*Director General.*—Leo S. Rowe.*Assistant Director.*—Pedro de Alba.*Counselor.*—William Manger.*Foreign Trade Adviser.*—Rosa Keatley.*Treasurer.*—Lowell Curtiss.*Chief Clerk.*—William V. Griffin.*Librarian.*—Janeiro V. Brooks.

The Pan American Union (formerly International Bureau of the American Republics) is the official international organization of all the republics of the Western Hemisphere, founded and maintained by them for the purpose of exchanging mutually useful information and fostering commerce, intercourse, friendship, and peace. It is supported through their joint contribution, each nation annually paying that part of the budget of expenses which its population bears to the total population of all the republics. Its general control is vested in a governing board made up of the representatives in Washington of all the Latin-American governments and the Secretary of State of the United States. It is strictly international in its scope, purpose, and control, and each nation has equal authority in its administration. The Pan American Union occupies and owns a monumental building on extensive grounds in Washington, D. C., overlooking the White House park.

# NATIONAL ADVISORY COMMITTEE FOR AERONAUTICS

The National Advisory Committee for Aeronautics was established by act of Congress approved March 3, 1915 (U. S. C., title 50, sec. 151), and the membership increased from 12 to 15 by act approved March 2, 1929 (U. S. C., Suppl. V, title 50, sec. 151 (a)). Its membership is appointed by the President and consists of two representatives each of the War and Navy Departments from the offices in charge of military and naval aeronautics, two representatives of the Civil Aeronautics Authority (Civil Aeronautics Act of 1938), one representative each of the Smithsonian Institution, the United States Weather Bureau, and the National Bureau of Standards, together with six additional persons who are "acquainted with the needs of aeronautical science, either civil or military, or skilled in aeronautical engineering or its allied sciences." All the members, as such, serve without compensation. The law provides that the Committee shall "super-  
vise and direct the scientific study of the problems of flight, with a view to their practical solution \* \* \*," and also "direct and conduct research and experiment in aeronautics." Under the rules and regulations formulated by the Committee and approved by the President, there are technical subcommittees organized along lines similar to the main Committee and including specially appointed representatives of the War and Navy air organizations and the Civil Aeronautics Authority, with all members serving as such without compensation. The major technical subcommittees are those dealing with aerodynamics, power plants for aircraft, aircraft construction and operating problems. The aeronautical research needs of the War and Navy Departments and the Civil Aeronautics Authority are referred to and coordinated by the Committee, and programs of fundamental research as agreed upon to meet the needs of all governmental agencies are executed under the centralized and direct control of the Committee at its research stations known as the Langley Memorial Aeronautical Laboratory, at Langley Field, Va., the Ames Aeronautical Laboratory, at Moffett Field, Calif., and the Aircraft Engine Research Laboratory, at Cleveland, Ohio. The Committee also operates at its Washington headquarters the Office of Aeronautical Intelligence, for the collection, classification, and dissemination of scientific and technical data on aeronautics comprising the results of Committee researches and similar information obtained from all parts of the world. The Committee also passes upon the merits of aeronautical inventions and designs submitted to any branch of the Government.
