FOREWORD

This publication is a 1981 directory of manufacturers and a report of round timber processed in Georgia during calendar year 1980. It is intended as a marketing guide in bringing buyer and seller together where Georgia grown or manufactured forest products are involved. The utilization report is designed for foresters and others interested in the evaluation of timber production trends. The directory, which contains 1,396 listings, will be of benefit to persons or firms seeking to buy or sell specific items.

The directory and report includes companies which manufacture or process wood. Pulpwood yards and naval stores facilities are also included in order to make the listing more complete as a marketing aid.

Primary industries are those which use round timber, and 667 listings are in this section. Secondary industries are those using partially manufactured wood, such as lumber or plywood as raw material. Including naval stores, 729 companies are listed as secondary processors. Of the 729, 59 were classed as both primary and secondary, due to the nature of their operations or products.

Classification of some plants is questionable because of varied products and raw materials. Therefore, omission of a firm is no reflection upon its activities, nor is inclusion a recommendation.

INTRODUCTION TO UTILIZATION SECTION

In 1980, Georgia's wood-using industries processed 2.415 billion board feet of round timber excluding pulpwood. Of this volume, 83 percent was pine and 14 percent was oak, gum, and poplar. Cypress, hickory, maple, and several other minor species accounted for the remaining 3 percent.

Sawmills utilized 2.019 billion board feet or 84 percent of the total. Another 307 million board feet were used by the veneer and plywood industry. Treating plants processed 55 million board feet equivalent, mostly pine, and other roundwood processors accounted for 33 million board feet.

Production data are listed by forest survey units (Fig.2) to show geographic distribution of industries and timber production. This also allows comparison to previous industry surveys and Georgia Forest Survey data.^{1/}

SAWMILLS

In early 1981, 248 Georgia sawmills were in operation. Fifty-seven mills each produced 10,000 MBF or more during 1980 and accounted for 79 percent of the year's lumber output. Thirty-eight percent of 1980 lumber was manufactured by 14 mills cutting over 40,000 MBF each, and 24 percent was manufactured by 8 mills cutting 50,000 MBF or more. Chipping canters were reported at 38 facilities and 111 plants processed log volumes consisting of at least 30 percent hardwood species.

VENEER AND PLYWOOD

Six southern pine plywood plants accounted for 77 percent of timber used by Georgia's veneer and plywood industry in 1980. The industry's 22 primary mills processed 307 million board feet. Five additional plants are secondary only as no veneer is manufactured from logs.

TABLE 5.--TIMBER PROCESSED BY VENEER AND PLYWOOD INDUSTRY, 1980

Forest Survey Unit	No. : Mills	Total : (MBF)	Yellow : Pine	Cypress	Gum	Poplar	Oak	Hickory	Other Hdwds.

TREATING PLANTS

Wood treating plants reported production of 4.7 million fence posts and 55.2 million board feet of poles and piling in 22 locations during 1980. An additional 18 companies treated other products only.

The primary processors section of this directory lists only plants treating poles, piling or posts. These plants are again listed under secondary processors along with the 18 other companies.

Not included above are 6 mills producing 2.1 million untreated posts and 9 million board feet of untreated poles. More than half of this untreated material is sent to Georgia treating plants.

Total	22	55,178	4,663

OTHER ROUND TIMBER PROCESSORS

In this category are 15 plants which processed 33.2 million board feet into products in 1980. These firms manufacture round timber into items which are not usually sold on a lumber measure basis. This includes 1 excelsior, 9 box and pallet, 1 handle, 1 cleat, 2 log home and 1 flooring mill.

TABLE 7.--VOLUME PROCESSED BY OTHER ROUND TIMBER USERS, 1980

Total	15	33,242	5,004	8,144	2,890	12,850	1,063	3,291

PULP AND PAPER INDUSTRY

Listed in this directory are 297 yards and dealers engaged in buying, cutting, shipping, and otherwise processing wood for use in pulp and paper manufacture. Many of these ship directly from the forest to the pulp mill with no intermediate concentration yard. Also included in the directory are 35 chip mills, of which 20 were built as portable full tree chippers. Several of these portable chippers are stationary mounted now, but retain their original design capability.

^{1/} Southern Pulpwood Production, Southeastern Forest Experiment Station, Asheville, NC.

^{2/} Additional 2,811,200 cords of wood residues brings total pulpwood production to 8,812,453 cords.

RESIDUE DISPOSAL BY PRIMARY PROCESSORS

Excluding pulp mills, 82 percent of bark from primary processors was used as industrial fuel in 1980. Of this bark fuel, 51 percent was used on site and 49 percent was sold or shipped to other sites. When pulp mills are included, 86 percent of all Georgia bark was used as industrial fuel.

The largest use of coarse or chippable residue was fiber products, and 95 percent of the state total was in this use class. Less than 2 percent was used as industrial fuel, less than 1 percent was used as domestic household fuel, and 1 percent was unused.

Sawdust was the largest volume of unused wood residues at non-pulp mills, with 7 percent reported as not used. Table 9 lists residue production and disposal, but does not show domestic firewood produced by individuals or woodyards.

1/ Data compiled by Southeastern Forest Experiment Station, USFS.

2/ Includes bark from pulp mills.

USE OF THE DIRECTORY

Mills manufacturing round timber into products are listed in the primary processors section by county and type. It is the intent of this section to provide market information for persons or firms dealing in stumpage, poles, lumber, ties, etc. Major products are listed, but often minor items such as survey stakes or pallets are not.

Plants using lumber or other partially processed wood as a raw material are listed alphabetically by type and county order in the secondary processors section. To locate a particular product, related plant types should be checked also. Several plant types such as pallets and wood treating have both primary and secondary listings. In such instances, both are included in the secondary processors section to make them easier to locate.

A county alphabetical code sheet is included with the directory for county location. Employment size class for all listings and physical facilities and species abbreviations are as follows:

Employment Size Class

A = 1 - 10	D = 51 - 100
B = 11 - 20	E = 101 - 200
C = 21 - 50	F = Over 200

Facilities Code

1. Sawmill	4. Chipper
1C. Sawmill With Chip Canter	5. Dry Kiln
1H. Sawmill Using 30%+ Hardwood	6. Pressure Treating Cylinder
2. Planer	8. Veneer Lathe
3. Debarker	11. Portable Full Tree Chipper
	13. Firewood Splitter

Species Code

Cyprss	-	Cypress
Hic	-	Hickory
O Hdwd	-	Other Hardwoods
O Sftwd	-	Other Softwoods
W Pine	-	White Pine
Y Pine	-	Yellow Pine
