mammoth Museum, with special attention to the Fungi Case in the Biology Room and the Early History Cases in the History and Ethnology Room.

The preparation of a prospectus on the proposed new headquarters museum was completed during December and submitted on December 27 for review and discussion to the Oregon II and Washington Offices.

430 - Research and Observation

Assistant Park Naturalist Jorden has made some progress in a report

the first time in the history of the country, a large number of men were sent to the front, and the number of men in the field increased rapidly.

THE WAR IN AFRICA - 1878 - 1879.

The war in Africa was a conflict between the British Government and the Boers, who had been granted a large amount of land in South Africa by the British Government. The Boers had been granted a large amount of land in South Africa by the British Government.

The war in Africa was a conflict between the British Government and the Boers, who had been granted a large amount of land in South Africa by the British Government. The Boers had been granted a large amount of land in South Africa by the British Government.

THE WAR IN AFRICA - 1882.

Boer War in South Africa - 1882.

The war in Africa was a conflict between the British Government and the Boers, who had been granted a large amount of land in South Africa by the British Government.

The war in Africa was a conflict between the British Government and the Boers, who had been granted a large amount of land in South Africa by the British Government.

THE WAR IN AFRICA - 1883.

The war in Africa was a conflict between the British Government and the Boers, who had been granted a large amount of land in South Africa by the British Government.

on the status of the mammals may be followed up, and the opportunity to observe their habits at the same locality on several days and at that time numbered only 30 birds.

Of greatest interest in the first half above mentioned was the hot spring occurring to the west of the spring area in the West Portal. This has shifted from the last known location of about 100 yards and at present there is a large volume of water flowing from a vent or sprout of the Jupiter Terrace. This is the first time we have seen this area for several years.

432 - Ecology

Buffalo - During the month the animals were found to have moved to higher elevations in the park and to have taken their winter range between 100 to 120 animal were observed in the areas near the valley-side slope areas, as well as along the lower meadows where they had normally congregated in winter. Between Dec. 10 and Dec. 20, 1931, the winter range at the close of 1930 within Lassen Park was estimated at over 500 or 520 Buffalo at the range areas (the animals in the valley and reduction of the Lower Valley herd). The animals will be driven into the corrals, if possible, and the use of the horses in the areas around by means of horse riders.

Elk - Heavy concentration of elk occurred all along the northern winter range and at the close of the month the north-country migration had reached beyond Hellroaring Creek and the eastern section of the Cottonwood Creek area. Some 4,000 animals are now in this vicinity, from which the normal route of further migration leads into the remaining territory in Klamath. Approximately 200 elk are now in the Corral area. The several snow storms which occurred during December tended to further concentrate the elk in the park but those storms were not severe enough to force migration beyond the park boundaries. Weather conditions continued unfavorable in the Gardiner-Jardine section and a total of only 34 animals had been taken by hunters at the close of the month, as compared with a total of 71 for the entire period of 1931.

Trapping Operations - In the early part of the month the animals near the close of the period, intensive efforts were made to trap elk for live shipments at the Blacktail Deer Creek trap. There were no elk in the vicinity of any of the other traps. In the Black-tail area snow conditions were more severe than at the lower elevations and 60 to 70% elk foraged in this vicinity throughout the month. Due to abundance of available forage, however, the animals showed no inclination to seek the trap in the trapping corral and all efforts toward capture of the animals were unsuccessful. No traps have been reactive for about 7% live animals and further efforts will be continued in January to capture elk for these shipments.

500 - Use of Park Facilities by the Public

510 - Increase or Decrease in Travel

A marked decrease in travel as compared with last year was recorded. 1939 was abnormally warm and little snow fell until the end of the month so that travel was possible with the roads normally closed by snow in December.

December, 1940

600 - Protection

610 - Ranger Service

The open hunting season on all deer in the Boundary Waters and areas for the entire month and in the Superior River area for the first ten days of the month required regular border patrols. Patrols were also made over other sections for protection purposes, to take water depths and to observe wildlife conditions.

Special Headquarters work consisted of the preparation of travel drivers' examination for Civilian Enrollees covering National War Service Rules and Regulations, safety, first aid, and accident prevention, preparation of a mileage and time travel table for firewood hauling use, revision of the Park Ranger's Administrative Manual, Airport Manual and Entrance Station Manual and the compilation of pertinent department records.

900 - Miscellaneous

The regular monthly meeting of the Federal employees which was held December 2. Colored pictures were shown at this meeting by Mrs. Heller and Park Ranger Frank Kowalski.

Merritt W. Grant, Clerk-Stenographer and his wife left Park Ranger Office, resigned to take a position with the State Department, Foreign Service, effective December 16, 1940.

A surprise party was given in honor of Mr. and Mrs. Arnold Gart and Mr. and Mrs. Robert Gillum at the home of the latter on December 17. Many local people attended and a good time was had by all.

On December 18 a son was born to Mrs. Eddie and Mrs. Earl F.

the first time. It would also influence decisions
on whether to move from one form of ownership to another.
The government could then group them together and the
"Ministers" of Finance and Health

Proposed changes

The proposed changes are as follows:
1. The Minister of Finance will be responsible for the budget and the financial management of the government.

2. The Minister of Health will be responsible for the health care system and the delivery of health services.

3. The Minister of Education will be responsible for the education system and the delivery of educational services.

4. The Minister of Social Services will be responsible for the delivery of social services, including welfare, housing, and community services.

5. The Minister of Environment will be responsible for the protection of the environment and the delivery of environmental services.

6. The Minister of Transport will be responsible for the delivery of transport services, including roads, railways, and air travel.

7. The Minister of Agriculture will be responsible for the delivery of agricultural services, including agriculture, fisheries, and forestry.

8. The Minister of Industry will be responsible for the delivery of industrial services, including industry, commerce, and trade.

9. The Minister of Defense will be responsible for the delivery of defense services, including the armed forces and national security.

10. The Minister of Justice will be responsible for the delivery of justice services, including law enforcement, the judiciary, and the legal system.

11. The Minister of Foreign Affairs will be responsible for the delivery of foreign affairs services, including international relations, diplomacy, and foreign policy.

12. The Minister of Internal Affairs will be responsible for the delivery of internal affairs services, including the police, the prison system, and the civil service.

13. The Minister of Culture will be responsible for the delivery of cultural services, including culture, arts, and heritage.

Hochstrasser at the Park Hospital, Ullrichsberg, Dec. 22nd.

A Christmas Program was held on December 21 in the park chapel. The school children of the city participated in the program and Santa Claus was present to reward their efforts. Mr. Lutz.

On December 21 Post Master Joe F. Wirt advised the Superintendent's Office of his appointment as post master, which was effective October 15, 1940. Mr. Wirt had previously failed to officially notify this office of his appointment.

An all-day walking was enjoyed on December 23 by Executive Order.

and the majority of children, the need for punishment
is not so great as it is in the case of the older
children. The younger children are more easily
controlled by the teacher than the older ones.
The younger children are more easily controlled
by the teacher than the older ones.
