FILE NO.

MONTHLY REPORT

January, 1939.

NAME OF THE NAME OF THE PARTY O

IMPORTANT

This file constitutes a part of the official records of the National Park Service and should not be separated or papers withdrawn without express authority of the official in charge. All Files should be returned promptly to the File Room. Officials and employees will be held responsible for failure to observe these rules, which are necessary to protect the integrity of the official records.

DEPARTMENT OF THE INTERIOR

NATIONAL PARK SERVICE YELLOWSTONE NATIONAL PARK YELLOWSTONE PARK, WYO.

OFFICE OF THE SUPERINTENDENT

February 4, 1939

Memorandum for the Director:

Following is the report of activities for Yellowstone National Park for the month of January, 1939:

000 - General

New Year's Day falling on Sunday, the occasion was celebrated in the park on January 2 with a Mummer's Parade similar to those of the past two years, and many interesting and grotesque costumes were displayed. Following the parade members of the community participated in a dinner at the Government mess during which community singing was engaged in and short talks made. United States Commissioner T. Paul Wilcox acted as toastmaster. The evening was spent with a dance in the canteen building which closed the activities for the holiday season.

On January 3 the park received a wire from United States Senator Burton K. Wheeler of Montana advising that he had introduced a bill authorizing the use of government buildings for elementary school purposes and the use of government owned transportation facilities for transporting children to and from school where other facilities were not available. This school problem has been the subject of discussion for a number of years, and it appears as if suitable progress is being made toward its solution. A similar bill was introduced by Congressman Frank Horton of Wyoming, while Senator M. M. Logan of Kentucky introduced during the month another bill to help relieve the unsatisfactory school situation on Government reservations.

Considerable publicity was given to the Buffalo Show staged at the Buffalo Ranch on January 8, and a number of persons who had attended the Rodeo Association of America national convention in Livingston on December 6 to 8 came to the park to witness the wildlife show. With excellent weather prevailing and the road to the Buffalo Ranch in good condition, a check by rangers showed 647 persons in attendance. Besides a number of prominent riders and promoters, Mrs. Helena H. S. Pringle of New York City, prominent writer of magazine articles, and Lieutenant Colonel W. M. Hoge, Corps of Engineers, United States Army, Omaha, enjoyed the spectacle.

Charles Johnson and John Krause, garage owners from Anaconda, Montana, gave a demonstration on Swan Lake Flat on the morning of January 28 of a propellor-driven type snowplane which they constructed and which has proven successful in operation in other localities. A

number of the members of the park force were taken on trips over the snow-covered flat, and the demonstration convinced the skeptical Park Service men that it was possible to travel over the soft snow with such a vehicle. The snowplane has a 65 h.p. airplane type motor and operates on three skis, one in front and one on each side, the skis being ten inches wide and seven and one-half feet long.

020 - General Weather Conditions

A summary of the general weather conditions in the park will be found attached to the back of this report.

021 - In the Park

In general, snowfall and precipitation throughout the park was slightly above the average for the past nine-year period.

The following tabulation shows the snow depths at the close of January for various locations in the park over a comparative nine-year period:

	1931	1932	1933	1934	1935	1936	1937	1938	1939

*Previous records not available for Crevice.

All roads within the park, with the exception of the Mammoth-Cooke City road, which was plowed out each week end with snow removal equipment, remained closed to travel.

022 - Approaches to the Park

The South Entrance approach road as far north as Grand Teton
National Park remained open to travel and in good winter condition, with
the exception of brief periods of severe storm when the road north of
Jackson, Wyoming, was temporarily blocked to travel. Teton Pass and
the Hoback Canyon roads were maintained with Wyoming state snow removal
equipment. Roads between Red Lodge and Cooke City, Montana, and between
Ashton, Idaho, and the West Entrance were blocked with snow during
January.

Due to new road construction work which was carried on until the middle of January the East Entrance approach road from Cody, Wyoming was passable to the park boundary until the last few days of the month when storms rendered this road almost impassable near the park.

The Bozeman-West Yellowstone road was maintained with Montana state snow removal equipment.

The North Entrance approach road from Livingston, Montana, as usual, remained in good condition for travel.

023 - In Nearby States

Usual winter conditions prevailed in nearby states and highways were in good condition for travel with the exception of those routes leading over high mountain passes.

100 - Administration

110 - Status of Work

Superintendent Rogers returned to Washington from annual leave in Denver at the beginning of the month to be present for the Superintendents. Conference called for January 5 to 10. He remained in Washington throughout the month on special assignment, and expects to return to Yellowstone about the middle of March. Assistant Superintendent Emmert was acting in his absence.

Hugh Ebert, permanent motor truck driver, entered on duty as a permanent park ranger effective January 1.

Wyman P. Benson, WAE per-diem plumber, entered on duty as a permanent plumber effective January 1.

Clerk Fred Bertagnolli entered on duty on January 4, having been selected from the Civil Service Regisyer of the Thirteenth District.

Robert K. Weldon, park ranger transferred from Mammoth Cave National Park, Kentucky, entered on duty on the sixteenth.

Winnifred Meer, PWA clerk, entered on duty on January 30.

Seasonal Clerk LeRoy VanCott and Seasonal Warehouseman William N. Reeve were furloughed at the close of January 31.

Assistant to the Superintendent Joffe and Chief Clerk Neilson received orders to attend the Chief Clerks: Conference to be held in Washington February 15 to 20.

120 - Inspections by:

121 - Acting Superintendent

Acting Superintendent Emmert made the usual inspections around headquarters and made trips into and outside the park as follows:

- January 3 With Messrs. Joffe, LaNoue and Barrows to Gardiner to a meeting of the Gardiner Commercial Club to discuss the proposed legislation to increase the elk range north of the park by the purchase of land for addition to the Absaroka and Gallatin National Forests.
- January 7 To Living ston in afternoon to attend last days session of Rodeo Association of America's national convention. Returned Mammoth following morning. Assistant to the Superintendent Joffe attended all of the sessions, while Chief Ranger LaNoue was present on the last afternoon.
- January 8 To Buffalo Ranch with Lieutenant Colonel W. M. Hoge for Buffalo Show. Returned Mammoth for night.
- January 13 To Buffalo Ranch with Chief Ranger LaNoue. Returned Mammoth for night.
- January 20 To Buffalo Ranch with Messrs. LaNoue and Seasholtz. Returned Mammoth for night.

January 27 - To Tower Junction with Messrs. Moran and Parks of Cody. Returned Mammoth for night.

122 - Special Field Representatives of the National Park Service

George Morgan, Assistant Equipment Engineer, and F. T. Priester, Administrative Inspector, Region II, Omaha, in north January 17, out north January 20.

123 - National Park Service Officers

Martin A. Cannon and Robert C. McCarthy of the Park Operators Division, Washington, arrived via north gate January 214 with Huntley Child of the Yellowstone Park Company. Departed same day.

124 - Other Interior Department Officials

L. J. Snell, Junior Engineer, Geological Survey, Boise, Idaho, in north January 11 to inspect water gauges, out north fifteenth.

140 - Labor Situation

As practically all activities in the park were closed except those of the National Park Service, there was little opportunity for employment.

150 - Equipment and Supplies

There were one carload each of fir lumber, fuel oil and cement,

As precional, ell obirities in the paramere closs except thuse of the tio al hard ervice, there was little opportunity for exployment.

150 - Equipment and Su plics

There were one reclose ore fit Land rule oil and occent,

nine carloads of coal, two carloads each of cedar telephone poles and sewer pipe, and three carloads of trucks received in addition to other shipments of lumber, paint supplies, lime and plaster, plumbing supplies, Hi-Test gasoline, groceries and crossarms weighing 28,540 lbs.

The value of storehouse issues during the month of January amounted \$0 \$9,850.28.

160 - Status of Alienated Lands

There was no change in the status of alienated lands during the month.

170 - Plans, Maps and Surveys

General engineering field work under this item consisted of the extension of coltrol for additional topographic surveys in the Mammoth area and layouts for roads, camp areas, and water and sewer lines in the Mammoth campground. All office work was in connection with Public Works projects.

180 - Circulars, Placards, Publicity Bulletins, Etc.

No circulars or Nature Notes were issued during the month.

A press release with regard to the buffalo round-up and wildlife show was distributed on January 5, and a special article was prepared for submission to the Casper Tribune-Herald for its annual Wyoming edition to be published in February.

The mimeographing of the annual report was completed during the month and some 100 copies made for distribution among the various parks, the ranger stations, the Washington and regional offices, and for collectors of Yellowstone material.

200 - Maintenance, Improvements and New Construction

210 - Road Maintenance

Snow removal at headquarters area and from Mammoth to Cooke was the only item during the month. Snow plows were sent through to Cooke five times during the month, and with the exception of three extremely windy days, the road was open to traffic.

220 - Improvements

Shops - In addition to the usual maintenance of equipment carried on, there were nine trucks and three graders overhauled. The new General fire truck was placed in service and some of the equipment from the old truck installed on the new one. The old Dodge fire truck was rebuilt into a hose wagon and being used as a secondary unit. Three new Chevrolet trucks were received during the month: Three

nine caribads o a s. o emplosda ch of commattee not poles and swer pipe, and three carbos s of tracks received in addition to other allocates of luber, pairt supplie, lime and pleater, plus of huber, pairt supplies and conservation ing 23,740 lies.

 $\frac{1}{2}$ -ton pickup trucks, two $1\frac{1}{2}$ -ton dump trucks and three $1\frac{1}{2}$ -ton freight trucks.

Electrical Department - In addition to the usual maintenance and repairs, electric water heaters were installed in several of the residences and a number of automatic clamp-on type thermostats with necessary detachable caps and plugs were installed in the residences to control the temperature of the hot water.

Carpenter Shop - Work in this department during the month consisted of the cutting out and crating of three secondary fire lookout stations and minor repairs.

Paint Shop - Work in this department consisted of laying linoleum at the Buffalo Rench, staining and painting sash and shutters for fire lookcuts, writing of several signs and other regular maintenance jobs.

Plumbing Department - The usual maintenance and operation was carried on during the month.

230 - New Construction

The ERA program continued work already under way in the sign shop, reconstruction of the basement in the barracks building, renovating basements in Buildings Nos. 1, 2 and 3, and the basement in the U. S. Commissioner's quarters. New projects started were betterment of the road to the employees campground, general renovation of the administration building, and the construction of a four-room dwelling in the employees' residence area.

Project 0.P. 266: Accomplishments on this project consisted of the completion of project plans for water and sewer for the West Thumb area and compilation of data for pipe bids for these jobs and for the Lake-Fishing Bridge water system.

A draftsman detailed by the Regional Office arrived about the middle of the month and has been at work on tracings of the topographic data necessary for the areas affected by the Public Works program.

Project 0.P. 267: Pre-fabrication of framing material for two fire lookout houses was completed during the month.

300 - Activities of Other Agencies in the Park

310 - Public Service Contractors

The general store at Mammoth was kept open throughout the month and provided excellent service for local residents.

Dr. George A. Windsor, the park medical officer who was taken seriously ill on December 7 and was removed to the Mayo Clinic in Rochester, Minnesota, returned to Livingston on January 21 and is apparently much improved, but it will require several weeks recuperation before he is in a position to continue his practice.

400 - Flora, Fauna and Natural Phenomena

410 - Ranger, Naturalist and Guide Service

Ranger activities during the month, in addition to the usual protection patrols throughout the park and general office work, included operations in connection with the buffalo roundup and reduction and the capturing and shipping of live elk.

420 - Museum Service

The duties in the Naturalist Department during the month consisted of the preparation of a preliminary report on Trumpeter Swan investigations, preparation of outlines of work for the investigation of Bighorn sheep, several lectures, and routine office work.

460 - Birds

Rangers conducted a waterfowl census from January 14 to 20 with a total of 1725 being recorded as compared with 1618 counted last year. Included in this count were 106 trumpeter swans; while in 1938 only 45 were seen.

470 - Animals

Buffalo - Trapping operations were started January first and 492 buffalo had been corraled by the end of the week. The animals were baited into the corrals with hay and this method proved to be faster, more economical and less hazardous than the former method of round up the animals on horseback.

On January 8th the general public was invited to visit the ranch and 647 people in 161 cars made the trip to observe the ranch operations.

Two young bulls and a heifer were shipped to the Denver (Colo.) Municipal Parks on January 13th. Slaughtering operations were started on January 16th and the reduction of 60 animals was accomplished within the week. Twenty-seven carcasses were allotted to the Crow Indian Reservation and were obtained by that agency by truck on the 29th. The remaining 33 carcasses will be shipped to four other Indian agencies during the early part of February.

It was found that 83 of the 492 buffalo in the corrals were calves, indicating a 17% increase during the year.

Elk - A heavy migration of elk to areas north of the park occurred during the month and most of the animals observed were in good condition.

Elk Reduction - Elk trapping operations were started on January 16th and the Mammoth, Gardiner and Game Ranch traps and by the close of the month the following shipments had been made.

Approval to ship 157 additional elk has been received and the deposit for trapping and loading has been made. It is anticipated that clearance for shipment of 50 additional animals will be obtained, which will make a total live elk reduction of 285.

Hunting Season - The elk hunting season in Park County, Montana was closed on the evening of January 19th with a total reduction of 2,966 according to figures received from the Montana Fish and Game Department. Originally it was reported that 3,066 had been taken. However, State Game Warden Weaver stated that 100 estimated as live shipments to be made had been included in this total.

Comparative hunting kills for the northern elk herd during the past five-year period are as follows:

1934-35	1935-36	1936-37	1937-38	1938-39
2567	2282	256	3586	2966

480 - Phenomena

The only notable change in the Mammoth Hot Springs area was at Blue Spring. On January 1 at 12:00 noon the spring was normal and flowing more than one cubic foot per second in the run-off channel. At 1:30 p.m. on the same day this spring became totally dry.

On January 2 the water was again issuing from the vent in small quantity but all of the lower basins were dry and there was a great display of blue-green algae in all of the dry basins. It was not until January 15 that Blue Spring regained its normal activity. Apparently as much water is flowing from the vent as ever but none of it is flowing down the channel over Jupiter Terrace as was formerly the case.

The entire summit of the formation at Blue Spring is being quite rapidly elevated and a large section of the new black top trail is now under water.

There have not been any noticeable changes in the activity of the other geysers during the month of January.

500 - Use of Park Facilities by the Public

510 - Increase or Decrease in Travel

First-entry cars during the present travel year have increased 59.6% over those for the same period last year. This increase is partly due to the fact that many hunters attracted to the areas north of the park included in their hunting trip a visit to the northern area of the park and partly to the large number of cars which made the trip to the Buffalo Ranch on January 8, when the public was invited to wit-

The total increase in park visitors for the travel year to date is 5%.

A summary of the travel for the month will be found at the back of this report.

530 - Visitors

Mrs. Helena Huntington Smith Pringle, prominent writer of magazine articles, arrived via the north gate on January 8 to collect material for the preparation of special articles for which assignments had been given her. She made trips to the Buffalo Ranch and to the Crevice ranger station, at which latter place she interviewed former Chief Ranger Jim McBride, one of the park's old timers. She left for Casper, Wyoming on the sixteenth.

Lieutenant Colonel W. M. Hoge, Corps of Engineers, United States Army, Omaha, arrived via the north gate on January 8, and departed out north same day.

Bishop Winfred A. Ziegler, Bishop of Wyoming, entered at the north gate on January 15 and conducted services in the park's chapel that evening.

600 - Protection

610 - Police Protection

No arrests were made during the month.

620 - Fire Protection

No forest or building fires occurred during January.

630 - Accidents

There were no automobile accidents during this period.

900 - Miscellaneous

Post Office - Receipts for the month of January showed a slight decrease over the corresponding month of 1938. This is due to the fact that there are no construction work going on at the present time in the park.

Church Services - Reverend Lewis D. Smith, Eipisopalian minister from Livingston, and Bishop Winfred A. Ziegler, Bishop of Wyoming conducted Episcopalian services in the chapel on the evening of January 15. Lutheran services were conducted in the canteen building by Reverend Webster D. Clement of Livingston on the thirtieth.

The of Livingston of the thirtieth.

Hospital and Medical - There were 30 home and 160 office calls reported for the month of January.

C.C.C. - During the first half of the month three of the appointive personnel were on annual leave.

For the first 23 days of the month the Company's strength of both camps YNP 1 and YNP 7 were still reduced by reason of the fact that a number of enrollees had availed themselves for approved Christmas leave. On January 23, 153 new enrollees, all Fifth Corps boys, were enrolled in the two Mæmmoth camps—85 in Camp 1 and 73 in Camp YNP7. Since the arrival of the new enrollegs the progress on all jobs has showed a decided increase. Work which was temporarily halted on the new car storage shed at Mammoth was resumed on January 25 and very good progress has been made since that time. Equipment in the Gardiner gravel pit is being put in shape for operation. The crushing of gravel for the campground will be started at once. Progress on the new Mammoth Campground Development has showed very good progress during the last half of January. A few men were still working on the incompleted cottage near the power house at Mammoth.

The regular monthly meeting of the Federal Employees: Union was held in the canteen on January 9. New officers for the ensuing year were elected as follows: T. Paul Wilcox, President; Curtis K. Skinner, Vice-President; Ladd Shorey, Secretary; Joe Way, Guardian. The Executive Committee elected consists of R. R. Robinson, Jr., Chairman; Fred Bussey, Boyd Larsen, David Condon and Charles Wright. Following the meeting several reels of motion pictures were shown for the entertainment of the members and visitors from the community.

A tournament of volley-ball was organized on January 12 consisting of six teams, and the tournament began on January 19 for two nights each week, Mondays and Thursdays. The tournament was to be completed on February 2.

At the regular weekly meeting of the Yellowstone Chess Club Roger Miller was elected President; Claude Anthony, Vice-President; Glenn Williams, Secretary-Treasurer. The club meets each Tuesday.

Otto Biastoch, meat market operator from Butte, Montana and brother of Plumber Foreman Herman Biastoch, died on January 17 as a result of injuries sustained when hit by a car as he was attempting to cross one of the Butte streets.

Messrs. Joffe, LaNoue and Barrows attended the annual meeting of the Montana Wildlife Federation in Butte, Montana from January 22 to 24.

The regular annual meeting of the Federal Credit Union was held in the canteen on January 21 and the business of the past year reviewed. Edmund B. Rogers, Phil Wohlbrandt and Francis R. Oberhansley were elected for two-year terms to fill existing vacancies on the Board of Directors. Officers elected by the Board of Directors were as follows: Francis R.

Yellowstone Park, Wyoming. January 3,1939.

MEMORANDUM:

The following report of activities under the supervision of Engineering for the month of December, 1938, is submitted:

No.170-Maps, Plans, and Surveys:

Combined winter weather conditions and a reduction in the Engineering personnel made it necessary to terminate practically all field work, other than supervision of the P.W.A. construction at Lake and West Thumb, about the middle of the month. Topographic data obtained for the Lake-Fishing Bridge and West Thumb areas was plotted in the office and plans for the West Thumb water and sewer systems about 70% completed.

Engineering on C.C.C. projects was confined to work on the Mammoth Campground and staking for the installation of sanitary service in the Mammoth cottage area.

No.200-Road Maintenance:

The General Foreman and a varying crew of two to four men were sufficient to handle all general maintenance, principally on the roads and streets in the vicinity of the headquarters area. The work consisted of the removal of small rock slides in the Gardiner Canyon, resetting of some snow fence and snow stakes on the Northeast Entrance road, and sanding the icy North Entrance road. The snow plow cleared the road to Cooke three times during the month.

NO.230-New Construction:

Work in connection with the E.R.A.program consisted of the continuation of the rustic sign work, with approximately 100 signs completed, reconstruction of the basement in the north end of the barracks building nearly completed and ready for the installation of the new heating plant, start of the renovation of basements of Buildings number 1,2, and 3, and completion of work on the Mammoth Terraxe Trail closed down during the summer season because of conflict with traffic.

Project 0.P.266. Actual construction work closed down on December 7 because of unfavorable weather conditions. At that time the 50,000 gallon water reservoir at West Thumbhad been completed and much of the necessary material for early spring work had been hauled to the area. Bids for electric generating plants for West Thumb, Lake, and Told Faithful were awarded during the month at a cost of approximately \$38,500. Designs for both the water and sewer systems at West Thumb were well under way.

Project 0.P.267:-Deep snow at the sites of the various proposed fire lookouts made it impossible to carry on any work in the field but work was well under way at the headquarters shops on the prefabrication of two of the proposed structures.

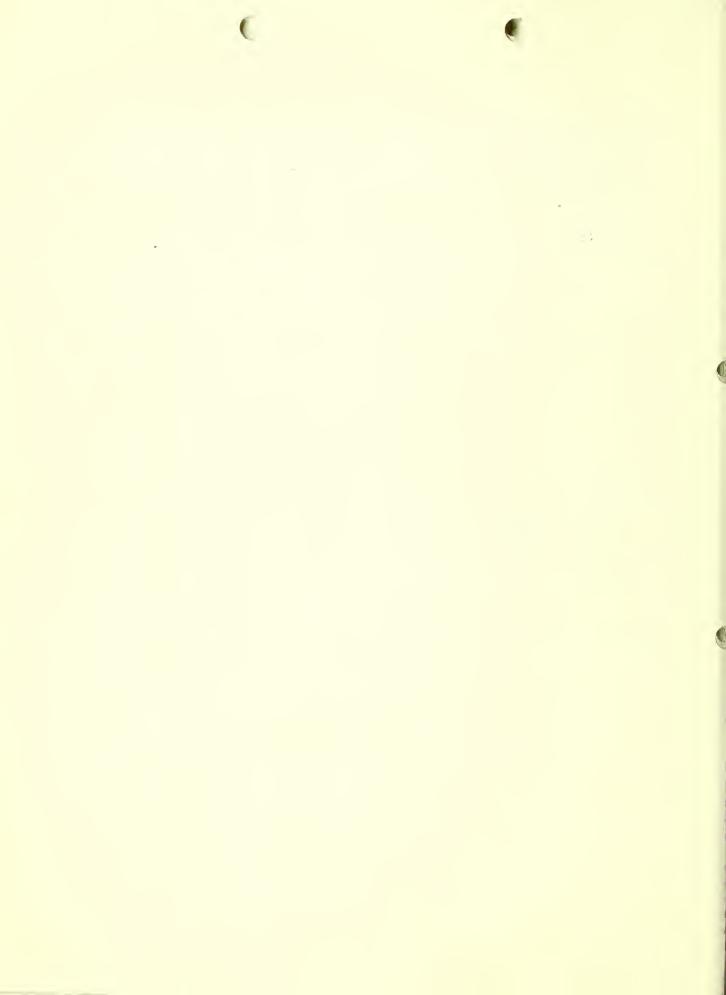

Contract Construction:

McNutt Brothers maintained a large construction crew on the East Entrance Approach Road until well into the month concentrating on work between Pahaska and the East Cate. A small crew is still at work on rock cuts on the line about six miles east of the Park houndary.

Note*-

No Roads and Trails projects active during the month.
