YELLOWSTONE NATIONAL PARK

YELLOWSTONE PARK, WYO.

ICE OF THE SUPERINTENDENT

December 3, 1937

The Director,  
National Park Service,  
Washington, D. C.

Dear Mr. Director:

The following is the report of activities in Yellowstone National Park during the month of November, 1937:

000 - General

The weather continued pleasant throughout most of the month with the extremely nice weather of October running along until the first light snowstorm of November 6. On the fifteenth of the month the Red Lodge-Cooke road definitely closed for the winter and the east, south and Gallatin roads became slippery and dangerous. The snow and cold weather of the sixteenth and seventeenth closed the east, south and Dunraven Pass roads on the seventeenth and information to this effect was sent out through the newspapers in order to discourage further travel. On the twentieth official advice was sent out through the Associated Press that all roads in the park were closed to travel due to snow conditions, excepting the sections from Gardiner to Mammoth. This was some two weeks earlier than in 1936 when it was possible to negotiate the entire loop road as late as December 2. On the twenty-ninth of the month it was necessary to open the roads from Mammoth to West Yellowstone with the snowplow in order to permit the moving to winter quarters of two families of rangers.

All operations in the interior of the park ceased on the eighteenth when Mr. Hamilton discontinued the repair work on his Old Faithful store and moved his crews out through Gardiner.

The contractor on the Isa Lake-West Thumb project abandoned his camp at De Lacy Creek on November 5. The Bureau of Public Roads crews, with the exception of the crew which will be retained to look after the Mammoth beautification job, departed on the eighth.

Members of the Mammoth Community and the many friends of the Robinson family were greatly shocked and grieved at the death on November 15 of Robert Leroy "Pud" Robinson, 13, son of Master Mechanic and Mrs. R. R. Robinson, Jr. Pud, after having run an errand to the Post Office for mail,

YELLOWSTONE PARK, WYO.

OFFICE OF THE SUPERINTENDENT

October 1, 1918

The Director,  
National Park Service,  
Washington, D. C.

Dear Sir:

The following is the report of the Yellowstone National Park  
for the year ending September 30, 1918:

Page 1

The National Park Service, Yellowstone National Park, Wyoming, has  
been organized to preserve and protect the natural resources of the  
United States. The Yellowstone National Park is one of the most  
valuable of these resources. It is a great natural wonder, and  
one of the most beautiful in the world. It is a place where  
nature is at its best, and where the people of the United States  
can find a place of peace and quiet. The National Park Service  
is proud to have the Yellowstone National Park as one of its  
most valuable assets. It is a place where the people of the  
United States can find a place of peace and quiet. The National  
Park Service is proud to have the Yellowstone National Park as  
one of its most valuable assets. It is a place where the people  
of the United States can find a place of peace and quiet. The  
National Park Service is proud to have the Yellowstone National  
Park as one of its most valuable assets. It is a place where  
the people of the United States can find a place of peace and  
quiet. The National Park Service is proud to have the  
Yellowstone National Park as one of its most valuable assets.

The National Park Service is proud to have the Yellowstone National  
Park as one of its most valuable assets. It is a place where  
the people of the United States can find a place of peace and  
quiet. The National Park Service is proud to have the  
Yellowstone National Park as one of its most valuable assets.

The National Park Service is proud to have the Yellowstone National  
Park as one of its most valuable assets. It is a place where  
the people of the United States can find a place of peace and  
quiet. The National Park Service is proud to have the  
Yellowstone National Park as one of its most valuable assets.

the people of the United States can find a place of peace and  
quiet. The National Park Service is proud to have the  
Yellowstone National Park as one of its most valuable assets.

about five PM returned to his home and proceeded upstairs. With his mother, her father, Mr. Leroy Hill, former Disbursing Officer of the park, who has been confined to bed on account of illness for a number of weeks, and a nurse downstairs, Pud evidently decided to play with some guns which were in a closet upstairs. About 5:15 PM Mrs. Robinson heard a thump as if something heavy had fallen on the floor and upon running upstairs found her son shot through the head with a .22 calibre rifle. Death was almost instantaneous and so far as could be determined the cause was purely accidental. Funeral services were held in the Episcopal church in Livingston, Bishop H. H. H. Fox officiating and burial was made at the Mountain View cemetery in Livingston. Six National Park Service men in uniform, Joe Joffe, Jack Emmert, William Wright, Al Elliott, Lloyd Seasholtz, and Hugh Ebert, acted as pall bearers with five Boy Scout friends of Pud's serving as honorary pall bearers. Pud was born in Livingston, Montana on March 25, 1924 and spent his entire life with his parents at their home at Mammoth. He attended the school at Mammoth, spent one year in junior high school in Livingston and was attending high school in Gardiner at the time of his death. Many beautiful floral offerings were received from friends and acquaintances while the casket was bedecked with a beautiful blanket of park evergreens made by the Mammoth ladies supervised by Mrs. T. Paul Wilcox, wife of the Park Commissioner, who for many years was engaged in the floral business in Cheyenne, Wyoming.

Practically all operations in the park during the month were confined to Mammoth due to the threatening storms and the closing of the roads. With the abandoning of the De Lacy Creek Camp by the contractor on the Isa Lake-West Thumb project all contractors had moved out but on the ninth of the month Peter Kiewit and Sons Company of Omaha, Nebraska, the successful bidder on the Mammoth beautification project, started to work. Taking advantage of the good weather and with a rather large crew considerable progress was made by the end of the month on this job.

The Yellowstone Park Company continued its building program at Mammoth throughout the month and has made satisfactory progress in the erection of its new cabins and recreation hall. Some interior work on the Hamilton Store at Old Faithful continued until the eighteenth. The finishing details on the new Mammoth Post Office were being taken care of and the job should be ready for acceptance by the middle of December although it is expected that the Post Office will not move in to its new quarters until the first of the year due to the handling of the heavy Christmas mail.

The critical condition of the park finances necessitated the Park Service operating with a minimum of personnel practically all of whom are members of the permanent organization. No operations were carried on in the interior of the park except regular duties of the permanent ranger force. There were four per diem employees separated during the month and only three per diem employees remained on duty at the end of the month.

## 020 - General Weather Conditions

A summary of the general weather conditions as recorded by the Official U. S. Weather Bureau Station at Mammoth will be found at the back of this report.

## 021 - In the Park

Weather conditions throughout the entire park have been comparable to those recorded at Mammoth although in the interior of the park lower temperatures have prevailed and storm periods have been more severe.

At the end of the month all of the roads through the park were closed by snow except the road from Mammoth to the Buffalo Ranch. The road from West Thumb to the south entrance was closed on the fifteenth and the road from Lake Junction to the east entrance, over Sylvan Pass, was closed on the seventeenth. The roads to Lake and Old Faithful and to West Yellowstone were not blocked by snow until the twenty-sixth.

Snowfall has been heaviest at Snake River station and in the Bechler River region, there being 18 to 24 inches of snow on the ground at these points at the end of the month. In many sections of the park the snow which fell before the twenty-third was crusted sufficiently to permit walking on it without using skis or snowshoes. This condition presents a particularly adverse situation for foraging game animals.

## 022 - Approaches to the Park

The approach to the south entrance was closed on November 16 and the approach to the northeast entrance was closed by snow prior to the first of the month. The approach to the east entrance was not blocked by snow until the twenty-ninth. Successful efforts have been made to keep the road from Bozeman to West Yellowstone, Montana open to motor vehicle travel and this section of highway has presented no difficulty to travelers this month. The road from the west entrance to Ashton, Idaho has also been kept open to traffic. The road from the north entrance to Livingston, Montana has been open to travel during the entire month and while it was icy and dangerous at times there was no difficulty encountered from snow conditions.

## 023 - In Nearby States

Weather conditions throughout the adjacent states have been reported to be about the same as those reported in the park. Some difficulty has been reported in keeping roads over high mountain passes open to travel but in most areas storm conditions have presented very little difficulty, insofar as travelling conditions are concerned.

A summary of the general situation is provided in the report of J. F. ...

During the period of the field work, the following observations were made...

At the end of the month, all of the data were analyzed and the results...

The results of the analysis of the data are shown in the following...

The purpose of the study was to determine the effect of ...

Several conditions throughout the study were noted and reported...

100 - Administration

110 - Status of Work

Superintendent Rogers spent practically the entire month in the park making only one trip outside to Livingston. Most of the work was kept current and due to the slackening of activities because of the crippled finances it was possible for a number of the employees to take some of their accrued annual leave. Park Naturalist Bauer was absent throughout the entire month due to illness.

Clerks Alice and Catharine Harris returned to duty from their leave period the first of November as did also Agent-Cashier Fred Bussey. Catharine Harris took additional leave from the 8th through the 18th. Agent-Cashier Bussey left on the 23d and was away from the park through the end of the month.

Chief Clerk Keith Neilson was absent the week of November 8 to 15, inclusive.

Ladd Shorey entered on duty on November 16 under his appointment as Clerk (Timekeeper) vice Richard J. Smith who was transferred to General Grant National Park and who left the Yellowstone on October 20.

Clerk Jerry Tonini returned from leave without pay on the 16th and departed on the 21st for the Boulder Dam Recreational Area to which location he had been transferred.

Assistant Superintendent Emmert departed on leave on the 21st to be gone until early December.

Telephone Operators Wytkauckas and Allan were absent a week each due to illness.

The Thirteenth Civil Service District announced an examination on November 12 for the positions of classified laborer and fireman-laborer for filling newly established positions in connection with the Mammoth Post Office, the closing date for the filing of applications for which was November 27.

A register resulting from the examination held on October 16 for substitute postal clerk was received by the Local Board on November 15.

120 - Inspections by:

121 - Superintendent

Superintendent Rogers spent most of the month at headquarters, making trips into the interior and outside the park as follows:

November 2 - With Messrs. Oberhansley, Emmert, and Jack Haynes made trip horseback from Buffalo Ranch over Specimen Ridge; returned Mammoth for night.

November 3 - Attended meeting at Gardiner with Messrs. Ihmert and Joffe in connection with the formation of a Gardiner Commercial Club.

November 4 - Inspected Isa Lake-West Thumb project with Resident Landscape Architect Hill; returned Mammoth for night.

November 5 - To Rescue Creek and return with Jack Haynes to determine exact location of the finding of Truman Everts who was lost in the park in 1870 for 37 days.

November 7 - To Lake and return.

November 11 - To Buffalo Ranch and return with Messrs. Ihmert, LaNoue and Sanford Hill.

November 18 - To Livingston to confer with the park medical officer, Dr. Windsor, and to attend funeral of Pud Robinson.

#### 122 - Special Field Representatives of the National Park Service

Adolph Murie, Wildlife Technician, CCC, Omaha, returned to the park November 2, remaining until the 26th when he departed via the north gate for the Jackson Hole.

Regional Landscape Architect George Nason, CCC, Omaha, arrived in the park via the north gate on November 12 with Regional Geologist Carroll Wegemann, departing via the east gate on the 13th.

Resident Landscape Architect Sanford Hill, CCC, Omaha, who has been in the park since May 6, departed via the north gate on November 21 for Omaha.

Associate Architect W. H. Gebhardt, who has been in the park since April 29, 1936 as inspector on the Utility Building, departed via the north gate on November 22 for Omaha. Mr. Gebhardt was also inspector on the apartment house building.

#### 124 - Other Interior Department Officers

Earl Bailey, U. S. Geological Service, Boise, Idaho, who arrived in the park on October 7 to aid in the construction of three water gages, departed via the west gate on November 29.

#### 125 - Other Governmental Officers

John D. Organ, Special Agent, Bureau of Investigation, Department of the Interior, Washington, D. C., arrived via the north gate November 5.

Martin A. Cannon, Special Agent, Bureau of Investigation, Department of the Interior, Washington, D. C., arrived via the north gate November 9.

#### 140 - Labor Situation

number of men were returned to the reemployment lists. James Crick, the contractor on the Isa Lake-West Thumb project had been operating with a crew of about 200. Some men were retained on the rolls by the contractor on the post office project and approximately 100 men were employed in connection with the Yellowstone Park Company building project at Mammoth.

Peter Kiewit and Sons Co. offered employment to a number of men when work was started on the Mammoth beautification project on the 5th.

Little work was offered by the National Park Service as its forces were operating with practically all permanent employees.

#### 150 - Equipment and Supplies

There were one carload each of gasoline and horses and harness, and three carloads of coal received in addition to other shipments of solvent, office supplies, lubricating oil, sheet iron, window glass, nails and linseed oil weighing 21,673 lbs.

#### 160 - Status of Alienated Lands

There was no change in the status of alienated lands during the month.

#### 170 - Plans, Maps and Surveys

All work under this heading was in connection with the development of the proposed Mammoth campground. Alignment of all roads in the area was staked and profiled and cross sections taken and plotted. The layout in the field was inspected by Landscape Architect Hill prior to leaving for the Regional Office and numerous changes requested by him in order to better fit the development to existing conditions. E.C.W. Engineer Wohlbrandt reported from the Regional Office on the last day of the month and will assist in the supervision of the campground work.

#### 180 - Circulars, Placards, Publicity Bulletins, Etc.

Circulars Nos. 33, 34 and 35 were issued during the month and copies are attached.

No Nature Notes were released during the month. Stories regarding the death of Pud Robinson and the closing of the park roads were released through the Livingston Enterprise and the Associated Press.

#### 200 - Maintenance, Improvements and New Construction

##### 210 - Road Maintenance

Practically no road maintenance was carried on during the month. A few sections of snow fence were installed in the Mammoth area several minor slides in the Gardiner River canyon were removed.

number of men were retained in the employment office. These men, the contractor on the last day of work and the contractor with a crew of about 300. Some men were retained in the office of the contractor on the post office project and approximately 100 men were assigned in connection with the following work to carry out the project at present.

Later Lewis and Clark Co. offered employment to a number of men who were retained on the project for the project on the site.

Little work was offered by the National Park Service as the forests were operating with practically all permanent employees.

170 - Equipment and Supplies

There were one carload each of gasoline and kerosene and kerosene, and three carloads of coal received in addition to other supplies of cement, office supplies, advertising oil, steel iron, window glass, nails and finished oil weighing 21,875 lbs.

180 - Status of Allocated Funds

There was no change in the status of allocated funds during the month.

190 - Plans and Reports

All work under this heading was in connection with the development of the proposed National Park. A statement of all work in the month was taken and profiled and some sections taken and profiled. The project in the field was inspected by Lewis and Clark Co. in order to better fit the development to certain conditions. A. G. Lewis and Clark Co. reported from the regional office on the last day of the month and will assist in the completion of the development work.

180 - National Park, National Park, National Park

Officers Nos. 22, 24 and 25 were issued during the month and copies are attached.

No letters were released during the month. Letters were released through the Livingston letter and the National Park.

200 - Maintenance, Improvement and New Construction

210 - Road Maintenance

Practically no road maintenance was carried on during the month. A few sections of new fences were installed in the National Park and minor repairs in the National Park were made.

## 220 - Improvements

Shops - The usual maintenance of equipment in operation was carried forward. There were nine trucks overhauled during the month.

Electrical Department - In addition to the usual maintenance and repair work during the month, approximately 1100 feet of #6 stranded, 2500 volt Parkway cable was put into service on November 30th in back of the new hotel to replace the old overhead circuit, and several single-phase transformers were connected. All park telephone circuits with the exceptions of lines 9, 10 and 2 are working as ground return circuits for the winter season. All four short-wave patrol car radios were returned to the factory for improvements at the factory's expense and request.

Carpenter Shop - In addition to the usual repairs and small jobs the work was finished in washing and putting up storm windows.

Plumbing Department - The usual maintenance and operation was carried on during the month.

Paint Shop - Jobs repairing broken storm sash, laying linoleum, painting and patching tile were carried on during the month.

## 230 - New Construction

No force account construction projects were active during the month.

### Contract Construction

New Post Office Building - Grading and landscaping of the area around the building was completed and work of interior finishing was continued. Completion of the entire contract is estimated by the close of the next month.

Yellowstone Park Company Improvements - Work for the most of the month was confined to interior finish on both the Recreation building and the cabins already framed.

Major Road Construction - All road work in the interior of the park was closed down early in the month and the only work to be considered active has been the construction of the Mammoth Esplanade and connecting road. Accomplishments consist of the salvage of sod and top soil on the area covered by the Esplanade, obliteration of a portion of the roads to be abandoned, and installation of about 50 per cent of the storm sewer. Considerable yardage has also been moved on the connecting road.

## 300 - Activities of Other Agencies in the Park

### 310 - Public Service Contractors

With the closing of the C. A. Hamilton Store at Old Faithful on November 18 the last of the businesses in the interior of the park ceased

There - The usual arrangements of working in the factory were carried forward. There were also some improvements in the factory.

Electrical Department - In addition to the usual improvements in the factory, the electrical department has been carrying out a programme of work with a view to increasing the efficiency of the plant. This work has been carried out in the form of a series of small improvements, the most important of which are the following: (1) The installation of a new set of transformers, (2) the installation of a new set of cables, (3) the installation of a new set of switches, (4) the installation of a new set of fuses, (5) the installation of a new set of meters, (6) the installation of a new set of lamps, (7) the installation of a new set of fans, (8) the installation of a new set of fans, (9) the installation of a new set of fans, (10) the installation of a new set of fans.

General Shop - In addition to the usual repairs and maintenance work, the general shop has been carrying out a programme of work with a view to increasing the efficiency of the plant. This work has been carried out in the form of a series of small improvements, the most important of which are the following: (1) The installation of a new set of tools, (2) the installation of a new set of tools, (3) the installation of a new set of tools, (4) the installation of a new set of tools, (5) the installation of a new set of tools, (6) the installation of a new set of tools, (7) the installation of a new set of tools, (8) the installation of a new set of tools, (9) the installation of a new set of tools, (10) the installation of a new set of tools.

The Shop - The usual maintenance of the shop has been carried out during the month.

Paint Shop - The usual maintenance of the paint shop has been carried out during the month.

200 - New Construction

To force account construction projects were carried out during the month.

General Construction

New Shop - The usual maintenance of the new shop has been carried out during the month. The work has been carried out in the form of a series of small improvements, the most important of which are the following: (1) The installation of a new set of tools, (2) the installation of a new set of tools, (3) the installation of a new set of tools, (4) the installation of a new set of tools, (5) the installation of a new set of tools, (6) the installation of a new set of tools, (7) the installation of a new set of tools, (8) the installation of a new set of tools, (9) the installation of a new set of tools, (10) the installation of a new set of tools.

Workshop - The usual maintenance of the workshop has been carried out during the month. The work has been carried out in the form of a series of small improvements, the most important of which are the following: (1) The installation of a new set of tools, (2) the installation of a new set of tools, (3) the installation of a new set of tools, (4) the installation of a new set of tools, (5) the installation of a new set of tools, (6) the installation of a new set of tools, (7) the installation of a new set of tools, (8) the installation of a new set of tools, (9) the installation of a new set of tools, (10) the installation of a new set of tools.

Workshop - The usual maintenance of the workshop has been carried out during the month. The work has been carried out in the form of a series of small improvements, the most important of which are the following: (1) The installation of a new set of tools, (2) the installation of a new set of tools, (3) the installation of a new set of tools, (4) the installation of a new set of tools, (5) the installation of a new set of tools, (6) the installation of a new set of tools, (7) the installation of a new set of tools, (8) the installation of a new set of tools, (9) the installation of a new set of tools, (10) the installation of a new set of tools.

200 - Activities of other agencies in the factory

210 - Public Service Contractors

With the closing of the U.S. War Relocation Authority in the month of the past month, the usual maintenance of the factory has been carried out during the month.

operations. Mr. Hamilton left via the north gate on the 18th.

The general store at Mammoth remained open throughout the month to take care of the few late visitors and the Mammoth residents and employees.

Mr. J. E. Haynes, the authorized park photographer, departed from the park via the north gate on the 6th.

Mr. W. M. Nichols, President, Yellowstone Park Company, paid a one day's visit to the park on the 26th, having just returned from Washington.

The Yellowstone Park Company closed its Gardiner garage on the 30th, activities to be resumed again in the spring.

On November 13 the price of gasoline was reduced  $1\frac{1}{2}$  cents per gallon to conform with a reduction in price put into effect in the State of Montana. This made the price of regular gasoline at Mammoth and Old Faithful  $24\frac{1}{2}$  cents per gallon and for ethyl gasoline  $26\frac{1}{2}$  cents per gallon, with a price of  $25\frac{1}{2}$  cents per gallon for regular and  $27\frac{1}{2}$  cents per gallon for ethyl at all other points in the park. On November 24 a second decrease of the month in the price of gasoline became effective with a  $1/2$  cent reduction, making the price at Mammoth and Old Faithful 24 cents for regular and 26 cents for ethyl and at other points in the park 25 cents for regular and 27 cents for ethyl.

#### 400 - Flora, Fauna and Natural Phenomena

##### 410 - Ranger, Naturalist and Guide Service

The work of the ranger department during this month has consisted largely of preparing patrol cabins for winter use, patrolling the park boundaries where adjacent areas outside of the park are open to hunting, forest insect surveys, and forest insect control work. Some time has been devoted to trail surveys, brush disposal on cutting areas and right-of-way clearing, preparation of plans for winter studies of game and game range conditions, checking traffic at entrance stations, and various other duties.

##### 420 - Museum Service

Several lectures were given during the month to the Mammoth school children. The work of the naturalist department consisted of several field trips, making out of seasonal reports of ranger-naturalist for the 1937 season, taking care of sales publication matters, filling requests for geological specimens and securing pictures.

##### 460 - Birds

There have been no conditions observed which have affected bird life in the park in other than a normal number. Migratory waterfowl have been observed in large numbers on all of the open lakes and streams in the park. On several occasions as many as 100 trumpeter and whistling swan have been observed and counted on Yellowstone Lake.

#### 470 - Animals

All game animals observed have been reported to be in good condition and with plenty of forage available at the present time. In most of the winter range area it has been observed that elk, deer and antelope have not yet migrated down to the lower elevations except in limited numbers. Weather conditions have not been particularly severe although in many sections there are five to eleven inches of heavily crusted snow which presents a decidedly adverse grazing condition.

The hunting season in all areas adjacent to the park line except along the north line from Gardiner to Cooke, Montana and in the Bechler River district closed on November 15. The following tabulation indicates the number of game animals reported taken to date by hunters:

<u>Location</u>	<u>Bear</u>	<u>Deer</u>	<u>Elk</u>	<u>Moose</u>	<u>Bighorns</u>
Cooke	3	2	9		
Gardiner	2	24	37		
Hellroaring			14		
Slough Creek	4	1	29		
Bechler River	1	6	46		
Gallatin	3	42	68		
Snake River				5	
East Entrance	25	75	129	7	6
Thorofare	6	6	17		
West Yellowstone			70		
Total -	<u>44</u>	<u>155</u>	<u>419</u>	<u>12</u>	<u>6</u>

Elk hunting in the Bechler River district was exceptionally good this season from the hunters' standpoint. With about fourteen inches of heavily crusted snow over the entire area inside of the park, the elk forced to migrate to lower elevations in areas that were open to hunting in search of food. The open season in this district is from November 15 to December 1, inclusive.

#### 480 - Phenomena

##### Mammoth Hot Springs Area

Angel Spring - continued active from four major vents during the majority of the month, but sometime between the 19th and the 30th of the month vandals rolled a large chunk of travertine down the hill and completely sealed off the vent to the north from which the major flow had been issuing. When discovered on November 30, immediate steps were made to remove this piece of travertine and it is hoped that this vent will again become active.

Baby Spring - has a greater flow of water at the end of the month than in past months, with water flowing from a number of new vents.

Photo by William E. Kearns

Snow-mantled trees in Norris Geyser Basin as Winter begins his long reign.  
(Enlargement from miniature negative)

Blue Spring - has evidenced a slight increase over October.

Cleopatra Spring - is flowing a very sizable stream of water over a greater area of terrace than at any time in the past four years and is certainly the most magnificently colored terrace at Mammoth Hot Springs. The flow has spread far to the northwest from the major vent and a small amount of water is being discharged to the south from a small vent.

Cupid Spring - has been active the greater part of the month and is about average at the end of November.

Hymen Spring - is still inactive.

Jupiter Terrace - although far from average, has increased somewhat over October.

Main Spring - continues about as active as in October.

Minerva Spring - has increased somewhat over October with water flowing to the east over the face of the terrace and to the southeast into a large crack near the top. It is interesting to note on this terrace that the water cools quickly and a sheet of ice covers the face of the terrace.

Mound Spring - continues to be one of the outstanding springs on the terraces, both from the point of coloration by algae and in the amount of water being discharged.

Naiad and Opal Springs - continue about as usual.

Orange Spring Mound - has maintained the strong flow of water as reported at the end of October, with water spreading over areas to the west, south, and east.

Summit Basin Spring - has resumed activity on a very limited basis with a small trickle of water issuing from the old vent until the basin to the north is nearly two-thirds filled with water.

The spring to the east of Summit Basin toward Mound has maintained a strong flow throughout the month and here it is interesting to note that there has been a settling of quite an area with considerable caving in of the hole into which the water is draining.

New Spring - as reported in October, has shifted activity to the east of the terrace, separating it from Cupid Spring, and is now very actively discharging water from three large vents and many minor vents. This activity has completely covered the trail for an area of a hundred square feet and the adjacent areas continue to settle.

#### 500 - Use of Park Facilities by the Public

##### 510 - Increase of Decrease in Travel

Travel for this month shows a considerable decrease over that recorded

Blue Spring - has evidenced a slight increase over October.

Geococcyx Spring - is located a very short distance from the water tower. A number of terraces are visible at the top of the hill. The water is very clear and the flow is very rapid. The water is very hot and the flow is very rapid. The water is very clear and the flow is very rapid.

Gold Spring - has been active for several days at the end of October.

Wheat Spring - is still inactive.

Jupiter Terrace - although the flow is very slow, the terrace is still active over October.

Main Spring - continues about as active as in October.

White Spring - has increased somewhat over October with water flowing to the top of the terrace and to the water tower. It is interesting to note on this terrace that the water cools quickly and a sheet of ice covers the top of the terrace.

Wheat Spring - continues to be one of the outstanding springs on the terrace, both from the point of coloration by algae and in the amount of water being discharged.

Wheat and Gold Springs - continue about as usual.

Orange Spring - has continued the strong flow of water reported at the end of October, with water spreading over much of the terrace.

Wheat Spring - has resumed activity on a very high level and a well trickle of water is being discharged from the terrace to the north is nearly two-thirds filled with water.

The spring to the east of Wheat Spring toward the water tower has continued a strong flow throughout the month and here it is interesting to note that there has been a settling of water in the terrace which is being carried into the hole into which the water is draining.

Wheat Spring - as reported in October, has started activity to the east of the terrace, separating it from Gold Spring, and is now very active. The water is very hot and the flow is very rapid. The water is very clear and the flow is very rapid.

500 - Use of Park Facilities by the Public

510 - Increase of Interest in Travel

Travel for this month shows a considerable increase over last recorded

during November last year. This is accounted for by the fact that weather conditions were much more severe and that the roads through the park were closed by snow about two weeks earlier this year than last. The total travel to date, which includes the months of October and November, shows a decrease of 40.4 per cent in motor vehicles and 40.8 per cent in park visitors as compared with last year.

## 600 - Protection

### 610 - Police Protection

One arrest was made during the month when a CCC enrollee, Alvin Hedrick, was arrested for drunkenness and disorderly conduct. Hedrick was sentenced to serve thirty days in the Yellowstone Park jail.

Five other violations of regulations were reported but in each case there was insufficient evidence to trace the persons responsible for the violation. Two elk were killed inside of the park in the Gallatin district but the violation was not discovered until after the carcasses had been removed and all evidence destroyed. Two elk were killed inside of the park boundary in the Bechler River district. In one instance the hunters reported the kill, stating that they had cross the park line without seeing it and an investigation revealed that the killing was purely accidental. In the other instance the elk was killed well within the park boundary and the carcass removed and no information could be obtained as to the identity of the violators. The fifth case occurred near Crevice Ranger Station where a deer had been killed just inside of the north boundary. Evidence of the kill was not discovered until several days after the carcass had been removed and it was not possible to determine whether or not the animal had actually been shot inside of the park or had been wounded and chased to the point where it was finally killed and dressed.

### 630 - Accidents

Four automobile accidents were reported this month, none of which involved more than minor personal injuries, but one of which resulted in the loss of 2800 gallons of gasoline which burned and completely demolished a tank truck which was wrecked when it ran off of the road.

## 900 - Miscellaneous

Post Office - Receipts for the month of November showed an increase over the preceding month with a decrease over the corresponding month of last year.

The furniture for the new post office building at Yellowstone Park, Wyoming has been received and practically all stored ready for the occupancy of the new building.

Church Services - Church services were held on Monday evening of November 29 by Rev. Webster Clement of the Livingston Lutheran Church. Sunday School services were commenced the latter part of November to be continued all winter.

during November last year. This is reported for the fact that conditions were such that several and that the same thing was done by snow about two weeks earlier this year than last. The fact that travel to the north includes the matter of weather and snow, but a decrease of 40% per cent in snow depth and 50% per cent in snow water content as compared with last year.

600 - Investigation

610 - Police Station

The report was made during the week of 1941 and 1942. HEDRICK, was arrested for investigation and identification. HEDRICK was sentenced to serve forty days in the following manner:

Five other violations of regulations were reported but in each case there was insufficient evidence to force the powers responsible for the violation. Two elk were killed inside of the park in the vicinity of the visitor's center. The violation was not discovered until after the entrance had been removed and all animals destroyed. Two elk were killed inside of the park boundary in the Baldy River District. In one instance the hunters reported the kill, stating that they had crossed the park line without realizing it and an investigation revealed that the killing was purely accidental. In the other instance the elk was killed well within the park boundary and the carcass removed and reburied. It is reported that the vicinity of the visitor's center was searched near the visitor's center where a bear had been killed just inside of the park boundary. Witnesses of the kill were not discovered until several days after the carcass had been removed and it was not possible to determine if bear or not the animal had actually been shot inside of the park or had been passing and coming to the point where it was finally killed and disposed.

620 - Investigation

Four separate investigations were reported this month, none of which involved more than minor personal injuries, but one of which resulted in the loss of \$200 dollars of machine shop property and completely demolished a truck which was wrecked when it ran off of the road.

630 - Local News

Local Police - Receipts for the month of November showed an increase over last year with a decrease over the corresponding month of last year.

The Thursday for the new post office building at Yellowstone Park, Wyoming has been received and practically all stored ready for the opening of the new building.

Chamber Review - Chamber reviews were held on Monday evening of November 22 by Rev. Webster Grant of the Livingston Lutheran Church. Sunday School activities were announced for the latter part of November to be continued in winter.

Hospital and Medical - Our park physician reports 27 home and 117 office calls for the month of November.

CCC - During the month all CCC jobs progressed rapidly at both of the CCC camps, YNP #1 and YNP #7. We expect to complete and accomplish much worthwhile work during this enrollment period with the two CCC camps now located at Mammoth.

It is expected that Camp YNP #7 will be constructed by December 15 and that Company 544 will move into the new camp from their temporary quarters in the barracks building at that time. From 50 to 60 enrollees have been used from this company daily on construction of the new camp and the work agency has given every cooperation in rushing this camp to completion.

Roland G. Pray, Senior Foreman Landscape Architect, reported for duty at park headquarters on November 13. He was entered on duty effective at 10:15 a.m. on that date. Mr. Pray was transferred from Camp BR-9, Guernsey, Wyoming to Yellowstone Park and we find him to be an excellent man with outstanding qualifications and he will be a big asset to our organization.

During November five CCC enrollees from Camp YNP #7 received outside employment. One of these enrollees received a job as Plumber's Helper due to "project training" and experience he gained while in the CCC.

- - - - -

The regular monthly meeting of the Local Federal Employees' Union No. 465 was held in the recreation room of the Canteen building on November 1.

The regular winter activities in the Canteen building started on November 1. The program of activities during the winter will consist of volley ball, roller skating, badminton, shuffle board, pool, ping-pong and dancing. Laborer Robert Marquardt is looking after the care of the canteen and supervising the various activities.

As usual another highly successful campaign for the Red Cross was carried on during the month and the proceeds received amounted to \$191.50. This amount was turned over on November 22 to the Park County Chapter of the Red Cross in Livingston, Montana.

Thanksgiving Day saw a marriage ceremony performed in the Mammoth Chapel when Carl A. Biever of Livingston, Montana and Lillian Murray of Sheldon, Iowa were united in matrimony. Mr. Biever was employed for several years on the park engineering force and Miss Murray for a number of years has been in charge of one of the C. A. Hamilton Stores in the Park. Rev. Reubon Dutton of the Methodist Church in Livingston performed the ceremony.

Handwritten title and header information, including a date and possibly a page number.

Seventh main paragraph of text, continuing the handwritten notes.

Eighth main paragraph of text, continuing the handwritten notes.

On November 26 Rufus Cramer of the park and Louise Nye of Livingston were married at the Congregational Church in Livingston. Mr. Cramer is employed as a mechanic with the National Park Service in the park and Miss Nye has been employed at various Government messes for a number of seasons. The newlyweds are residing in the jail building, which building houses one set of quarters.

Yours very truly,

Edmund B. Rogers,  
Superintendent.

On November 15, 1950, the Board of Directors of the International Chamber of Commerce (ICC) met in London to discuss the proposed amendments to the ICC Statute. The amendments were proposed by the United States and the United Kingdom. The amendments were designed to strengthen the ICC's authority and to provide for a more effective system of dispute resolution. The amendments were adopted by a vote of 12 to 1. The amendments were signed by the Board of Directors on November 15, 1950. The amendments were published in the ICC Statute on November 15, 1950.

Very truly yours,

Secretary General  
International Chamber of Commerce

November 29, 1937.

CIRCULAR NO. 35:

Office Order No. 343, dated November 8, 1937, has just been received and lists the furniture and equipment which the National Park Service is allowed to furnish the various types of quarters maintained by the Government in Yellowstone National Park. A copy of this Office Order has been posted on the Storehouse Bulletin Board in order that any employee interested may familiarize himself with its contents. In some instances employees of Yellowstone National Park have items of equipment or furniture charged out to their quarters which is in excess of that specified in Office Order No. 343. In order to comply with the established regulations in this regard all such items must be returned to the storehouse for credit. Employees having such excess items charged out to their quarters will be allowed to retain them only until their annual equipment inventory is completed by the storehouse. Employees who are using such furnishings, including blankets, sheets, pillow cases, and equipment not needed in their official duties, should make necessary arrangements to replace them with personally owned items in the immediate future.

The storekeeper will be glad to check over any employees list of quarters equipment and advise them which items are to be returned.

Edmund B. Rogers,  
Superintendent.

MONTHLY METEOROLOGICAL SUMMARY

STATION YELLOWSTONE PARK, WYOMING

MONTH NOVEMBER 1937.

SUMMARY

BAROMETRIC PRESSURE

Monthly mean 30.18

Highest 30.59, date 1

Lowest 29.65, date 11

TEMPERATURE

Highest 53, date 10

Lowest 7, date 17

Extremes this month since 1904; highest 62, lowest -20

Average daily departure +1.8

Average daily departure since January 1, -0.2

Total degree days 1020

PRECIPITATION

Greatest amount in 24 hours .14, date 24

Departure from normal this month -.27

Cumulated departure since January 1 +0.41

Snowfall, greatest 24-hour amount 2.6, date 24

Snow on ground on 15th 0, and at end of month 2.1

WIND

Prevailing direction SW, average hourly velocity 7.7

Highest wind velocity this month since 1904 35 miles from SW, on 8, in 1931

WEATHER

Number of days clear 5, partly cloudy 5, cloudy 20, with measurable precipitation (0.01 inch, or more) 13

MISCELLANEOUS PHENOMENA—DATES OF

Hail None

Halos, solar 21; halos, lunar 15, 23

Fog, light 21; fog, dense 0

Frost, light - - -; heavy - - -; killing† - - -

Sleet 0

Thunderstorms 0

Duststorms none

†Frosts not recorded in autumn after first "killing", except in Florida and along the immediate coast of the Gulf of Mexico.
