IMPORTANT

This file constitutes a part of the official records of the National Park Service and should not be separated or papers withdrawn without express authority of the official in charge. All Files should be returned promptly to the File Room. Officials and employees will be held responsible for failure to observe these rules, which are necessary to protect the integrity of the official records.

STEPHEN T. MATHER,
Director.

DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE
YELLOWSTONE NATIONAL PARK
YELLOWSTONE PARK, WYO.

E OF THE SUPERINTENDENT

July 9, 1929

The Director,
National Park Service,
Washington, D. C.

Dear Mr. Director:

The following is my report on the activities of the National Park Service in Yellowstone National Park during the month of June, 1929.

000 - General

The month of June saw the 57th opening of the park. The ceremonies marking the opening were held this year at Gallatin Gateway, Montana, the entrance of the Chicago, Milwaukee, St. Paul and Pacific Railway into the park. The program was arranged by the railroad and a large crowd was in attendance. The weather was ideal. The ceremonies were held early in the morning, in order that the first park visitors via this railroad could reach their destination on time. The Terry, Montana, Cowboy Band furnished the music and about 50 Indians from the Flathead reservation in Montana participated. The address of welcome was assigned to me, and Director Albright, H. A. Scandrett, President of the Milwaukee Railroad, and Major Evan Kelley, District Forester, gave short talks. Movie men representing Pathe, Metro-Goldwyn, Paramount, International and the Fox Movietone were in attendance and following the ceremonies all of them with the exception of the Fox Movietone man, proceeded into the park. The Milwaukee Railroad also arranged to bring in the Indians to give them a view of the geyser basins. On June 21 the party of Indians and the movie men went to the new geyser near Twin Buttes and some excellent views were obtained. The geyser played shortly after 12 o'clock.

100 - Administration

110 - Status of Work

I returned to the park on the first day of June with my family and moved into the quarters vacated by former Supt. Albright. The remainder of the month was spent in the park, with the exception of side trips to Gallatin Gateway, Jackson Hole, Cody and Livingston.

DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE
YELLOWSTONE NATIONAL PARK
YELLOWSTONE PARK, WYO.

BY THE SUPERINTENDENT

July 2, 1907

The Director,
National Park Service,
Washington, D. C.

Dear Sir:

The following is a report on the activities of the National Park
Service in Yellowstone National Park during the month of June, 1907.

100 - General

The month of June has been very busy for the National Park
Service in Yellowstone National Park. The weather was
generally favorable, and the number of visitors was
large. The following is a list of the principal
events of the month:

- 1. The opening of the season for the
National Park Service in Yellowstone National Park.
2. The opening of the season for the
National Park Service in Yellowstone National Park.
3. The opening of the season for the
National Park Service in Yellowstone National Park.
4. The opening of the season for the
National Park Service in Yellowstone National Park.
5. The opening of the season for the
National Park Service in Yellowstone National Park.
6. The opening of the season for the
National Park Service in Yellowstone National Park.
7. The opening of the season for the
National Park Service in Yellowstone National Park.
8. The opening of the season for the
National Park Service in Yellowstone National Park.
9. The opening of the season for the
National Park Service in Yellowstone National Park.
10. The opening of the season for the
National Park Service in Yellowstone National Park.

101 - Yellowstone

110 - Report on June

I enclose to the park on the first day of June a list of the
principal events of the month. The number of
visitors was large, and the weather was generally
favorable. The following is a list of the principal
events of the month:

Director Albright was in the park during the month of June until the 26th, when he left via West Yellowstone enroute to San Francisco, where he was to meet the Secretary of the Interior. He will be away from the Yellowstone until July 15, when he arrives at Cody to meet the Yellowstone Park Boundary Commission. Mr. Albright's presence in the park has increased considerably our office work.

On June 4 Miss Magdalen Hyman reported for duty in the accounting office, having been transferred from Washington. On June 5 L. Russell Hickey was added to the clerical force. Miss Esther Martin, timekeeper, was away most of the month, having been called back to her home in Washington.

Sam T. Woodring, former Chief Ranger of the Yellowstone, who was appointed Superintendent of the new Grand Teton National Park on May 15, departed for his new headquarters at the Stewart Ranger Station on June 17.

120 - Park Inspections By:

121 - Superintendent

On June 1, in company with Director Albright, I inspected the Buffalo Ranch in the northeastern part of the park. The following day I went to Old Faithful, returning to Mammoth for the night. On June 10, in company with Director Albright and the President of the Burlington Railroad, Mr. Williamson, we made a trip on Lake Yellowstone, going as far as Peale Island. We returned to headquarters the following day. On June 12, in company with Assistant Superintendent Daum, we went to Sylvan Pass and returned to Mammoth for the night. On the next day I accompanied the ranger naturalists as far as Old Faithful, returning to Mammoth for the night. On June 14, in company with Director Albright, I went to the Canyon to meet the ranger naturalists and returned with the party via Tower Falls. On June 17, Director Albright and I made a trip to Livingston, Montana, in order to meet citizens of the town and discuss park problems, particularly the proposed Gardiner bridge. We returned to Mammoth that night. On June 19, Director Albright, Assistant Superintendent Daum and I proceeded to Gallatin Gateway to be on hand for the official opening the following morning. Chief Ranger Baggley joined us at Gallatin and the following day we proceeded to Old Faithful, spending the night there. From Old Faithful we went to the Jackson Hole, where we spent the night of the 21st. On the 22nd we returned to the park and spent the night at the lake and the following morning proceeded to Cody, where we spent the night. We returned to headquarters from Cody on the night of the 24th. On the 26th I accompanied Director Albright to West Yellowstone, where he caught the train for California. The following day, in company with Assistant Superintendent Daum, Sanitary Engineer Homson and Assistant Landscape Architect McCarter, I went to Old Faithful and the lake. The following day we went to Sylvan Pass Station and Canyon, returning to Mammoth the following night. On June 30 I made a trip to the Canyon returning to headquarters for the night.

Director's report on the progress of the work in the year 1911. The report is divided into two parts: the first part deals with the work done during the year, and the second part deals with the work planned for the next year. The report is a valuable document which gives a clear and concise account of the work done during the year.

The work done during the year has been very satisfactory. The progress made in the various departments has been considerable. The work planned for the next year is also very ambitious and will require a great deal of effort and resources.

The following are the main items of work planned for the next year: 1. To complete the work on the various projects which are now in progress. 2. To start work on the new projects which have been approved. 3. To improve the methods of working in the various departments.

1911 - Yearly Report

1912 - Yearly Report

The following are the main items of work done during the year: 1. To complete the work on the various projects which are now in progress. 2. To start work on the new projects which have been approved. 3. To improve the methods of working in the various departments. The work done during the year has been very satisfactory. The progress made in the various departments has been considerable. The work planned for the next year is also very ambitious and will require a great deal of effort and resources.

123 - National Park Service Officers

Director Horace M. Albright was in the park until June 26, when he left for California to meet the Secretary of the Interior.

Mr. Kenneth C. McCarter, Assistant to Chief Landscape Architect Vint was in the park during the entire month.

Mr. T. C. Vint, Chief Landscape Architect, arrived in the park on the morning of June 30 and will spend several days here.

125 - Other Governmental Officers

✓ Dr. W. C. Alden, of the Geological Survey, came in at West Yellowstone on June 6. He proceeded to the Tower Falls area, where he engaged in some special investigations.

✓ Mr. C. F. Culler, Supervisor of the Bureau of Fisheries' work in the park, arrived on June 19 via Gardiner.

✓ Mr. H. B. Honmon, Sanitary Engineer for the U. S. Public Health Service, came in at Gardiner on the 21st and remained here until July 4, when he left for Glacier National Park.

Mr. A. C. McCain, Supervisor of the Teton National Forest, and Supt. Stoddart, Supervisor of the Targee National Forest met me at Lake on July 5 to discuss joint forest fire plans, insect work and other matters of mutual interest.

127 - Other Agencies Mr. Wm. M. Rush, who has been assigned to special investigation work on the park wild life was engaged in investigations on the north side and in laboratory and office work during the month.

Dr. E. T. Allen, of the Geophysical Laboratory of the Carnegie Institution, Washington, D. C., arrived in the park on June 6 and will remain here most of the summer, continuing his study of the thermal activities in the park.

Dr. H. L. Mason, of the Carnegie Institution, arrived in the park on June 21 and with his assistant proceeded to the Specimen Ridge country, where he is making experiments with the petrified trees.

Dr. H. C. Bumpus of the American Association of Museums came in via Gardiner on June 4 and is engaged in the furthering of the educational work in the park.

Dr. J. C. Evenden of the Bureau of Entomology, Couer d' Alene, Idaho, spent several days in the park looking over the insect infestated areas.

140 - Labor Situation

There were plenty of men seeking employment here to fill all of our crews, and we had no trouble whatever in finding suitable men for the various positions. There are always more men seeking work at this time of the year

117 - General and Special Orders

General Order No. 1 - All troops in the line shall be in the line at all times and shall be ready to move at any moment.

General Order No. 2 - All troops shall be in the line at all times and shall be ready to move at any moment.

General Order No. 3 - All troops shall be in the line at all times and shall be ready to move at any moment.

118 - General and Special Orders

General Order No. 4 - All troops in the line shall be in the line at all times and shall be ready to move at any moment.

General Order No. 5 - All troops shall be in the line at all times and shall be ready to move at any moment.

General Order No. 6 - All troops shall be in the line at all times and shall be ready to move at any moment.

General Order No. 7 - All troops shall be in the line at all times and shall be ready to move at any moment.

General Order No. 8 - All troops shall be in the line at all times and shall be ready to move at any moment.

General Order No. 9 - All troops shall be in the line at all times and shall be ready to move at any moment.

General Order No. 10 - All troops shall be in the line at all times and shall be ready to move at any moment.

General Order No. 11 - All troops shall be in the line at all times and shall be ready to move at any moment.

General Order No. 12 - All troops shall be in the line at all times and shall be ready to move at any moment.

119 - General and Special Orders

General Order No. 13 - All troops shall be in the line at all times and shall be ready to move at any moment.

than we have need for, so that we have an opportunity to select the best from among those applying here in person.

150 - Equipment and Supplies

A Sixty Caterpillar tractor was received on the 17th and placed immediately on road construction work. No other major items of equipment have been received.

170 - Plans, Maps and Surveys

One survey crew was organized to handle the engineering of road reconstruction and to re-run the survey of the telephone line between Lake and Thumb.

180 - Circulars, Bulletins, etc.

Circulars Nos. 6 to 12 inclusive were issued during the month, copies of which are attached hereto, and a number of memoranda for the press were released. A copy of the Nature Notes for June is attached hereto.

200 - Maintenance, Improvements and New Construction

On June 6 a small crew completed opening the road between Thumb and Old Faithful and started for the South Entrance. Snow conditions were much worse than usual and as a result the road to the South Entrance was not opened until June 17. This road was not opened to traffic until June 18.

On June 11 the first car went through to the East Entrance. This road was opened to traffic on the 18th. The newly completed Cub Creek section was in much better condition this year than last and except for the banks and slopes which sloughed, gives us a very good road for the coming season. On June 13 the first car went through Dunraven Pass to Tower Falls. The snow conditions were about the same as usual along this road and it was opened to traffic on the 18th. The first car went over Mt. Washburn June 28 and this road was opened to traffic the first of July. Unusually heavy snow drifts were encountered on both sides of the peak.

On June 10 we started organizing our road maintenance crews - the last one being organized on June 17. We now have 16 maintenance crews in the park and three crews on the South and East approach roads outside the park.

Road oiling for dust prevention was started on June 7. The heavy maintenance crew worked to Madison Junction and across to Canyon and then were placed on new construction. Storms handicapped work of this crew considerably.

220 - Improvements

Carpenter Shop: Practically the entire month was spent upon sign

There are many more to be done, so that we have an opportunity to select the best from
among these various items in the future.

170 - *Scientific and Technical*

A study is being made of the various items in the 170 and should
be ready for the next meeting in 1951. It is hoped that the items will be
sent to you.

171 - *Books, Papers and Reports*

One survey report was prepared in 1950 and is being distributed to you
and to the various departments of the Institute. It is hoped that you will
be able to use it.

172 - *Scientific, Technical, etc.*

There are many items in the 172 which are of interest to you and
of which you are interested. A number of these items are being
referred to you for your information.

173 - *Scientific, Technical, etc.*

There is a small number of items in the 173 which are of interest
to you and which are being referred to you for your information.
It is hoped that you will be able to use them.

There are many items in the 173 which are of interest to you and
of which you are interested. A number of these items are being
referred to you for your information. It is hoped that you will
be able to use them.

There are many items in the 173 which are of interest to you and
of which you are interested. A number of these items are being
referred to you for your information. It is hoped that you will
be able to use them.

There are many items in the 173 which are of interest to you and
of which you are interested. A number of these items are being
referred to you for your information. It is hoped that you will
be able to use them.

174 - *Scientific, Technical, etc.*

There are many items in the 174 which are of interest to you and
of which you are interested. A number of these items are being
referred to you for your information. It is hoped that you will
be able to use them.

maintenance except for the usual small building repairs necessary and upon new construction.

Engineering Department: The usual road maintenance supervision was carried on during the month and one engineering crew was organized to take care of road construction engineering.

Electrical Department: The usual maintenance was carried on which included the replacement of a part of the street lighting system at Old Faithful which was in a bad state of repairs.

Efficiency tests were made on the rebuilt turbines and from data obtained it appears that we have increased the efficiency of the plant from 15 to 20 per cent, thereby saving us at least 5 Sec. ft. of water which of course will relieve the load upon the supply lines, and we hope eliminate line loss which necessitated many shut downs last year. The Yellowstone Park Hotel Company installed a 93 KW 2200 volt generator in their boiler room at Mammoth in order to supply power during our shut downs or in case of peak loads which we are not able to carry.

The usual telephone maintenance was carried on during the month. The West side of the park was out over to metallic circuit June 6 and the East side June 15. Considerable maintenance consisting of pole replacement was necessary on the Tower Falls - Cooke City lines.

Sanitation Department: The usual maintenance work on the sewer and water lines and the placing of the various systems in the park in operation was made by this Department during the month. The incinerator at Old Faithful started operations June 20. The incinerator at Lake was placed in operation July 1.

Mechanical Department: Work this month consisted of the usual operating repairs which were heavier than usual on account of a mistake by the Texas Company in which they sent the wrong kind of oil for our use. As a result we had several bearings burned out and similar trouble. The motor patrol grader which had been left in the East Forest through the winter was overhauled the latter part of the month.

Grounds: The usual ground maintenance was made during the month.

230 - New Construction - Roads and Buildings

Mammoth-Norris: On June 6 the construction of the first three miles of this project was completed and the crew was moved to West Gallatin. This work consisted of final finishing and surfacing with obsidian sand.

West Gallatin - Grayling Creek Section: Work was started on this project June 7 with camp established about the middle of the project. The work this month consisted of completing the three miles of the construction that was opened last year, thereby eliminating all crossings of Grayling Creek south of the "hump". This crew handled the maintenance of the old road as well. Double shifts on the power shovel started on June 9.

...the ...

...the ...

...the ...

...the ...

...the ...

...the ...

... - ...

...the ...

...the ...

East Entrance: Work on this project proceeded very rapidly with the organization of larger crews and considerable progress was made by the end of this month with two shovels in operation.

East Entrance Checking Station: This checking station was completed during the month and the approach roads were widened to facilitate the handling of the heavy traffic which passes through this gate.

South Entrance Ranger Station: The South Entrance Ranger Station was completed during the month with the final finishing of the north set of quarters and the cleanup of the entrance grounds.

Bunk House at Buffalo Ranch: The foundation of this building was completed and all the logs were placed on the ground. These logs were hauled from the Pebble Creek area approximately ten miles from the ranch.

Extension and Improvement of Auto Camps: Work this month consisted of the building of tables and fireplaces at the Old Faithful and Fishing Bridge Auto Camps, and the extension of roads and addition of camp limit railings.

Extension and Improvement of Water & Sewer System: Practically the entire month was devoted to the construction of the new sewer system at Fishing Bridge.

240 - Improvement of Approaches to the Park

Construction was progressing rapidly on the section of road between the Shoshone Reservoir and the bridge. Much of this project is being used at the present time. It is being surfaced immediately after construction.

On the North approach road the progress of the work has been slow on account of the Gardiner Bridge site which has not been selected at the present time.

260 - Landscape work

The development in buildings during the month of June has been mainly in the cabin areas for housekeeping cabins and Lodge units, building from 20 to 40 additional cabins at the main points. These cabins are being placed in accordance with the planned development.

The Museum and Information building at Old Faithful was completed and opened to the public on June 20. Its completion establishes a type of high grade construction in public buildings which will serve as an example for future building not only in the Old Faithful area but in the park at large.

A site was selected and work begun on the Trail-side museum at Madison Junction in continuation of the high standard set at Old Faithful. Other buildings under construction are a general store and a housekeeping headquarters and office at Old Faithful Auto Camp, a bunk house at the Buffalo ranch, garage compound at Lake, mess house at the Fish Hatchery at Lake, a porte-cochere at Lake Lodge and alterations of the porte-cochere at Lake Hotel.

Road work consists of major projects on the Sylvan Pass-East Entrance and the Grayling Section on the Callatin road. The East Entrance job is in charge of a highly competent superintendent of construction who is conforming

the organization of the program and the nature of the work to be done. The program is to be carried out in a systematic and organized manner.

to our wishes in the matter of preservation and careful work, especially in regards to blasting operations, and we look forward to a satisfactory completion and cleanup on that job.

During the month Mr. Vint, Chief Landscape Architect, visited the park and we made general inspection trips around the park as well as to the new Teton National Park outlining future development and settling minor problems which have come up in the present development.

The above report was submitted by Mr. Kenneth C. McCarter, Assistant Chief Landscape Architect.

300 - Activities of Other Agencies in the Park

310 - Public Service Contractors

The Yellowstone Park Fuel Company started operations with the establishment of a fuel yard for the sale of stove wood to auto campers in the Mammoth and Old Faithful auto camps. The Yellowstone Park Hotel Company received their first guests June 17. On June 18 the hotels were in full operation to accomodate the Shriner parties. The Yellowstone Park Lodge Company started operations on June 17 although prior to that time they accomodated guests in various units by allowing them to take meals with the employees, but furnishing the usual lodging accomodations. All housekeeping camps except the one at West Thumb have been in operation the entire month. The one at West Thumb started operations on June 20. The swimming pool and bath house operated by Mr. H. P. Brothers opened to the public on June 1. All stores have been in operation the entire month. The cafeterias at Old Faithful, Mammoth, Tower Falls, Fishing Bridge, Canyon and Thumb were placed in operation on June 15. The Yellowstone Park Transportation Company started the operation of their busses June 17 and 18. The new Haynes Picture Shop at Mammoth was opened to the public on June 1. The Haynes Picture Co. also installed a new sales room in the Lake Hotel lobby which was made necessary by the remodeling of that portion of the Hotel. The remodeling of the Lake Hotel lobby was completed in time to be used at the beginning of the season.

311 - Character of Service Rendered to the Public

The Yellowstone Park Lodge and Camps Company had housekeeping cabins open for early visitors, and the stores and gasoline filling stations were open when the first motorists were allowed to travel the park roads on June 1.

400 - Flora, Fauna and Natural Phenomena

410 - Ranger, Naturalist and Guide Service

Protection Department activities for the month of June have been seasonal changes. All men were removed from their winter stations to summer stations. The work has consisted mainly of clean-ups, emergency repairs to trails, and telephone lines, checking of entrance and exit travel, observation of weather conditions, water gauge heights etc., and wild life observations and reports.

is our object in the matter of organization and control, especially in
 respect to financial operations, and we have turned to a central body
 and we have to make it clear.

During the month of July, which has been passed, it is
 our duty and our privilege to report to you on the work we have done
 and to the various departments of the organization, which are all
 now in the hands of the various departments, and to the various
 departments of the organization, which are all now in the hands of the
 various departments of the organization, which are all now in the hands of
 the various departments of the organization, which are all now in the hands of

The above report was presented by Mr. Edward J. Lawrence, President
 of the National Union of Students.

200 - List of Officers of the Year

201 - 1932-1933 Report

The following are the names of the officers of the
 National Union of Students for the year ending on the
 31st day of July, 1932. The following are the names of the
 officers of the National Union of Students for the year ending
 on the 31st day of July, 1933. The following are the names
 of the officers of the National Union of Students for the year
 ending on the 31st day of July, 1934. The following are the
 names of the officers of the National Union of Students for the
 year ending on the 31st day of July, 1935. The following
 are the names of the officers of the National Union of Students
 for the year ending on the 31st day of July, 1936. The
 following are the names of the officers of the National Union
 of Students for the year ending on the 31st day of July, 1937.

202 - Officers of the National Union of Students

The following are the names of the officers of the
 National Union of Students for the year ending on the
 31st day of July, 1938. The following are the names
 of the officers of the National Union of Students for the
 year ending on the 31st day of July, 1939. The following
 are the names of the officers of the National Union of
 Students for the year ending on the 31st day of July, 1940.

203 - Officers of the National Union of Students

204 - Officers of the National Union of Students

The following are the names of the officers of the
 National Union of Students for the year ending on the
 31st day of July, 1941. The following are the names
 of the officers of the National Union of Students for the
 year ending on the 31st day of July, 1942. The following
 are the names of the officers of the National Union of
 Students for the year ending on the 31st day of July, 1943.

The temporary ranger force came in on the 15th and 16th, and the entire group were taken around the park through the courtesy of the Yellowstone Park Transportation Company before they were assigned to their stations. At the start of the season the temporary force was two or three men short. Since that time the force has been completed to its number of 43 temporary men. 17 Ranger Naturalists have also been added to the force.

Rangers assigned to fire patrol report general patrol trails in good condition. They are at this time clearing trails and repairing the more distant phone lines. All of these men assigned to fire patrol work report game conditions very good.

There has been no fire hazard to date this season. Rain fell has been general over the park, with daily showers in nearly all parts of the park. Traffic patrol has been very effective. Beginning June 17 five motorcycle patrolmen have been on the roads. A few minor violations have been reported, but to date no serious cases have occurred.

420 - Museum Service

The Mammoth Museum opened on June 1. From the 1st to the 20th an attendant was present for eight hours each day. On the 20th the regular schedule from 7 am to 10 pm went into effect. It has been thought that more special attention should be paid to Museum visitors and during the season a Ranger Naturalist will act as Museum interpreter during the rush hours at both the Mammoth and Old Faithful buildings. As mentioned before, the back room of the Museum has been converted into a work room. On June 6 Ludwig von Furerer arrived to begin the taxidermy work for the large Museum. On June 24 Mr. MacAfferty arrived to assist Mr. Furerer in the preparation. They have to date mounted 42 specimens of Yellowstone birds and small mammals. A refrigerator has been installed in connection with their work and freshly killed specimens are at once stored.

The Old Faithful Museum: As soon as the roads were passable the Park Naturalist and Mr. Joyner spent several days at the Old Faithful Museum working on the preliminaries of the installation. This work was greatly slowed up, due to the necessity of the painters and carpenters working in the same room. Wiring of the cases also caused considerable delay in the installing of the exhibits. As soon as the Old Faithful Ranger Naturalists arrived they were put to work on the Museum. The official opening was on the evening of June 20. The attendance between the hours of 7.30 pm and 10 pm was nearly 700. Dr. E.N. Jones delivered the first lecture in the auditorium to an audience of between 300 and 400. The popularity of the Old Faithful museum has steadily increased since its opening. The hand specimens and the algae exhibits have been a source of constant interest to the visitors.

The following figures are available in connection with the Educational Division:

The following is a list of the names of the persons who have been appointed to the various committees of the Board of Directors of the International Chamber of Commerce for the year 1934. The names are listed in alphabetical order of the surnames.

GRAND TOTAL - PERSONS SERVED DURING JUNE 45,592

* * *

430 - Buffalo Corral and Zoo

This year the zoo at the Buffalo Corral has been abandoned. No animals are kept there this year excepting 11 buffalo, one elk, and one white-tailed deer. At the start of the season there were four cow elk, and four calves in the Buffalo corral pasture. The fence has been broken down, and these animals escaped, and as yet they have not been returned to the pasture. The total attendance at the Buffalo Corral to date is 3,598, as compared with 4,200 of July 1 of last year, and 3800 as of July 1, 1927.

470 - Animals

Game conditions throughout the park at this time are unusually good. Reports from all over the park show a large crop of elk calves. The first fawn were reported on June 15 at Mammoth headquarters. The buffalo herd has moved back into the hills, in the Upper Lamar and Saddle Mountain country. Feeding conditions for all browsing animals are very good. As yet no losses have been reported from any of the game herds.

Elk: Small bands of elk are frequently seen at all parts of the park. The largest band reported was 147, just south of the West Thumb Ranger Station. The calf crop is very good. Weather and feeding conditions have been ideal. Several cases have been reported of bears killing elk calves. At this writing the elk herd has been broken up, and is now in many small bands. Nearly all of them are back on their summer range now.

Deer: The first fawn reported for the season was on June 15. Small bands of deer had been observed along the roadside, and nearly all points in the park. The deer have about completed shedding of their winter coat, and they now have taken on a reddish caste. All the males observed are in the velvet now. The tourists stopping at Mammoth have frequent opportunities to observe and photograph the deer.

100	100	100	100
100	100	100	100

TOTAL SALES IN 1948

1948 - 1949

1949 - 1950

This year the cost of the British dollar has been estimated to be 100. The cost of the dollar in 1949 was 100. The cost of the dollar in 1950 was 100. The cost of the dollar in 1951 was 100. The cost of the dollar in 1952 was 100. The cost of the dollar in 1953 was 100. The cost of the dollar in 1954 was 100. The cost of the dollar in 1955 was 100. The cost of the dollar in 1956 was 100. The cost of the dollar in 1957 was 100. The cost of the dollar in 1958 was 100. The cost of the dollar in 1959 was 100. The cost of the dollar in 1960 was 100.

1950 - 1951

These conditions throughout the year of this time are generally good. The cost of the dollar in 1950 was 100. The cost of the dollar in 1951 was 100. The cost of the dollar in 1952 was 100. The cost of the dollar in 1953 was 100. The cost of the dollar in 1954 was 100. The cost of the dollar in 1955 was 100. The cost of the dollar in 1956 was 100. The cost of the dollar in 1957 was 100. The cost of the dollar in 1958 was 100. The cost of the dollar in 1959 was 100. The cost of the dollar in 1960 was 100.

The cost of the dollar in 1951 was 100. The cost of the dollar in 1952 was 100. The cost of the dollar in 1953 was 100. The cost of the dollar in 1954 was 100. The cost of the dollar in 1955 was 100. The cost of the dollar in 1956 was 100. The cost of the dollar in 1957 was 100. The cost of the dollar in 1958 was 100. The cost of the dollar in 1959 was 100. The cost of the dollar in 1960 was 100.

The cost of the dollar in 1952 was 100. The cost of the dollar in 1953 was 100. The cost of the dollar in 1954 was 100. The cost of the dollar in 1955 was 100. The cost of the dollar in 1956 was 100. The cost of the dollar in 1957 was 100. The cost of the dollar in 1958 was 100. The cost of the dollar in 1959 was 100. The cost of the dollar in 1960 was 100.

Antelope: The antelope have been on their summer range now for somewhat over a month. Though the herd suffered from predatory animals during the last winter, they are in excellent condition at this time. A few reports have come in of antelope young in the Lamar River section. At present the antelope herd is well scattered, from the Game Preservation Ranch to the central Lamar River country. The antelope herd will probably not scatter any more, but will remain in the same relative location for the balance of the summer.

Moose: The ranger at Sylvan Pass reported seeing twin moose calves. On a recent trip from Old Faithful to Mammoth the Chief Ranger observed 11 moose in Willow Park. Reports from Tower Falls, Norris, Gallatin, and the Upper Yellowstone show moose in larger numbers than they were at this time last year.

Buffalo: Lamar River Herd: Herd conditions are very good. The herd has moved within the last two weeks to its summer range on the upper Lamar, Saddle Mountain, and Mount Norris district. There have been a number of losses of calves by drowning as the herd crossed the Lamar River while it was in its highest flood condition. No losses of mature animals have been reported. The calf crop this year is unusually good. The latest reports show 140 calves. No reports are available for the Pelican Creek herd, excepting that a few wintered near Turbid Lake.

Sheep: No special reports are available on sheep. The only available reports show the sheep to be a few less than last year at this time. For some time they have been back on their summer range. The first lambs were reported during the latter part of May.

Bears: Reports from all the larger ranger stations show bears to be more numerous than they were at this time last year. Old Faithful, Lake, Canyon and Tower Falls report bears around the stations or camp grounds nearly all times of the day. The Lake and Canyon bear feeding grounds are frequented by grizzlies nearly every day. Counts taken at the Lake show 12 grizzlies present at one time; at Canyon 38; at Old Faithful 3. 14 black bears were counted at Tower Falls at one time. Injuries by bears to date have been very small. Five or six are all that have been reported to this office.

Small Animals: No special reports are available on small animals. However, the tourists have no trouble in finding marmots, squirrels and other small animals to amuse them on the trails and roadsides.

Predatory Animals: A few reports have come in where rangers have found dens of young coyotes. In all cases these have been destroyed. At this time of the year the bear seems to be the most destructive of any animal. Nearly all losses of elk calves, fawns and buffalo calves are cases where bears have killed these young animals.

Fishing: Fishing is nearly as good this year as it was at this date last year. Most all waters of the park have been too high for fly fishing. The spawning season started just a little later than a year ago. The park was opened to traffic on June 1, and fishing was then authorized in all of the park waters, excepting Wolf Lake, Grebe Lake, Cascade Lake, Fish Lake, and Grayling Creek. These waters were fished out a little too closely to allow fishing to

continue in them this season. The total catch report to date is 7,490 fish as compared with 6,929 last year. These figures do not include fish caught by rail tourists and residents of the park, but only accounts for fish taken out by private motorists.

Buffalo and Other Ranch Operations: The activities of the Buffalo Ranch have consisted principally of routine spring season work, repairing of fences and equipment, maintenance work on roads and culverts in the immediate vicinity of the ranch, riding with the buffalo herd, and other general ranch duties. A new mess house is under construction at the Buffalo Ranch at this time.

Activities at the Slough Creek Ranch have been repairing and maintenance of equipment, preparatory to the harvesting of the hay crop, which will start about the 25th of July. The Yancey Ranch has been irrigated once, and the prospects are for a good hay crop. The Gardiner Ranch was plowed up this spring, and seeded to oats. At this writing the oats are up and in very good condition. The field has been irrigated twice. Should weather conditions remain favorable, the ranch will no doubt produce a very good crop of forage. A man has been stationed at the Game Preservation Ranch since June 1. The field has all been irrigated once, and most of it twice. The alfalfa hay on the ranch will be ready to cut about the 10th of July. The crop this year will probably be a little heavier than it was last year. At present it is planned to let contracts for cutting and stacking the hay on the Game Preservation Ranch.

480 - Natural Phenomena

Mammoth Hot Springs: The west side of Hymen Terrace is one of the most beautiful sights on the formations at present. Because of extremely rapid deposition, the terraces there are very delicately formed. A wire fence, placed along the terraces to keep people off the formations has been completely inundated by the increased flow of water, while the wire itself has a beautiful covering of delicate lace-like travertine.

The new spring west of the Devils Thumb seems to be increasing in activity.

Minerva Terrace seems to be ever changing. The grotto on the southwest side is claiming most attention at present. The long white stalactites hanging from its ceiling have long threads of pale yellow algae forming on them. A part of the water has begun to flow down over the old terraces on the south side, but no color has developed yet, since the change is so recent.

Narrow Gauge is perhaps the most spectacular sight on the trail. Throughout its entire length it is active and steaming. At the south end two openings spout water horizontally, to a distance of ten or twelve feet and to a height of three feet. Yellow thread-like algae have claimed the hot pool at its south end and are attracting much attention.

All who visit New Highland Terrace are impressed by its beauty and grandeur. Almost every square inch of its terraces is constantly bathed with a film of spring water, hence the coloring is especially beautiful. Many pictures are taken when the crowds stop at this interesting formation.

The Blue Springs are very active and make the flat above Jupiter and Main Terraces a sight worth seeing. Jupiter climaxes all for size and amount of water flowing. Too much of the water from Jupiter at present is flowing down three or four main channels. If this were spread out over the entire formation the beauty of Jupiter would be matchless.

Norris Geyser Basin: As one of the major hot spring and geyser areas of the Park, Norris Geyser Basin has many activities and facts of interest often overlooked. Here the highest temperature ever observed in Yellowstone Park - 138° Cent. - was obtained in the super-heated steam issuing from the Black Growler. Not far from the Minute Man Geyser is the now inactive crater of what was once the mightiest and finest of the geysers, shooting water and steam in volume and height surpassing any present eruptions. This year there has been renewed activity of the Constant Geyser adding to the interest of all visitors, and really living up to its name. In weir measurements, it has been found that the discharge from the entire basin shows a marked increase over the two preceding years. The waters of all the other geyser basins are almost invariably of an alkaline nature, but at Norris acid and alkaline waters are found close to each other.

Upper Geyser Basin: There has been no great activity of unusual interest in the Upper Geyser Basin. The Beehive erupted for eleven minutes, starting at about 7.45 pm on the evening of June 13. The Giantess was in a semi-eruptive state from 10.30 am on June 17 to noon the following day. The eruptions did not exceed fifty feet in height. The Giant Geyser was active each morning at approximately 10 o'clock for five days - June 18 to 22 incl. On the evening of June 28 it erupted to a height of 170 feet, which activity lasted for only about one hour. The Grand has been active at average intervals of 12½ hours. The Daisy and Old Faithful have had maximum eruptions, with but little variations in their intervals. A violent intermittent boiling was observed at Sapphire Pool. This ebullition forced a fountain of water to a height of six feet. During one of these periods of activity, Jewel Geyser, located nearby, played five times to a height of ten or twelve feet at intervals of thirty seconds. At all other times, Jewel Geyser erupts approximately every five minutes.

520 - General Weather Conditions:

521 - In the Park

The month had few outstanding features. Temperatures averaged 53.4° 2.7° below the normal, and precipitation totaled 1.26 inches, 66% of the normal amount. What is thought to be an interesting occurrence is the fact that no less than seven individual thunderstorms passed over this locality during the day and evening of the 29th. Wind and sunshine were normal but all records of high wind for June were broken on the 15th when a maximum velocity of 48 miles per hour was measured. This was also the highest wind velocity recorded since May, 1927.

The first part of the report is devoted to a general survey of the country. It is followed by a detailed description of the various districts and their principal towns. The report concludes with a summary of the principal facts and figures.

The second part of the report is devoted to a detailed description of the various districts and their principal towns. It is followed by a summary of the principal facts and figures.

The third part of the report is devoted to a detailed description of the various districts and their principal towns. It is followed by a summary of the principal facts and figures.

The fourth part of the report is devoted to a detailed description of the various districts and their principal towns. It is followed by a summary of the principal facts and figures.

THE END

1850

The fifth part of the report is devoted to a detailed description of the various districts and their principal towns. It is followed by a summary of the principal facts and figures.

540 - Visitors

Mr. Henry B. Joy, former President of the Packard Motor Co. was the first special visitor in for the month. He entered at West Yellowstone on June 1 and left on the 3d via the same gateway. He was accompanied by Mrs. Joy.

Dr. W. C. Alden of the Geological Survey entered at the West gate on June 6 with his assistant, Mr. Johnson. He spent several days in the Tower Falls region and left via Gardiner on June 11.

Mr. F. E. Williamson, President of the C.B.&Q Railroad Co., Chicago Ill. entered the park at Gardiner on June 9 and spent two days fishing. He left via Gardiner on June 11. Mr. Williamson was accompanied by Mr. G. H. Jacobus of the Northern Pacific Railroad.

Fourteen cars and a truck, comprising the "Silver Fleet" sent out by the Goodrich Tire Company came into the park at Gardiner on the evening of June 12 and the following day proceeded to Old Faithful and to the Canyon for the night. The Fleet left via West Yellowstone on June 14. Members of the "Fleet" obtained some excellent pictures in the park, which will be used for publicity.

Mr. Ed Fletcher, of San Diego, whose son is a ranger in Yosemite National Park and who has been very helpful in park matters, entered at West Yellowstone on June 14 and left via the same gateway.

Lieut. General Robert Lee Bullard (U.S.A. retired) accompanied by Mrs. Bullard, came in at the West gate on June 16 and proceeded to Old Faithful. General Bullard became ill while he was in the park, due to the high altitude, and it was necessary that he leave without completing his proposed trip. He left via West Yellowstone on the evening of June 16.

Lady Holland of London, came in at the North gate on June 20, having made the trip from Canada in one of the cars of the Brewster Transportation Co. Lady Holland left via the East gate on June 24 and expressed her appreciation of the many wonders which she saw here. She is very enthusiastic from her park visit. She was accompanied by her daughter.

Mr. Bruce Kremer, former Democratic committeeman from Montana, and prominent in national politics, came in via Gardiner in his own car on June 23 and left via the same gateway on June 25.

Hon. L. C. Phipps U.S. Senator from Colorado, accompanied by Mrs. Phipps, her mother, their two children and a friend of the family, came in at the West gate in their own car on June 26. The party left via the south gate on June 28, in order to see the new Grand Teton National Park.

Carl Laemmle, President of the Universal Pictures Corporation, came in at the West gate on June 24 with a party of 11 people and departed via the same gateway on June 28. Mr. Laemmle proposes to stage a talkie picture in color in the Yellowstone.

600 - Protection

610 - Police Protection

Proceedings were had before the U. S. Commissioner as follows:

<u>Name and Address</u>	<u>Offense</u>	<u>Disposition</u>
Mr. Neil Sharon, (U. P. employee) West Yellowstone, M.	Possession of liquor in Yellowstone Park.	Fined \$50 and costs, and ejected from park.
Mr. Gustav Berg, (U. P. employee) West Yellowstone, M.	Possession of liquor in Yellowstone Park.	Fined \$50 and costs, and ejected from park.
Mr. Joseph Judkis, (U. P. employee) West Yellowstone, M.	Possession of liquor in Yellowstone Park.	Fined \$50 and costs, and confined until payment of fine.

620 - Fire Protection

There were no fires reported within the limits of Yellowstone Park during the month of June. There were no electrical storms; there was good patrolling by the rangers; and an observance of rules and regulations in regard to camp fires, by the tourists, and as a result there were very little fire hazards.

630 - Accidents

Frank Dewing, driving Transportation Co. truck No. 220, was driving to Mammoth, and nearing Obsidian Cliff noticed car coming towards him. This Reo, License #307-309, Washington, owned by Earl Sharp, and driven by Ed Eylar, stopped in a very narrow place in the road at Obsidian Cliff. Dewing, to avoid hitting the car, pulled to right hand side of road, striking large rock, which forced the truck into side of car. The Reo was badly damaged. The Transportation Co. settled with Mr. Sharp for the damage to the car. The accident occurred at 10 A. M., June 19.

Clyde Bowman, driving Transportation Co. bus #103, while attempting to pass Government oil truck, driven by Boone McCarter, pulled too far to the left, and the wheels of the bus caught in the soft bank, causing the bus to go over the bank, and turn over. Two of the passengers of the bus received minor injuries. Time: 8:20 A. M., June 21, 1929. Place: West of Mammoth swimming pool, on main road.

At 11:30 A. M., June 22, 1929, Dr. J. M. Oleimk, driving a Hudson, License #D51, Mont., in crossing a small culvert one mile inside the park at Sylvan Pass, struck the tire and carrier of a Transportation bus, #302. The left rear fender of his car was dented.

A Chrysler, License #24754, Wyoming, owned by S. F. Flannagan, collided with a Buick, License #B6640, Minnesota, driven by Hugo Johnson, at 5 o'clock P. M. June 23, one mile ⁴inside the park at Sylvan Pass. The

left rear fender of the Buick was dented. An agreement was reached at Sylvan Pass, the owner of the Chrysler paying for damages.

Viola Harris, of Rexburg, Idaho, driving Oldsmobile coupe, License #75645, Idaho, owned by Wm. Hansen, Jr., drove off the bridge at Madison Junction, at 4 P. M., June 23, when she saw a yellow bus on the bridge. The car was badly damaged, and was lying on its side, half submerged in the river. Two of the passengers in the car sustained injuries.

H. Bearer, driving Chrysler, License #1M3251, Calif., collided with Transportation Co. bus #292, on the east side of Chittenden bridge, en route from Canyon, at 2:52 P. M., June 27, while traveling on the wrong side of road.

J. P. Hoven, driving Chevrolet, North Dakota, en route to Fishing Bridge from East Entrance, involved in collision with yellow truck # 711, Y. C. T. Co., driven by Albert Bruckert, at 7:30 P. M., June 28. Mr. Hoven's car was slightly damaged.

Special Incidents

A report from the North Gate was that federal officers made a raid in Gardiner and the vicinity of Electric, and the following arrests were made: Jones - employee of the Ino Cafe; Kammerly - employee of the Gateway Cafe; Plevens - unknown; Frank Iustrie - an Austrian at Electric, considered to be a poacher.

Mrs. Patrick Holstrom, of Hemet, Calif., traveling with her husband in a Dodge car (License #1G6079) walked or fell against a bulletin board attached to the front of the booth at the Gardiner checking station, at 6:45 A. M., June 11. Her husband stated that damages would be claimed if it was found that she was injured in any way. She was examined by Dr. Grace at Mammoth, and it was found that she sustained no injuries.

A Montana Ford-T roadster, Lic. #70351, driven by Neil Sharon, accompanied by Joseph Judkis and Gustav Berg, was involved in an accident about 400 yards east of the Firehole River bridge, just out of Old Faithful toward West Thumb, on June 13. The car was traveling very fast, and all of the occupants were under the influence of liquor. Neil Sharon suffered several broken ribs, and was brought to Old Faithful for first aid by J. Kennedy of Barger, Texas. Ranger George Miller arrested the three men, and brought them to Mammoth, where he filed a complaint against them for possession of liquor. One full pint, and part of another pint of whiskey were taken as evidence. Sharon, Judkis, and Berg were each fined \$50.00 and costs by U. S. Commissioner John W. Meldrum. Sharon's judgment was suspended for 30 days, and the other two parties have since paid their fines, and left the park.

A tree was blown across the front of W. W. Pace's Buick car, License #362-93, Texas, while traveling from Canyon en route to Norris, during a wind storm on the 25th of June. The wind shield was smashed; and the radiator and hood were dented. Mr. Pace suffered a cut hand.

Left New York at 10:30 AM on the 10th. Arrived at 11:30 AM. The weather was cloudy and the water was choppy. The crew was very friendly and the food was excellent.

At 12:30 PM, we went ashore to visit the local market. The market was very busy and there were many stalls selling fresh produce. We bought some fruit and vegetables. The prices were very reasonable.

We then went to the bank to exchange our money. The bank was very helpful and the staff were very friendly. We then went to the post office to buy some stamps.

In the afternoon, we went to the beach. The beach was very beautiful and there were many people there. We went for a swim and enjoyed the sun. The water was very clear and the sand was very soft.

10th Day

On the 10th day, we went to the market again. This time we bought some meat and fish. The market was very busy and there were many stalls. We also bought some fresh bread and fruit.

We then went to the bank to exchange our money. The bank was very helpful and the staff were very friendly. We then went to the post office to buy some stamps.

In the afternoon, we went to the beach. The beach was very beautiful and there were many people there. We went for a swim and enjoyed the sun. The water was very clear and the sand was very soft.

At 10:30 PM, we went to bed. The night was very quiet and the moon was very bright. We had a very good night's sleep and were very refreshed in the morning.

Mr. H. V. Wing, about 45 years of age, a Hotel guest at Mammoth, fainted away on the Harrow Gauge Terrace at 10 O'clock A. M. June 26, due to the high altitude.

Mrs. Herbert Pietzsch, about 50 years of age, a Lodge guest at Mammoth, suffered a badly sprained ankle on the Terrace Trail between Devil's Kitchen and Orange Spring at 10:30 A. M. June 26.

Bear Bites: Mrs. B. W. Minard, 1250 Lafayette St., Denver Colo., was bitten on the left hand by a bear at Tower Falls at 12 o'clock noon June 27.

17. 2. 7. 1951, about 10 years of age, a female greyhound
belonged to the owner's name as in your letter
to the right.

The female greyhound, about 10 years of age, a female
belonged to the owner's name as in your letter
to the right.

18. 2. 7. 1951, about 10 years of age, a female greyhound
belonged to the owner's name as in your letter
to the right.

110 people comprising the "Summer School on Wheels" under the leadership of Mr. H. W. Blanks, manager of the Guild Travel Bureau, Charlotte N.C., came into the park in their own cars at the South gate on June 30. They departed via the West gate on July 3. This party held regular classes each morning for the students comprising it.

Mr. Van Marcus, Supervising Examiner for the Department of Justice, Washington, D. C. entered at Gardiner on June 28 and left via the same gateway on July 2. He went over the work of the U. S. Commissioner in the Park.

900 - Miscellaneous

Post Office: The office was moved on June 7, from winter to the usual summer quarters, and the summer force of clerks were employed. The summer postal stations at Old Faithful, Lake Outlet, Fishing Bridge, Canyon, and Tower Falls were opened as usual on June 19. Star routes also were established connecting these stations, and a new star route was established connecting the main office with West Yellowstone for one dispatch a day; and Old Faithful Postal Station with West Yellowstone, Mont. for exchange of mails once a day. All star route service is given under contract with the Yellowstone Park Transportation Company, and so arranged that the principal mail coming in in the forenoon reaches all stations the same afternoon. This Star Route also serves ranger stations and road camps along the route. Copy of Circular No. 1, July 19, showing dispatch and arrival of mails is enclosed.

New contracts for conduct of the postal stations at Lake Outlet, Fishing Bridge, Canyon and Tower Falls, were let to the same parties but at an advanced rate so as to provide adequate compensation for the service rendered. The experiment of last summer indicated that the advantages of having a postal station in general stores for advertising purposes and drawing customers were exaggerated; that it did not increase the business of the stores materially.

The business of the month of June at the main office and the fire park stations was about 10% greater than for the same period last year.

The station in the Hamilton general store at Old Faithful, which was conducted last year as a contract station, was opened on June 19 as a classified station with C.C. Marsh, Assistant Postmaster in charge, with one clerk to assist him.

Collection boxes were placed at five points at Mammoth, in the auto camp and near the stores and on the porch at the Information Office. Also at Norris and Madison Junction.

Church Services: Schedules for church services in the Chapel were made up and printed and posted in the Hotel, Lodge and other public places at headquarters.

Catholic masses were held in the chapel by Father Haverkamp at 6 am and 8 am June 30.

Baptist services were held in the chapel at 10.30 am and 8 pm Sunday, June 23 by Rev. W.L. Peters of Livingston, Mont. English Lutheran services were held at the same hours on June 30 by Rev. Webster H. Clement of Livingston Mont.

Hospital and Medical Services: Dr. Frank G. Grace, resident physician reports approx. 300 calls during the month, which includes both residence calls and hospital patients.

On June 11 the Secretary of the Local Civil Service Board held an examination for the position of Junior Stenographer for the 13th Civil Service District. One person took the examination.

On June 18 a conference of Forest Service and Park Service officials was held in my office to discuss matters of mutual interest, particularly the purchase of land north of the park to be used for the protection of game. The following attended this meeting:

Director H. M. Albright
Superintendent Toll
Assistant Superintendent Daum

Forest Service:

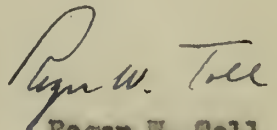

G. E. Martin, Supervisor, Absaroka Forest, Livingston
Arthur Cramer, Assistant Supervisor.

Major Evan Kelley, District Forester, Missoula
Meyer E. Wolff, Asst. Dist. Forester
Harry G. Ade, Asst. Administrative Officer

A. H. Abbett, Supervisor, Gallatin Forest, Bozeman
C. B. Swim, Assistant Supervisor

The ice went out on Yellowstone Lake on June 6. From all reports this is the latest on record since 1909. The ice shifted on the lake the last few days before the 6th, wind carrying it from one end of the lake to the other. A small amount of damage was done at the Hotel Boat Company's dock and also at the Fish Hatchery dock.

Very truly yours,

Roger W. Toll
Superintendent

June 6, 1929

CIRCULAR NO 6

Effective immediately, but pending final approval by the Washington Office, the following changes in the Yellowstone organization will be made:

Assistant Chief Ranger George Baggle, promoted to the position of Chief Ranger, vice Sam T. Woodring, now Superintendent, Grand Teton National Park.

Park Ranger John S. McLaughlin, Grade 8 (CU), promoted to Grade 9 (CU), vice Edward E. Ogston, who was promoted to Assistant Chief Ranger May 15, 1929.

Park Ranger Edward J. Bruce, transferred to the Grand Teton National Park.

At the request of Yosemite National Park, Russell Sprinkel will be transferred to that park as Chief Clerk.

Roger W. Toll
Superintendent

Department of the Interior
National Park Service
Yellowstone National Park
Yellowstone Park, Wyoming.

Circular No. 7:

June 13, 1929

The following shifts of operators on the Government switchboard at Mammoth Hot Springs will become effective June 16, 1929:

Hours of Duty for Operators

June 16th to June 22nd
(Schedule No. 1)

<u>Operators</u>	<u>From</u>	<u>To</u>	<u>Hours</u>
1. Mrs. Edwin	6.30 A.M.	9.30 A.M.	3
2. Mrs. Allan	9.30 A.M.	12.30 P.M.	3
3. Mrs. Fincher	12.30 P.M.	2.00 P.M.	1½
4. Mrs. Allan	2.00 P.M.	6.00 P.M.	4
5. Mrs. Fincher	6.00 P.M.	Midnight	6

June 23rd to June 29th
(Schedule No. 2)

1. Mrs. Edwin	6.30 A.M.	9.30 A.M.	3
2. Mrs. Fincher	9.30 A.M.	1.00 P.M.	3½
3. Mrs. Allan	1.00 P.M.	2.00 P.M.	1
4. Mrs. Fincher	2.00 P.M.	6.00 P.M.	4
5. Mrs. Allan	6.00 P.M.	Midnight	6

The shifts for the remainder of the summer season will change each week, and will be as follows:

June 30th to July 6th.....	Schedule No. 1.
July 7th to July 13th.....	Schedule No. 2.
July 14th to July 20th.....	Schedule No. 1.
July 21st to July 27th.....	Schedule No. 2.
July 28th to August 3rd.....	Schedule No. 1.
August 4th to August 10th.....	Schedule No. 2.
August 11th to August 17th.....	Schedule No. 1.
August 18th to August 24th.....	Schedule No. 2.
August 25th to August 31st.....	Schedule No. 1.
September 1st to September 7th.....	Schedule No. 2.
September 8th to September 14th.....	Schedule No. 1.
September 15th to September 20th.....	Schedule No. 2.

Under no circumstances should a deviation from this schedule be made without first notifying and securing permission from Mr. Joffe.

As the Yellowstone Park Lodge & Camps company lodges are now connected up with the Hotel Company lines and will put their calls through the hotel switchboard, no special hours will be reserved for the Company this summer. Calls coming through the Government switchboard from the various lodges should be carefully recorded.

"Visiting" on the lines is prohibited.

June 18, 1929.

CIRCULAR NO. 11.

During the summer season of 1929 the plugs on the switchboard will be as follows:

Buffalo Ranch (No. 10) -- Wright Residence (No. 66)
Canyon (No. 14) -- Daum Residence (No. 95)
Gardiner Checking Station (No. 6) -- Edwin Residence (No. 73)
Gardiner Exchange (No. 7) -- Doctor's Residence (No. 65)
Lake (No. 15) -- Joffe Residence (No. 83)
Long Distance (No. 1) -- Hospital (No. 64)
Old Faithful (No. 4) -- Ranger Barracks (No. 81)
Power Plant (No. 34) -- Dale Residence (No. 72)
Tower Falls (No. 9) -- Eggen Residence (No. 67)

The switchboard is open from 6:30 A.M. until 12 midnight.
The above night plugs will be placed from midnight until 6:30 A.M.

Roger W. Toll
Superintendent

Department of the Interior
National Park Service
Yellowstone National Park
Yellowstone Park, Wyoming.

June 29, 1929.

CIRCULAR NO. 12.

Effective beginning June 30, 1929, the following people will report for all-day service on the Sundays and holidays stipulated, their duties being to take care of people coming into the office wishing to see the Superintendent and those making inquiry concerning the park or its business, and to refer tourists to the information office, etc.

June 30	Mr. Edwin
July 4	Miss Martin
July 7	Miss Jamieson
July 14	Mr. Hickey
July 21	Miss Waring
July 28	Mr. Edwin
Aug. 4	Miss Jamieson
Aug. 11	Miss Sabin
Aug. 18	Miss Hymen
Aug. 25	Miss Martin
Sept. 1	Mr. Edwin
Sept. 2	Miss Hymen
Sept. 8	Mr. Hickey
Sept. 15	Miss Sabin
Sept. 22	Miss Waring

There is no objection to interchanging of dates, provided Mr. Joffe is notified, so that we may know whom to expect on duty.

This assignment does not necessarily mean that the employees of this office will not be required to work on Sundays or holidays other than above outlined, as the condition of the work of the various employees should determine whether or not it is necessary for them to work on Sundays or holidays in order to keep their work current.

Roger W. Toll
Superintendent
