**National Park Service Annual Science Report**

**1989 INVENTORY OF RESEARCH ACTIVITIES IN THE NATIONAL PARKS**

Science Report NPS/NRWV/NRSR-90/02

United States Department of the Interior • National Park Service

## **BACKGROUND INFORMATION ON 1989 RESEARCH ACTIVITIES**

This report lists the research projects and related studies ongoing or completed in national park units in calendar year 1989. Included are those projects which were funded entirely or partially by the National Park Service (NPS) and/or carried out by NPS personnel, as well as projects which were funded and/or carried out by non-NPS individuals or organizations. A total of 1,994 projects are included in this listing.

For each project, the name, address, and phone number (where available) of the lead investigator are shown in this report. Names of coinvestigators are available from the source data base. Funding is shown with any funds from the National Park Service listed on the top line, and the total funds provided by non-NPS sources shown directly below. Funding data on some projects are incomplete; funding shown as "0" on the report, therefore, may not necessarily mean the project did not receive funding from the National Park Service or other sources.

---

As the nation's principal conservation agency, the Department of the Interior has responsibility for most of our nationally owned public lands and natural and cultural resources. This includes fostering wise use of our land and water resources, protecting our fish and wildlife, preserving the environmental and cultural values of our national parks and historical places, and providing for enjoyment of life through outdoor recreation. The department assesses our energy and mineral resources and works to ensure that their development is in the best interests of all our people. The department also promotes the goals of the Take Pride in America campaign by encouraging stewardship and citizen responsibility for the public lands and promoting citizen participation in their care. The department also has a major responsibility for American Indian reservation communities and for people who live in island territories under U.S. administration.
