REPORT

OF THE

COMMISSIONER OF THE GENERAL LAND OFFICE

TO THE

SECRETARY OF THE INTERIOR

FOR THE

FISCAL YEAR ENDED JUNE 30, 1922

WASHINGTON GOVERNMENT PRINTING OFFICE 1922

THE GENERAL LAND OFFICE.

The Colonial Congress, September 16, 1776, passed a resolution making grants of lands to certain officers and soldiers, such lands to be provided by the United States and the expense of procuring them to be borne by the States as other expenses of war.

by the States as other expenses of war. May 20, 1785, and thereafter, the Board of Treasury under the Confederation made sales of public lands and gave certificates of purchase. The first patents for lands by the Government were issued by this board, the first was dated March 4, 1788, and the last March 3, 1789. The act of August 7, 1789 (1 Stat. 49), gave the Secretary of War supervision over the granting of lands to persons entitled thereto for military services rendered the United States, and by the act of September 2, 1789 (1 Stat. 65), the Secretary of the Treasury was charged with the execution of such duties relative to the sale of the lands belonging to the United States as might by law be required. The act of May 18, 1796 (1 Stat. 49), for the sale of lands in the Northwest Territory, now in the State of Ohio, provided for a survey or general, defined his duties, and directed that plats of survey be sent to the Secretary of the Treasury, who thereafter gave notice of sales and performed other executive try agatents of land, etc., with the aid of registers and receivers of the district land offices after 1810, and remained so until the organization of the General Land Office in his department.

grants of land, etc., with the aid of registers and receivers of the district land offices after 1810, and remained so until the organization of the General Land Office in his department. April 25, 1812 (2 stat. 716), Congress created the office of the Commissioner of the General Land Office and made his bureau subordinate to the Treasury Department, giving him authority to issue patents and perform duties formerly executed by the several departments. The Secretary of the Treasury, by acts of Congress, thereafter was given general supervision of the Commissioner of the General Land Office, and ap-peals from the action of the commissioner were made to him. By act of July 4, 1836 (5 Stat. 107), the General Land Office was reorganized, and the executive duties appertaining to the survey and sale of the public lands and the issuance of patents, were devolved on the commissioner; and a principal clerk of the public lands, a principal clerk of private land claims, a principal clerk of the surveys, a recorder of the General Land Office, and a solicitor of the General Land Office, and a secretary to sign the President's name to all land patents were authorized. By act of March 3, 1849 (9 stat. 395), Congress created the Home (now Interior) Department, and by sec-tion 3 of that law provided that the Secretary of the Interior "shall perform all the duties in relation to the General Land Office of supervision and appeal now discharged by the Secretary of the Treasury." The General Land Office has since remained a bureau under the supervision of the Secretary of the Interior.

The General Land Office has since remained a bureau under the supervision of the Secretary of the Interior.

REPORT OF THE COMMISSIONER OF THE GENERAL LAND OFFICE.

DEPARTMENT OF THE INTERIOR, GENERAL LAND OFFICE, Washington, August 31, 1922.

DEAR SIR: I have the honor to submit the following report of the transactions of the General Land Office during the fiscal year ended June 30, 1922:

AREA OF LAND ENTERED AND PATENTED.

The total area of public and Indian lands originally entered and allowed during the fiscal year ended June 30, 1922, is 10.367,153.15 acres, not including 215,419.79 acres embraced in finals not heretofore counted as original disposition of land. The latter area is constituted as follows: Public auction, 74,811.52 acres; abandoned military reservations, 554.21 acres; cash and private sales, individual claimants and small holding claims, 10,761.15 acres; preemption entries, 10,360.22 acres; soldiers' additional homesteads, 6,410.93 acres; timber and stone entries, 42,557.96 acres; mineral entries, 69,317.97 acres; coal entries, 645.82 acres. The area of 10,367,153.15 acres is a decrease of 5,264,477.81 acres as compared with the area originally entered and allowed during the fiscal year 1921. Of the total area originally entered and allowed during the fiscal year 1922, 7,070,175.54 acres were allowed under the stock-raising homestead act of December 29, 1916.

The area patented during the fiscal year 1922 is 12,904,821.57 acres, an increase of 2,787,011.82 acres as compared with the fiscal year 1921. Of the above area 9,632,635.57 acres were patented under the homestead laws, an increase of 1,459,833.41 acres, not including as homesteads 6,242.40 acres patented as soldiers' additional entries.

CASH RECEIPTS AND EXPENDITURES.

The total cash receipts from sales, leases, and other disposition of public lands (including receipts for copies of records, sales of Government property, etc.) for the fiscal year 1922 were \$8,813,659.16; from sales of Indian lands, \$545,711.91; and from leases of naval petroleum reserve lands, \$2,425,324.65, an aggregate of \$11,784,695.72, all of which was deposited in the Treasury.

Five per cent of the net receipts from cash sales of public lands are paid to the public land States within which such sales were made, and the balance of such net receipts from the States included within the reclamation act, together with the net receipts from fees and commissions from the same States, are paid into the reclamation fund; 90 per cent of the receipts under the mineral leasing act from lands outside of naval petroleum reserves are divided between the States

2 REPORT OF COMMISSIONER OF THE GENERAL LAND OFFICE.

from which the minerals (principally oil) were taken and the reclamation fund; the receipts from sales of reclamation town sites sales of lands in the Yuma auxiliary reclamation project, and royalties and rentals from potash deposits are deposited directly into the reclamation fund; the receipts from sales of Indian lands are deposited to the credit of the various Indian tribes. All other moneys received were covered into the Treasury to the credit of the general fund. The following table shows the disposition of these moneys:

	Disposition in Treasury.				
Source of receipts.	General fund.	Reclamation fund.	State fund.	Total.	
Sales of public lands. Fees and commissions. Receipts under mineral leasing act. Receipts under mineral leasing act, naval pe- troleum reserve lands. Sales of land and timber in Oregon & California R. R. grant. Sales of reclamation town sites. Sales of town lots, Alaska. Sales of timber, Alaska. Royalties on coal leases, Alaska. Aggregate				11, 784, 695. 72	

NOTE.—The figures in the above table are subject to change upon final examination of the receivers' accounts in the General Land Office and the General Accounting Office.

It may be noted from the above table that after deposits of receipts for the benefit of special purposes, reclamation fund, State fund, and Indian trust funds there remains a balance of \$3,848,598.42 to the credit of the general fund to be appropriated by Congress. As the total expenditures for the conduct of the business of the General Land Office, including the expenses of district land offices for salaries and commissions of registers and receivers and incidental expenses (\$825,521.02), for the fiscal year 1922, amounted to \$3,200,168.86, it will be seen that the cost of operation of the General Land Office was \$648,429.56 less than the amount credited from its receipts to the general fund.

Disbursements from the following special deposit trust funds and reimbursable appropriations are not included in the above figures as receipts or expenditures: From deposits by individuals for surveying public lands, \$54,250.67; from completing surveys within railroad land grants, \$24,712.84; from opening Indian reservations (reimbursable), \$185.12; from deposits by individuals for resurveys, \$1,010.01; from surveying and allotting Indian reservations (reimbursable), \$32,310.82; and from Indian moneys, proceeds of labor, surveying, etc. (Crow act of June 4, 1920), \$9,526.28.

3

FIELD SERVICE.

The sum made available for the field service for this year was \$550,000. The average number of field employees, in addition to the nine chiefs of field division, maintained under this appropriation during the year was 100, and in addition thereto the cost of maintenance of offices of the chiefs of field division and the clerical assistance required for them was paid from this appropriation.

The total amount of cash collected and turned into the Treasury as the result of the work of the field force during the fiscal year was \$199,059.79; of this amount \$11,267.96 was in settlement of timber trespass cases and \$8,677.45 was secured from timber sales; \$179,-114.38 was recovered through civil and criminal action brought by the Departmennt of Justice in cases of depredations on the public lands and violations of the public land laws. In addition there has been turned into the Treasury \$4,103.11, which represents royalty on coal mined during the past year from a tract in Colorado.

As a result of investigations by the field employes, 117,535 acres have been restored during the year to the public domain. Of this amount 105,600 acres represent fraudulent entries (taking an average of 160 acres to each entry) canceled through proceedings based upon special agents' reports; 11,935 acres restored to the open range by the abatement of unlawful inclosure without suit.

Special agents have investigated and reported 17,570 cases, of which 3,071 were adversely and 14,499 favorably reported; 287 hearings in Government contest cases have been held.

Civil suits in 48 cases were recommended to the Department of Justice as the result of investigations made during the year; 38 suits were won and 14 lost. As a result of the successful prosecution of these suits \$178,664.38 was recovered and 1,477.29 acres were restored to the public domain.

Fifty-one indictments were reported for offenses under the public land laws. Of the criminal cases tried during the year 11 resulted in convictions, under which there were 4 prison sentences imposed and fines amounting to \$450 paid.

The accomplishments of the field service for the past year compares favorably with those of preceding years. There were 14,319 cases pending for investigation in the field at the close of the fiscal year 1921, and at the close of the fiscal year 1922 there were 11,018 cases pending for investigation in the field, a total reduction of 3,301 cases.

Motor-propelled vehicles.—Provision was made in the 1922 appropriation for protecting public lands and timber, for the allotment of \$35,000 for the purchase and maintenance of motor-propelled vehicles. Nine new cars were purchased and exchange made of 12 cars.

The number of miles traveled with Government-owned automobiles was 306,935, at a total cost of \$21,607.70, which included all operating expenses, or an average cost of 7 cents per mile for the 34 cars in use. The cost per day was \$4.25 and the cost per month \$1,800.64.

The expense of hired automobiles was \$43,226.60 for 211,628 miles traveled, or an average cost of 20 cents per mile, \$11.83 per day, \$3,602.21 per month.

SURVEYS IN THE FIELD.

The gradual improvement in economic conditions during the fiscal year has had an appreciable influence on public land survey production and costs throughout the country and has facilitated the work in many ways in every district. Perhaps the most important change for the better is noticeable in the type of men available for field work; the wage scale to be sure has decreased but little, but the producing capacity of field assistants of to-day is greater than it has been for the past several years. The continued although slight decline in the price of foodstuffs and in some classes of material is also partly accountable for reduced survey costs, while better camp transportation facilities through the use of motor trucks and careful party management is steadily making for more economical work.

General Land Office surveys as pointed out in my last annual report are gradually becoming more complicated on account of the detached position, the limited extent, and the ever increasing difficulties encountered in many of the areas left for survey, and to growing obliteration of the older surveys; the production, however, this year of such work as can be measured on a mileage basis amounted to over 27,000 miles of line at an average cost of less than \$18 per linear mile, a greater output at lesser cost than has been accomplished for several years past.

A large program of field work along Red River, Okla., has been carried to completion during the past fiscal year. This work was undertaken in preparation for trial of suit, now pending in the United States Supreme Court, involving the location of the Texas-Oklahoma boundary line, in which suit the United States has intervened. (See Annual Report of the Commissioner of the General Land Office for 1920, p. 33.) The program carried to completion included the survey and mapping of the entire river bed from the one-hundredth meridian to the eastern boundary of Texas, a distance of over 600 miles. Eighty map exhibits, bound in atlas form. were introduced in evidence before the Supreme Court.

The volume of miscellaneous surveys executed during the fiscal year, including town sites, Indian allotments, surveys to aid in suits before the courts, field examinations and investigations, private land claims, and fragmentary surveys, boundary lines, special surveys in Alaska, cooperative work with the United States Coast and Geodetic Survey, the National Park Service and Forest Service, and resurveys, and all other survey work which can not be gauged by any standard unit of measurement, was materially greater than that of last year, and because of the decline in cost of field-party maintenance the cost of such surveys was less than for any period since the war. On the whole, survey accomplishments for 1922 show substantial gains toward pre-war standards and are altogether satisfactory.

ACCEPTED SURVEYS.

The record for acceptances of surveys and resurveys accomplished during the last fiscal year shows a falling off from that of the previous year, by reason of increased difficulties encountered in the field. The area of lands surveyed and resurveyed amounted to 6,151,892 acres. It will be observed, however, that the acreage of surveys approved and forwarded by the surveyor general for examination and acceptance aggregate 7,430,400 acres which really indicates the activity of the surveying service in the field, and is 260,000 acres more than the amount of accepted surveys reported in 1921.

The banner State for 1922 is Arizona. with its record of 1,486,381 acres, which area is over twice as much as any other surveying district.

SUMMARY OF WORK IN OFFICES OF UNITED STATES SURVEYORS GENERAL.

Survey and resurvey of the public lands.—This year there were approved in all of the offices 443 townships, covering 23,173.47 miles and 5,698,000.74 acres, which is over a million acres more than were approved last year. The average office cost per mile was \$2.37, field cost, \$30.40, or a total of \$32.77, and the total average cost per acre was \$0.133. While the office cost is slightly less than it was last year, the average cost per acre is a little more than it was last year, due to the fact that the surveys are becoming more complicated each year.

Mineral surveys.—This year we approved 475 mineral surveys, embracing 1,657 locations, at an average cost to the applicant of \$15.42 per location. This is the smallest number of surveys approved since 1919. At the beginning of the fiscal year there were pending in the offices 119 surveys, embracing 485 lodes, and at the end of the year 76 surveys, embracing 486 lodes. This work has been kept current in every office for the past year, and in no case has the work been more than 60 days in arrears.

Forest homestead entries.—There were approved 246 homestead entry surveys within national forests, at an average cost of \$9.02. At the beginning of the year 45 surveys were pending office examination and 16 at the end of the year. This work is practically completed, and next year there will probably be even fewer surveys approved, as many of the offices have been advised by the Forest Service that surveys of this character in the different districts have been completed.

Indian surveys.—Surveys in Indian reservations are of such a peculiar nature that it is not practicable to return them on an acreage basis. There were 1,931.64 miles approved during the year, at an average cost of \$20.94 per mile for both office and field work. During the fiscal year 1921 there was no appropriation available for Indian work; consequently there was an arrearage in this work at the beginning of the fiscal year. There were 2,555 miles pending in the offices at the beginning of the year and 2,597.64 received during the year, the returns having been filed by the field engineers. At the end of the year there were 2,378 miles pending in the offices, which I hope will be approved by the end of the calendar year, as a limited amount of money has been appropriated for this work.

Supplemental plats.—This year there were 904 supplemental and segregation plats prepared, as against 739 last year. As many of these plats are prepared to accommodate entrymen, their preparation takes precedence over the other work in the offices, and they are gotten out immediately upon receipt of instructions from the General

5

Land Office. When the number of supplemental plats prepared is compared with the number of township and mineral plats approved it can be easily seen that a considerable portion of the draftsmen's time in each office is occupied on this work.

Copies of records.—There were earned and deposited to the credit of the United States Treasurer \$6,241.51 on account of special deposits, earned moneys, for the preparation of transcripts of field notes, and copies of other records in these offices. This work varies in amount from year to year according to the needs of the general public, and it is the policy of the offices to prepare it promptly upon receipt of the necessary deposit in order to accommodate the public.

In general.—The usual amount of \$700,000 was appropriated for surveying the public lands during the fiscal year 1922, while only \$650,000 was appropriated for 1923. The State of Utah has supplemented this allotment by a legislative act of March 10, 1921, providing for a revolving land survey fund of \$50,000, to be used until all the public lands in the State have been surveyed. This legislation by the State is authorized by the act of August 18, 1894 (28 Stat. 394), and is typical of the interest all of the Western States are taking in the completion of the public land surveys.

As no appropriation was made for the maintenance of the office of surveyor general in Huron, S. Dak., it was closed at the end of the fiscal year, and the public records were disposed of in accordance with the provisions of section 2218 United States Revised Statutes. Inasmuch as the public land surveys had not been completed in the Black Hills district, which is covered to a great extent by approved and patented mining claims, the greater part of the mineral records were transferred to the office of the assistant supervisor of surveys in Nebraska, who is charged with the completion of the South Dakota surveys. As soon as the surveys have been made in the field and the returns approved by the Commissioner of the General Land Office, the mineral records will be turned over to the State officials in South Dakota.

As indicated by the consolidated yearly report, there is no arrearage in any of the offices, and the surveys pending will be disposed of by the time the new work is presented for office examination.

MAP MAKING AND DRAFTING.

Due to many additions and corrections on the copper plates, base of United States map 1922, showing the published United States census population bulletins, the map has been necessarily delayed beyond the usual date of issuance. The revision as to census data is not yet fully furnished, but it is hoped that it will be possible to complete this feature for the 1923 edition.

The map of Oregon has been revised and issued, and new compilations of Washington and Utah maps are under way. Revisions of the Nebraska map have been completed and are now in the hands of the lithographer for reproduction. Maps of Wyoming, California, and Florida are in course of revision.

Maps of the Oklahoma-Texas boundary survey required by the Department of Justice, in the case of the State of Oklahoma v. the State of Texas, in the Supreme Court of the United States were supplied and received most favorable comments from officials of the Department of Justice.

A contribution to the Brazilian International Centennial Exposition at Rio de Janiero of an enlarged facsimile of the General Land Office map, $10\frac{1}{2}$ by $13\frac{1}{2}$ feet, with five charts lettered in English, Portuguese, and Spanish, describing activities of the General Land Office, is worthy of special mention.

There were 6,453 photolithographic copies of official township plats of survey disposed of by sale, for which \$3,227.50 were received, and 8,197 copies disposed of to this and other bureaus for official use.

The loss of one of our best map compilers, by death, has very much handicapped our map work, due to the inability to replace him because of the fact that the salary offered has been no inducement to men of the ability desired. In this connection I also call attention to the recent resignation of an experienced engraver, compiler, and draftsman, who has made all corrections and additions on the copper-plate base of the United States map for the past 20 years. His place will be extremely difficult, if not impossible, to fill on account of the small salaries paid in our bureau for this class of work.

TRACT BOOK NOTATIONS.

The number was 379,396; this includes 95,183 appeals and other miscellaneous cases; 7,221 Indian allotments, 31,512 final and cash certificates, and 38,248 original entries; plats posted, 1,529.

Posting and preliminary examinations.—Original entries posted 38,248; 30,405 were passed and 7,843 were found defective or held for further action on account of conflicts or defects. The number 38,248 includes 20,105 stock-raising homesteads.

Withdrawn applications.—Homestead, timber and stone, and isolated tract applications withdrawn or rejected and so noted, 3,470, withdrawn being mostly of applications under the enlarged and stock-raising homestead acts.

Supplemental patents.—Fifty-eight supplemental patents under the act of April 14, 1914 (38 Stat. 335), were authorized.

Withdrawals and classifications.—Withdrawals, etc., in 1,774 letters and executive orders were noted. These include withdrawals for stock driveways, national forests, power-site reserves, restored lists, designations under the various homestead acts, classifications, etc.

Cancellations and relinquishments.—Four thousand two hundred and twenty-four entries were canceled for failure to make final proof within the statutory period and 19,359 were relinquished and so noted.

HOMESTEAD AND KINDRED ENTRIES.

Pending at beginning of fiscal year, 9,715 cases. Received, 59,544, as against 63,816 the previous year. Pending at end of year, 2,922.

There were approved for patenting 28,922 final entries of all kinds, as against 28,907 the year previous. Additional evidence was required in 3,195 defective final entreis, as against 5,620 the previous year.

Applications to make second entry acted upon, 2,924, against 3,587 the previous year; applications to amend acted upon, 2,496, against 1,876 the previous year; applications for sale of isolated tracts acted upon, 2,145, against 3,612 the previous year; applica-

7

tions for leave of absence and for extension of time within which to establish residence acted upon, 3,081, against 2,886 the year previous; miscellaneous petitions to designate lands acted upon, 351, against 776 the year previous; defective original entries acted upon, 15,503, against 17,066 the previous year; appeals from action of local officers acted upon, 7,404, against 5,321 the previous year, making a total of applications for second entries, isolated tracts, amendments, extension of time, leaves of absence, miscellaneous petitions to designate, appeals, and original homesteads acted upon during the year, 33,904, against 35,034 of the previous year.

This work is practically current, and the oldest cases are being assembled and disposed of rapidly. Of the 2,922 cases pending at the close of the year 2,385 are defective original entries received in the homestead division since January 1, 1922. In the future cases will be disposed of in the order of their receipt.

SOLDIERS' ADDITIONAL HOMESTEAD RIGHTS.

During the last fiscal year 124 new cases have been received and 180 applications have been disposed of by issuance of patent on final adjudication, leaving 165 pending, of which only 26 are ready for adjudication, making this work practically current.

STOCK-RAISING HOMESTEADS.

The transactions under the act of December 29, 1916 (39 Stat. 862), authorizing the entry of public lands suitable for grazing purposes are worthy of note. The records of the land classification board of the Geological Survey show that since the passage of this act, 100,079 petitions for designation of lands subject thereto have been received, and 96,178 have received consideration; the total area designated under these petitions aggregates 111,606,083 acres; the total area canceled, 867,186 acres; designations outstanding at the end of this fiscal year, 110,738,897 acres.

During the past year 17,922 entries were allowed under this act, covering an area of 7,070,175.54 acres. The total number of entries allowed under this act since its passage is 80,323, embracing an area of 31,407,991.82 acres.

Eight thousand three hundred and ninety-nine patents were issued under the act during the past year, embracing 2,919,819.67 acres. The total number of patents issued under this act up to June 30, 1922, is 14,130, for an area of 4,550,416.01 acres.

In the table of statistics, at page 76, will be found a tabulated statement showing the distribution of stock-raising homestead entries by States and land districts.

STOCK DRIVEWAYS.

Since the last annual report was submitted, 13 stock driveways have been created under section 10 of the act of December 29, 1916 (39 Stat. 862), and 53 driveways theretofore established have been modified, based upon investigation by our field service and my recommendation. The area withdrawn for such purpose during the period aggregates 96,590 acres, inclusive of scattered entries or patented tracts, and that released from such withdrawal, 101,863 acres.

The total gross area included in driveway withdrawals at the close of the fiscal year is 9,010,328 acres, and is distributed by States as follows: Arizona, 417,186 acres; California, 33,161 acres; Colorado. 209,875 acres; Idaho, 712,087 acres; Montana, 213,678 acres; Nevada, 3,527,582 acres; New Mexico, 1,110,117 acres; Oregon, 410,403 acres; South Dakota, 17,635 acres; Utah, 1,230,981 acres; Washington, 10,919 acres; and Wyoming, 1,116,704 acres.

TOWN-SITE ENTRIES AND TOWN-LOT SALES.

A number of town sites have been created and surveyed on the public domain, and public sales have been held or ordered held of several town sites so established during the fiscal year. This activity has extended from Alaska on the north to Florida and Louisiana on the south. The town site of Harding, located just north of Miami, Fla., fronting on the Atlantic Ocean, was named in honor of President Harding. The plat of the survey of this town site has been accepted, the appraisal of the town lots made, and it is contemplated opening the town site and having a public sale of lots during the coming winter tourists' season.

The town site of Veteran, Wyo., located within the North Platte irrigation project, was on May 20, 1922, recommended to be established, and within less than five weeks thereafter the survey was approved, the appraisal made, and a public sale of the lots in the town site held, at which 38 lots were sold for the aggregate sum of \$5,835, the sale being held on June 27, 1922, at the town site.

A final public sale of town lots was held in the town of Omak, State of Washington, on June 15, 1922, aggregating the sum of \$5,277.

The town site of Bonita, La., was approved for patent May 5, 1922. The trust for the town site of Fairbanks, Alaska, which was established in 1909, has been practically closed and there is a balance after deducting all expenses of administration and other expenditures of about \$7,200.

The number of town lots upon which final payments have been made and certificates approved for patent during the fiscal year is 1,846.

MINNESOTA DRAINAGE.

The act of May 20, 1908 (35 Stat. 169), extended the Minnesota drainage laws to the public lands in said State when subject to entry. Under said laws the lands are assessed for the State drainage projects and where the records do not show that said drainage tax has been paid the lands are sold by the State authorities. The purchaser at the tax sale is required to pay to the United States the price fixed for the land, usually \$1.25 per acre, and assume the obligation of paying the State drainage taxes. During the past year there were approved for patenting, not including final homesteads which involve drainage charges, 123 cash entries made under said drainage act involving an area of about 19,680 acres. Up to the present time there have been patented under said act approximately 1,021,920 acres.

10280 - 22 - 2

RIGHTS OF WAY.

Railroad.—During the past year 62 railroad right-of-way applications were received, which together with those pending July 1, 1921, made a total of 238 before the office for action; of these 115 were finally disposed of, as against 53 finally disposed of during the previous year; 105 applications are pending office action as against 176 last year.

All other rights of way.—Three hundred and ninety-two irrigation and miscellaneous applications were received and 417 were finally disposed of, 98 remaining pending office action as against 123 at the beginning of the year. While the functioning of the Federal Power Commission took away from the General Land Office applications under act of February 15, 1901 and March 4, 1911, for reservoirs, canals, and transmission lines used wholly for power purposes, the large number of new applications for pipe lines, under the oil leasing act of February 25, 1920, balanced the loss, so that the receipts were about the same as the previous year.

Forfeiture.—Three hundred and thirty-eight approved rights of way have been canceled (nearly all of them irrigation) on relinquishment, as against 255 last year; 29 forfeiture cases are pending the outcome of suits instituted by the Department of Justice, 9 of which were recommended during the past year, and two canceled as a result of legal proceedings. Beginning with May, 1922, the work of clearing the records of some 5,000 irrigation rights of way which are subject to forfeiture was actively commenced, and will be vigorously prosecuted to a conclusion.

Stock watering reservoirs.—During the past year 31 reservoir declaratory statements have been approved, as against 6 last year; 163 applications have been received and 190 cases disposed of. The large number of small withdrawals for public water reserves, has militated against increase in the "water hole" or reservoir declaratory statements, although there appears to be but a small falling off in such filings.

STATE IRRIGATION DISTRICTS.

Since the passage of the act of August 11, 1916 (39 Stat. 506), applications by 23 irrigation districts for recognition under the provisions of said act have reached this office. Of these, 2 applications involving 50,096 acres (gross area) were received during the past fiscal year.

During the year 5 applications having a total gross area of 149,-082.60 acres received departmental approval, and 12 were otherwise acted upon. On July 1, 1922, 9 applications were awaiting some action by this office.

PRIVATE IRRIGATION PROJECTS.

During the past fiscal year 30 new reports and 15 supplemental reports have been received as the result of investigations of private irrigation enterprises and State irrigation districts upon which claimants and applicants under the desert-land laws were dependent for their water supplies, making a total of 1,202 projects reported on since the adoption of the regulations of September 30, 1910 (39 L. D., 253). There were also received from the Director of the Geological Survey 22 reports made in response to requests of this office for information bearing upon the question of the feasibility of these projects, while the United States Reclamation Service furnished a report upon one project. One report was also furnished by the Indian Office.

During the year reports on 82 irrigation companies and districts have been considered and disposed of. In 52 cases affecting approximately 300 entries and applications the conclusions reached were in favor of the recognition of the company or districts as a proper and sufficient source of water supply for the irrigation of lands entered under the desert-land law; in 23 cases affecting about 100 entries and applications the conclusions reached were adverse; while 9 cases were closed without any definite conclusion having been reached, it appearing that there were no longer any desert-land entries or applications involved, all having been relinquished or otherwise disposed of. Of the reports considered there were 5 involving projects previously acted upon, the last action being taken for the purpose of revising or supplementing the previous action.

FEDERAL WATER POWER ACT.

The Federal water power act of June 10, 1920 (41 Stat. 1063), is now functioning smoothly.

While to some extent it has taken away work formerly considered as essentially within the jurisdiction of the General Land Office, it has created enough new work to more than offset that which has been lost.

During the past year power applications aggregating 674,637 acres have been received for appropriate action, as against 552,590 acres last year. Of this 674,637 acres, 193,916 acres are national-forest lands, the balance being public lands.

About 1,000 elections under section 24 of said act have been called for as against 500 last year. In the great majority of these cases elections have been filed, and the entries have been allowed subject to the provisions of said section 24 of the Federal water power act.

A large number of applications for restoration from power-site withdrawal or classification under said section 24 have been received, and transmitted to the Federal power commissioner for consideration and "determination," 51 of which have been made and restorations promulgated thereunder. In coordination with the work under this act, 43 withdrawals for classification, 13 power-site interpretations, 5 power-site withdrawals, and 18 power-site restorations were promulgated.

April 17, 1922, the Water Power Commission determined that entry of lands affected by power-transmission line withdrawals or approvals would not be detrimental to the power value of such lands. This determination has immensely simplified the handling of applications for the acquisition of public lands under the various applicable laws, and this class of cases are up to date.

During the year \$7,671.48 have been received in payment of sums due under permits issued prior to the passage of the Federal power act. This is \$2,219.89 more than the amount received in 1921.

CAREY ACT.

The work under the Carey Act has made satisfactory progress during the year, particularly in the direction of closing up old and long-pending projects, issuing patents to the several States for the lands which had been brought under irrigation, and **resto**ring to the public domain the segregated lands the reclamation of which had been found impracticable.

One case in which a satisfactory adjustment was thus reached after several years of investigation and negotiation was that of the La Prele project in Wyoming, involving three different segregations of land and two applications for patent based upon these segregations. The aggregate area involved prior to this adjustment was 17,587.34 acres. Of this amount 7,809.58 acres were patented to the State and 9,426.05 acres were restored to the public domain, leaving a balance of 351.79 acres as to which the segregation is held intact for the present pending the outcome of appeals in certain hitigation in the State courts. The same adjustment also cleared the way for patenting a number of desert-land entries which had been suspended for some years owing to the difficulty of determining the extent of the available water supply.

The largest new segregation approved during the year involved 13,745 acres in Arizona. This is the first segregation under the Carey Act which has been approved for the benefit of the State.of Arizona. New segregations involving 11,579.77 acres in Wyoming also received approval.

Carey Act segregations aggregating 167,459.20 acres were finally disposed of during the year. Of this area 35,870.36 acres were patented to the several States as reclaimed, and 131,588.84 acres represented segregations which were canceled. An additional area of 25,364.93 acres was segregated and, including a request for reinstatement, 6,400.39 acres more were applied for, but no additional lands were included in temporary withdrawals. For 69,097.68 acres the period of segregation was extended.

IRRIGATION OF ARID LAND IN NEVADA.

The first permit under the act of October 22, 1919 (41 Stat. 293) generally known as the Pittman Act, was issued July 19, 1920.

Two years are allowed by the act within which to "discover" water sufficient to irrigate 20 acres of land, together with an additional year to show irrigation and cultivation.

A number of very promising progress reports have been received, and suggestions have been made that applications for patent would be forthcoming shortly, although the time therefor has not yet expired.

Twenty-three applications from Elko and 147 from Carson City have been received during the current year. Forty Elko and 160 Carson City permits have been issued during the current year, while 31 Elko and 98 Carson City permits have been canceled.

There were outstanding on July 1, 1922, 49 Elko and 319 Carson City permits, while on July 1, 1921, there were 40 of the former and 257 of the latter.

DESERT-LAND ENTRIES.

During the year 6,786 applications and entries of all description were received, as against 6,744 the previous year: of these 7,706 were finally disposed of, against 6,564 during 1921; 1,156 cases remained pending office action July 1, 1922, which leaves the desert-land work practically current.

One thousand six hundred and seventy-one final desert-land entries were received, and 1,878 disposed of, 1,659 of which were patented, as against the previous year's showing of 1,611 received, 1,614 disposed of, and 1,599 patented.

Two thousand one hundred and eighty-eight original desert-land entries were received, and 2,432 disposed of, as against 2,177 received, and 1,953 disposed of the previous year.

UNITED STATES RECLAMATION PROJECTS.

During this fiscal year there has been a substantial increase in the cases handled by the reclamation section, notably in the number of original homestead entries and assignments examined and accepted, also in the number of final entries approved for patenting. In the latter class of cases the increase was 81 per cent over last year. Two thousand one hundred and nine applications and entries of all sorts have been received, and 2,829 disposed of, as against 2,340 last year.

A summary of the principal kinds of cases received and disposed of during the year, is as follows:

Original entries.—Pending at beginning of fiscal year, 353; received, 792; canceled, 135; otherwise disposed of, 482; allowed, 475, as against 356 allowed last year. Pending office action July 1, 1922, 53.

Assignments.—Pending at beginning of fiscal year, 124; received. 315; otherwise disposed of, 90; examined and approved, 326, as against 264 approved last year. Pending office action July 1, 1922, 23.

Applications for lands in Yuma auxiliary project.—Pending at the close of last year, 115; received, 17: disposed of, 90. Pending office action July 1, 1922, 42.

Homestead proofs.—Pending at close of last year, 91; received, 345; otherwise disposed of, 53; examined and accepted, 193, as against 196 last year. Pending office action July 1, 1922, 190.

Final homestead entries.—Pending at close of last year, 350; received, 640; otherwise disposed of, 181; approved for patenting, 777, as against 428 last year. Pending office action July 1, 1922, 32.

The principal openings of irrigated lands to entry under the act of June 17, 1902 (32 Stat. 388), were as follows:

Project.	Date of opening.	Irriga- tion acreage.	Number of farm units.	Farm units entered.
North Platte, Nebraska-Wyoming Shoshone, Wyoming Newlands, Nevada Total	June 16,1922	$ \begin{array}{r} 14,868 \\ 3,667 \\ 2,152 \\ 20,687 \end{array} $	224 57 33 314	224 51 2 277

During the fiscal year this office promulgated 28 orders of withdrawal under the reclamation act of June 17, 1902, and 78 orders of restoration. The area withdrawn during such periods was 145,204 acres, while the area restored was 240,915 acres.

WITHDRAWALS AND RESTORATIONS.

During the past year 416,435 acres of public land were withdrawn or placed in a state of reservation under the various acts applicable thereto, and 6,236,611 acres, theretofore withdrawn or reserved, were restored to entry or other proper disposition. Some of the withdrawals were for other purposes, and some are blanket withdrawals without strict regard to lands entered or patented, so that the total of withdrawn land does not represent with absolute accuracy the amount of public unentered lands reserved. The same may be said of restorations. Some of the lands restored were included in other forms of withdrawals; some were patented or subject to equitable rights, and so did not become subject to general entry or other disposition upon restoration.

The withdrawals and restorations during the year follow:

Stock driveways.—Under section 10 of the act of December 29, 1916 (39 Stat. 862), 96,590 acres have been withdrawn and 101,864 acres released from former withdrawals.

National forests.—Approximately 83.971 acres have been added to national forests from the public domain. The public lands in 70,105 acres excluded from national forests and in 240 acres released from withdrawal, for forest purposes have been restored to entry and other disposition.

Coal.—No withdrawals were made for coal classification, but 4.908,922.46 acres previously withdrawn, were restored from such withdrawal, leaving 34,966,491.54 acres still withdrawn June 30, 1922.

Oil.—One hundred and ten thousand eight hundred and three acres of land theretofore withdrawn for classification as possibly valuable for petroleum were restored to entry. No withdrawals were made, but 6,580,611 acres still remain withdrawn for oil classification.

Phosphate.—No withdrawals were made, but 298,846 acres previously withdrawn were restored; 2,425,494 acres are still in a state of reservation.

Power sites.—By four withdrawals 1,076 acres were placed in a state of reservation as valuable for power purposes, as against 76,240 acres restored from previous withdrawals by 24 restorations and modifications; 2,517,244 acres still remain withdrawn.

Public water reserves.—By 20 orders, 13,827 acres were withdrawn as public water reserves and 3,210 acres previously withdrawn were restored by 9 orders; 255,249 acres remain withdrawn for such reserves.

Reservoir sites.—Fifteen hundred and forty-four acres were withdrawn as reservoir sites. There were no restorations. Two hundred and two thousand four hundred and thirty-eight acres are now withdrawn as prospectively valuable for reservoir sites.

Power-site designations.—Ten thousand three hundred and thirtytwo acres heretofore designated as valuable for power purposes, under the Oregon & California Railway revestment act, were restored from such designation, leaving 142.867 acres still reserved.

REPORT OF COMMISSIONER OF THE GENERAL LAND OFFICE. 15

Power-site classifications.—Sixty-four thousand two hundred and twenty-nine acres were withdrawn for classification as to power value by 35 orders of withdrawal. But 427 acres were withdrawn last year, and the total now reserved is 64,656 acres.

Power-site applications.—The Federal Power Commission has transmitted to this office during the past year, under the Federal waterpower act, power applications aggregating 674.637 acres, of which 193,916 acres were in national forests. A total of 1,227,227 acres are now withdrawn by virtue of water-power applications.

Reclamation.—Twenty-eight orders of withdrawal and 78 orders of restoration were promulgated during the year (as against 23 withdrawals and 43 restorations the previous year), involving the reservation of 145,204 acres, and the restoration of 240,915 acres.

Carey Act.—Under section 4 of the act of August 18, 1894 (28 Stat. 372), and the acts amendatory of and supplementary thereto, 6,400 acres have been withdrawn from general disposition for the benefit of the various States applying therefor, and 415,133 acres theretofore withdrawn have been restored.

Miscellaneous.—About 400 acres were withdrawn in Arkansas for classification in connection with the Big Lake bird reserve, 630 acres in Colorado and Michigan in aid of pending legislation, 2,400 acres in Alaska for national park purposes, and 160 acres in New Mexico for national monument purposes, totaling 3,594 acres withdrawn. No restorations.

RESTORATION OF SHORE SPACE IN ALASKA.

Twenty-three restorations of the 80-rod reserved shore space between claims abutting upon navigable "or other" waters in Alaska have been made, under the act of June 5, 1920 (41 Stat. 1059), as against 14 the previous year. Of these five have been "blanket restorations" covering one or more townships or the banks of a river between certain points.

This class of cases is being handled promptly upon receipt of records from the chief of field division, and is up to date.

RESTORATIONS AND OPENINGS SUBJECT TO THE PREFERENCE OF EX-SERVICE MEN.

During the fiscal year lands within the provisions of Public Resolution No. 29 of February 14, 1920 (41 Stat. 434), as amended by Public Resolution No. 36 of January 21, 1922, released from withdrawal or segregation, or subject to disposition through survey or resurvey, have been restored or opened to entry by ex-service men of the war with Germany in advance of other disposition, in accordance with such resolutions and the regulations issued thereunder. During the period the public lands in areas so restored or opened have aggregated 475,790 and 1,836,900 acres, respectively.

STATE GRANTS AND STATE SELECTIONS.

A further substantial reduction in the acreage of pending, unadjudicated State claims was recorded during the past year. Receipts amounted to 285,968.16 acres, while 933,571.28 acres were finally adjudicated, 814,734.81 acres of indemnity school land and 91,866.94 acres of specific quantity grant land being conveyed to the States. In addition, 23,406.58 acres of indemnity school land selections and 3,562.95 acres of quantity grant selections were rejected and canceled.

During the year 7,843.08 acres of land were conveyed to the States with reservation of mineral deposits (coal, oil and gas, phosphate) to the United States and 33,434.87 acres under cooperative agreements with some of the States providing for the exchange of school-section lands within the boundaries of national forests for other lands within such boundaries, the lands selected by the States, upon confirmation of title, being eliminated from the forests. There have been conveyed to the States pursuant to these agreements 281,863.29 acres of land.

Exchanges, of land with the State of Michigan, authorized by the act of Congress approved July 31, 1912 (37 Stat. 241), were consummated to the extent of 41,840.40 acres, patents for that amount of land having been issued to the State of Michigan during the year.

Pending legislation.—The need of and reasons for legislation having for its object the confirmation of title in the States of lands granted in place in aid of schools, by issuance of United States patents; the confirmation of title to school section lands, by patent, to transferees of the States whose claims to title have failed because of the known mineral character, at time of grant, of the lands purchased by them and the conveyance of title, to States, by patent, the same as to individuals, were mentioned in my report of last year (pp. 38 and 39) and the fact noted that such legislation was then pending. A bill (S. 889) of this character passed the Senate April 22, 1922, and it is earnestly hoped that this bill or a like measure may be enacted into law in the near future.

SWAMP AND OVERFLOWED LANDS.

Progress was made during the year in adjudicating claims pending under the grant of swamp and overflowed lands made by the acts of Congress approved March 2, 1849 (5 Stat. 352), September 28, 1850 (9 Stat. 519), and March 12, 1860 (12 Stat. 3). Patents issued for 7,770.58 acres, as follows: To the State of California for 5,936.76 acres; Florida, 80.05 acres; Iowa, 237.91 acres; Louisiana, 1,273.45 acres; Missouri, 122.41 acres; and Wisconsin, 120 acres. Selections aggregating 4,894.43 acres were rejected. Only 416.61 acres were embraced in the new selections filed. The total area so far conveyed under this grant to the 15 States which received it amounts to 63,931,169.54 acres.

ABANDONED MILITARY RESERVATION.

The largest abandoned military reservation to be disposed of during the year was a tract of 55,178 acres near Deming, N. Mex., reserved in 1917, for military purposes; these lands were open to homestead entry.

Proctor's Landing, near Lake Borgne, La., including the remains of old Fort Beauregard, containing 81.68 acres appraised at \$571, was disposed of at public sale April 26, 1922. The old fort was valued at \$250. The land and fort sold for \$2,196.80. The 10 small abandoned military reservations along the Gulf coast of Louisiana, containing 3,624 acres, of low, level, salt marsh were offered at public sale April 22, 1922. But one tract of 160 acres was sold. They had been appraised at \$4,897.56.

The act of July 15, 1921 (42 Stat. 142) provided for the survey, appraisal, and sale of Vashon Island, across the Sound from the city of Tacoma, Wash. This reservation contains 479.40 acres and the actual occupants will be entitled to purchase not to exceed 20 acres each.

CHIPPEWA LOGGING OPERATIONS, MINNESOTA.

During the past year there were cut from ceded Chippewa lands, Minnesota, under contracts entered into under the act of June 27, 1902 (32 Stat. 400), 407,880 feet of timber, besides 1,224 posts and poles, for which \$5,872.24 were paid. There were also cut in trespass 9,360 feet and 665 posts and poles, for which \$185.63 were collected. There were paid as interest during the past year by purchasers who had been granted extensions of time \$15,692.27, and as overhead charges \$7,061. The total receipts for the year were \$28,811.14.

There have been cut to date since the logging operations began in 1903, 1,281,552,887 feet of timber, $224\frac{1}{2}$ cords of pulp wood, and 219,901 ties, posts, and poles, for which the purchasers paid \$9,077,-031.39. The average stumpage price was \$7.08 plus. There have also been cut in trespass 5,081,569 feet of timber, $794\frac{3}{4}$ cords of pulp wood, 1,000 piling, and 87,273 ties, posts, and poles, for which there were received \$54,338.27. The total amount of interest paid by purchasers was \$113,841.23, and the total amount of overhead charges paid by purchasers was \$22,803.19, all of which was a condition for granting extension of time. The grand total receipts have been \$9,268,014.08.

The total cost of scaling has been 161,425.50, or $12\frac{3}{5}$ cents per thousand feet, and the total cost of superintending, scaling, rent, and office expenses, was 3389,117.57, or 28 plus cents per thousand feet. The total expense of scaling and collecting for all trespass was 8,780. Deducting the amount paid by purchasers as overhead charges, the expense to the Government is 3.97 per cent of the receipts.

The timber contracts are all completed except three, involving about 50,000,000 feet, according to the estimates, but with a probable overrun of 25 per cent. These purchasers have been granted extensions of time on condition that they pay interest on deferred payments at 5 per cent per annum, and also pay the overhead charges.

RAILROAD GRANTS AND SELECTIONS.

Lands selected and patented.—Railroad and wagon road selections were received during the year to the amount of 740,995.88 acres as compared with 1,307,546.30 acres in 1921.

There were allowed and patented 1,490,397.93 acres, as compared with 713,210.32 acres in 1921.

Adjustment of the Northern Pacific grant.—The adjustment of the grants to the Northern Pacific Railway Co. under the acts of July 2, 1864 (13 Stat. 365) and May 31, 1870 (16 Stat. 378) and the acts supplemental thereto, made necessary by the decision of April 11, 1921, of the Supreme Court in the case of the United States v. The

Northern Pacific Railway Company (41 S. C. Rep. 439), was begun on January 6, 1922, the adjustment being made as of and including December 31, 1921. The ascertainment of the area of the grant of 1864, as to the place or primary limits is practically completed and the remainder of the work will be prosecuted to a completion at the earliest date practicable.

Coos Bay wagon road lands.—Under the acts of June 9, 1916 (39 Stat. 318) and February 26, 1919 (40 Stat. 1179), a sale of 9,675,000 feet, board measure, of timber on a 320-acre tract was made, for which \$23,146.20 was received. Total amount of timber sold to date, 55,075,000 feet; amount received therefor, \$103,957.50.

Oregon & California Railroad lands.—Classification reports covering about 30,000 acres of the revested Oregon & California Railroad grant lands have been received during the year from the assistant supervisor of surveys in charge of the classification of these lands.

Under the act of June 9, 1916 (39 Stat. 318), 19 sales of timber were held during the year involving 3,402.57 acres, containing 110,725,000 feet, board measure, of timber for which the sum of \$198,529.68 was received, Total sales to date, 123; area involved, 23,020.69 acres, containing 568,192,000 feet, board measure, of timber. Total receipts, \$943,948.91.

Under the act of May 31, 1918 (40 Stat. 593), providing for the advantageous consolidation of the timber holdings of the Government through exchange, two exchange applications were patented. The United States received thereby 23,669.61 acres possessing a growth of 948,091,000 feet board measure of timber having a value of \$1,581,562.55 in exchange for 22,270.71 acres containing 955,752,000 feet of timber valued at \$1,570,492.94.

April 19, 1922, the department authorized the survey of lands in the indemnity limits of the grant within existing national forests. The classification of the revested land will be kept current with the survey by the assignment of a timber cruiser to each surveying party.

Lind opening.—An opening of the reconveyed Coos Bay wagon road grant lands, classified as agricultural, in conjunction with the remaining revested Oregon & California Railroad grant lands, classified as agricultural, is contemplated about the spring of 1923. The opening of the Coos Bay wagon road lands will afford the lessees and settlers on these lands an opportunity to perfect their preference rights. The necessary statistical and listing work preparatory to such an opening is now going on.

INDIAN ALLOTMENTS.

During the year 153 new fourth-section allotment applications were filed under the act of February 8, 1887 (24 Stat. 388), as amended, while 433 were approved and 305 were canceled. This practically disposes of over 8,000 applications, principally in Arizona and New Mexico, which had accumulated prior to April 15, 1918. The cancellations were largely in cases of Indians who had failed to use the lands applied for or had returned to the reservations. During the past year, 6,805 trust patents with an area of 495,808.25 acres, and 2,265 fee patents with an area of 252,560.33 acres were issued. At the beginning of the year, 3,902 approved allotments, mostly on tribal reservations, were on hand, 5.425 have been received, and 5,905 have been disposed of, leaving a balance of 3,422, all in one schedule, made to Indians on the Blackfeet Indian reservation in Montana, authorized by the act of June 30, 1919 (41 Stat. 16), which directed that all of the lands on the said reservation be pro rated among the members of the tribe. Accordingly, none of the lands in this reservation will ever be open to entry. The same course has been adopted by Congress in disposing of the diminished Crow Reservation in Montana.

OPENING OF COLVILLE INDIAN RESERVATION.

The act of March 22, 1906 (34 Stat. 80), provided for the opening to homestead entry of the south half of the former Colville Indian Reservation, Wash., September 5, 1916, and the unentered lands were automatically withdrawn for the purpose of sale on September 4, 1921, but legislation extending the time during which homestead entries could be made for a period of 5 years was approved May 9, 1922 (Public, 215). When restored, ex-service men were given a preference right of entry. These lands will be subject to general disposition August 28, 1922.

On November 23, 1921, the Secretary of the Interior approved the reclassification as nonmineral of certain lands within the south half of the former Colville Indian Reservation, Wash., originally classified as timber-mineral and grazing-mineral. By regulations approved by the department on June 29, 1922, the reclassified lands originally classified as grazing-mineral were opened to homestead entry.

LIEU SELECTIONS FOR LANDS IN INDIAN RESERVATIONS.

The act of April 21, 1904 (33 Stat. 211), provides that land in Indian reservations held in private ownership may be exchanged for vacant lands of equal area and value in the same State. During the year there were 118 selections approved and patented, containing about 439,927 acres. Six selections were rejected and 27 are now pending which involve about 26,269 acres. The department has approved an area of approximately 1,906,397.22 acres under the act, and there have been reconveyed to the Government for the use of the Indians about 1,875,065.43 acres, leaving 31,331.79 acres for future exchanges.

FOREST AND OTHER EXCHANGES UNDER SPECIAL ACTS.

There have been passed by Congress so far some 19 special acts authorizing exchanges of lands owned by the United States for other lands, mostly confined to national forest lands and to remedy certain errors and defects caused by improper surveys in various parts of the country. During the year 4 applications were patented, involving an exchange of approximately 3,722.77 acres of base for about 2,881.25 acres of selected lands. At the end of the fiscal year there were 21 applications pending, of which 7 arose out of erroneous surveys. The remaining 14 cases involve an aggregate area of approximately 19,114.29 acres selected in exchange for about 48,172.28 acres to be conveyed to the United States. While the difference in the area between the selected and the base lands is large, the actual values are about equal considering the nature of the tracts.

LIEU SELECTIONS FOR LANDS IN NATIONAL FORESTS.

The annual report of this office for 1920 and 1921 sets forth at considerable length the situation with regard to forest lieu selections presented under the act of June 4, 1897 (30 Stat. 36). During the past year there were approved for patenting 266 selections, aggregating an approximate area of 51,892.92 acres. There are 119 forest lieu selections pending in the land office at the end of the fiscal year, and action has been taken on 99 of these.

SELECTIONS TO CORRECT ERRONEOUS SURVEYS.

The act of October 31, 1919 (41 Stat. 325) was passed to remedy largely fictitious surveys made in 1853 and 1870, in Florida, where plats showed lakes where none existed and other deep permanent bodies of water were found to occupy area represented as land on the plats. Retracement surveys revealed a loss of land of 5,484 acres, with 3,538 acres gained. The net loss of 1,946 acres will be distributed proportionately among the several claimants. Fortynine applications for relief were filed under said act. On June 24, 1922, the First Assistant Secretary of the Interior made awards and adjustments under the act.

NATIONAL FORESTS.

Since the issuance of the last annual report 1 national forest has been enlarged, 17 have been reduced, 1 consolidation and 5 interforest transfers have been effected under the act of June 4, 1897 (30 Stat. 34, 36), and 5 have been enlarged under special acts of Congress. The gross area which has been added from the public domain during the fiscal year is 83,971 acres, and that acquired for forest reservation purposes under the act of March 1, 1911 (36 Stat. 961), aggregates 137,659 acres. Due to recent surveys, recomputation of the area of certain forests has been necessary, effecting a decrease of 34,328 acres in the estimated total of last year.

There are now 148 forests, embracing 181,799,997 acres, of which a little over 86 per cent is public land. The net increase in national forest area since the beginning of the fiscal year is 13,866 acres. During the fiscal year 70,105 acres have been excluded and the public lands therein restored to entry and other disposition. The area embraced in withdrawals for forestry purposes or in aid of forest reservation legislation at the close of the fiscal year is 148,602 acres, certain reductions having been effected through inclusion in forests or restoration. Three administrative sites, containing 320 acres, have been withdrawn during the period and 33 such withdrawals, involving 3,627 acres, have been revoked, making the total area withdrawn for such purpose at the close of the fiscal year 210,783 acres, 190,520 acres thereof being in, and 20,263 acres near, national forests.

SMALL HOLDING CLAIMS.

To protect and afford a simple and easy means by which those people who had settled and held possession of, for a long period of time, and in some cases established homes upon, small tracts of land in the territory derived from the Republic of Mexico, sections 16, 17, and 18, of the act of March 3, 1891 (26 Stat. 861), were enacted, the provisions of which have been extended from time to time. Since the enactment of the said sections, over 6,000 claims, situate in the State of New Mexico, have been filed thereunder, the area varying from a few acres to 160, with an average of about 60 acres each. The past year 206 claims have been patented.

The period for filing claims under said sections has expired, but Congress on June 15, 1922, passed an act to provide for the settlement of small holding claims on unsurveyed land in the State of New Mexico, which is practically a reenactment of sections 16 and 18 of the act of March 3, 1891 (26 Stat. 861), with slight modifications.

MINERAL LANDS.

There were 300 more applications for mineral patents received during the year than the year previous, but in other matters affecting mineral lands the receipts were not so heavy. Patents were issued on 574 applications, embracing an area of 53,043 acres.

A large number of oil and gas prospecting permits were issued under the mineral leasing act, but operations under these permits have not been as active as could be desired, due in part to financial conditions generally, and partly to the authority granted the Secretary of the Interior, by the act of January 11, 1922, to extend the time for compliance with drilling requirements under permits. As to coal, the results so far indicate that the leasing act is meeting with a substantial response and warrants the belief that the law is giving a healthy impulse to production. Oil, gas, and coal are the subject of further comment herein.

of further comment herein. Coal leases and permits.—There were received during the year 568 applications for coal prospecting permits, leases, and licenses. There were issued 223 permits, aggregating an area of 210,404 acres, 24 leases, aggregating 11,248 acres, and 13 licenses, aggregating 520 acres. Approximately 93 leasing units were designated on petitions therefor, the designations having been made by the United States Geological Survey. At the close of the fiscal year the total number of units so designated was 168.

A somewhat smaller number of applications for leases were received than during the previous year, but a greater number of leases were issued. The latter might be expected, inasmuch as there has now been sufficient time for the development of some of the tracts included in prospecting permits and for the ripening of permits into leases. Under the regulations a minimum royalty production is required of lessees, to begin as of the fourth year of the lease in order to allow time for the lessees to develop mines. It is thus too early to calculate the investments made and the production to result in cases of leases issued. In a number of leases, especially in the States of Utah and Wyoming, the minimum royalty production and investment requirements are large and should add materially to the national annual output of coal.

Alaska coal.—There were no coal leases issued during the year. There are outstanding seven leases, which embrace 6,540 acres in the Bering River field, 2,520 acres in the Matanuska field, 1,440 acres in the Cook Inlet field, and 566 acres in the Nenana field. Under the act of March 4, 1921 (41 Stat. 1363), 8 coal prospecting permits were issued out of 20 applications filed. Oil and gas activities.—Under section 14 of the leasing law, which authorizes leases to permittees who show discovery of oil and gas as result of prospecting under a permit, 10 leases were issued, embracing 4,860 acres of land. Under section 17 of the law authorizing the public sale of leases, 2 were issued covering 70.91 acres of land in California, and 20 covering 6,260 acres of land in the Salt Creek field, Wyoming. The total bonus paid for the two leases in California was \$9,160, and for the 41 tracts included in the Wyoming leases, \$1,687,000, this latter amount having been reported last year, the sale having been made during that year.

During the year 4,598 new applications for oil prospecting permits under sections 13 and 20 of the leasing act were filed, 4,985 permits were granted, and 3,107 rejected. Since the passage of the act a total of 15,653 applications for permits have been received, and we now have 4,996 remaining for final action.

At the beginning of the fiscal year there were pending for action 820 applications for relief under sections 18, 18a, 19, and 22 of the leasing act, and during the year we received 65, making a total of 885; we now have pending 389, in all of which some action has been taken but are awaiting either compliance with requisite requirements or the results of hearings ordered. By the end of the fiscal year, acting under these sections, 84 leases covering 17,455 acres, and 181 prospecting permits, covering 133,290 acres, were issued and delivered, while 231 applications were rejected or otherwise disposed of. Of the leases 7 cover 1,043 acres in the naval petroleum reserve No. 1, California, issued under the act of June 4, 1920 (41 Stat. 812); 18 cover 6,937 acres in the naval petroleum reserve No. 2, California, of which 5 were issued under the act of June 4, 1920, supra, and the rest were issued under the act of February 25, 1920. Seven leases, covering 30 producing wells, were issued upon lands in the naval reserve No. 2, California.

Oil and gas permits in Alaska.—From February 25, 1920, the date of the passage of the mineral leasing act, to July 1, 1922, 994 applications for permits involving lands located in the Territory of Alaska have been received in the General Land Office, 919 were filed in the Juneau land office, 64 in the Nome office, and 11 in the Fairbanks office. Of this number, disposition has been made by the granting of 603 permits and the final rejection of 32 applications, a total of 635. Final action on all applications except those recently received is delayed by reason of the nonreceipt of additional evidence which has been called for and is necessary to complete the claims.

About two-thirds of these applications are for lands located in the Alaskan Peninsula, in the Cold Bay region, the remaining being scattered over the Katalla, Yakataga, Iliamna, Kootsnahoo, Seward, Wasilla, Anchorage, Aniashak, Lituya Bay, Young Bay, and Kachemak Bay regions. The applications, as a rule, are for the full area that may be granted under permit, and the entire area is approximately 2,225,-000 acres. Practically all of this land is unsurveyed, and in most instances the descriptions thereof, shown by metes and bounds, are very indefinite, so that the difficulties encountered in considering the applications, in view of the many conflicts which exist, may be readily understood. At the request of the parties in interest in the Cold Bay district the General Land Office has undertaken to make surveys, which, while made in part, have not yet been completed in the field, and consequently plats of survey are not yet available. However, from an unofficial map of the survey now in the General Land Office it appears that lines of survey duly monumented have been run through what is known as the east and west fields of the district sufficient to enable a tie thereto of the lands embraced in the various claims.

Receipts under the mineral leasing act.—The receipts under the mineral leasing act of February 25, 1920, for the fiscal year 1922 were \$8,799,468.17, of which \$6,374,143.52 were from public lands, and \$2,425,324.65 were from naval petroleum reserve lands.

CONSOLIDATION OF CONTEST WORK.

By order of June 15, 1922, mineral contests, which had theretofore been handled in the Mineral Division, were assigned to the Contest Division, which will hereafter have charge of all litigated cases, both mineral and agricultural, that come before the office for decision. Under the numerous and varied public land laws it is inevitable that there must arise many cases of conflicting interests of almost unlimited variety, presenting questions exceedingly difficult of solution, upon which immense values are often dependent. It is the special province of the Contest Division to handle such cases in accordance with the rules of procedure, decisions of the courts, and the department that come before the office on appeal or review from the district land offices, where hearings have been had and testimony submitted. It is believed that the centralizing of all contests in one division gives assurance of uniformity of action and greater expedition in the disposition of the work. During the year ending June 30, 1922, the office has disposed of 1,110 litigated cases and 2,337 unappealed cases, and the work is now practically current, with the exception of the mineral contests received under the order of June 15, and the adjudication of these cases will be taken up without delay.

REPAYMENTS.

The existing laws governing repayments, section 2362, United States Revised Statutes, act of June 16, 1880 (21 Stat. 287), and the act of March 26, 1908 (35 Stat. 48), as amended by the act of December 11, 1919 (41 Stat. 366), provide for return to the land applicant, his heirs or assigns, of moneys received and covered into the Treasury in connection with the disposal of the public lands in all cases where lands have been erroneously sold, where applications to make entry have been rejected, no fraud appearing, and where any amount has been paid in excess of the legal requirement. Excess amounts are payable only to the party who makes the payment or to his legal representatives.

Under said laws there were stated during the last fiscal year 2,526 accounts, allowing repayment of \$249,244.17, and during said period there were denied 557 claims for repayment. The number of claims allowed includes 113 accounts allowing repayment of \$28,043.99 received in connection with sales of various Indian reservation lands and repaid from Indian trust funds.

Repayment claims allowed and denied.

Year.	Claims allowed.	Amount.	Claims denied.
1911	$\begin{array}{c} 2,338\\ 2,097\\ 2,427\\ 1,775\\ 1,689\\ 1,700\\ 1,215\\ 1,241\\ 762\\ 1,426\\ 1,764\\ 2,526\end{array}$	178, 437, 02 178, 952, 15 217, 614, 09 123, 139, 11 305, 310, 83 218, 971, 46 106, 888, 42 99, 370, 04 80, 886, 70 140, 292, 94 112, 525, 59 249, 244, 17	712619644482799940434435285419383557

ALASKA.

Land districts.—The Territory of Alaska is divided into three land districts with the district land offices located respectively at Juneau, Nome, and Fairbanks. At Juneau the offices of register and receiver have been consolidated under the act of July 14, 1919 (41 Stat. 194), with the joint duties imposed upon the register; at Nome and Fairbanks the marshal of the United States court is ex officio register, and the clerk of said court ex officio receiver of public moneys.

Land service headquarters.—The official headquarters of the surveyor general of the Territory, the assistant supervisor of surveys, and the chief of the field division are at Juneau.

Surveys.—Since Congress authorized the extension of the rectangular system of public land surveys to the district of Alaska over 1,550,000 acres have been brought under survey. These surveys have been placed under the control of three independent meridians established as follows: The Seward meridian, initiated just north of Resurrection Bay and extending to the Matanuska coal fields; the Fairbanks meridian, commencing near the town of that name and controlling the surveys in that vicinity including the Nenana coal fields; and the Copper River meridian, which lies in the valley of the Copper River and from which surveys have been executed as far north as the Tanana River and south of the Bering River coal fields and the Gulf of Alaska.

All of these surveys have been confined to known agricultural areas, the coal fields, and such adjoining lands as might under normal conditions be attractive to settlers. The acreage above stated does not represent all of the lands in Alaska that have been actually surveyed, as a very substantial area has been covered by special metes and bounds surveys scattered over widely separated regions of Alaska, so as to include town sites, reservations of various types, native allotments, trade and manufacturing sites, and homestead entry claims. Surveys of the last two types are procurable at the expense of the claimants, but by act of June 22, 1918, referred to elsewhere herein, Congress has made provision for homestead surveys without expense to the claimants where the rectangular system of public land surveys has not been extended over the lands involved.

[°] Under date of February 3, 1922, the Secretary of the Interior directed that the rectangular system of the public land surveys be

REPORT OF COMMISSIONER OF THE GENERAL LAND OFFICE. 25

extended over the coal fields in the Broad Pass, or Upper Chulitna district, in order to make the area available for leasing. The coal field is immediately adjacent to the Government railroad, running from Anchorage to Fairbanks, between stations 292 and 310, or about due east of the Mount McKinley National Park. Two mines are now in existence and outcroppings are numerous. The coal is all lignite. This will be the fourth coal field to be surveyed in Alaska, the Matanuska, Nenana, and Bering River fields having been completely covered by public land surveys several years ago.

Land laws in force.—The principal laws applicable in the Territory are: (1) The mining laws; (2) the coal leasing act of October 20, 1914 (38 Stat. 741), with its amendment of March 4, 1921 (41 Stat. 1363), and the general mineral leasing law of February 25, 1920 (41 Stat. 741); (3) the homestead laws, the entry, however, being restricted to 160 acres; (4) right of way laws; (5) town site laws; (6) entries for the purpose of trade and manufacture; (7) the free use for certain purposes and purchase of timber on the public lands under appropriate regulations.

Homestead entries.—During the last fiscal year, 73 original homestead entries were made in the Territory, embracing an area of 10,611 acres, while 71 final entries were made for 12,377 acres.

Recent legislation of Congress, on the recommendation of the department, has done much for the encouragement of the homesteader in Alaska, notably the act of June 22, 1918 (40 Stat. 632), authorizing the free survey of homestead entries in Alaska, where the public surveys have not yet been extended over the land; the act of June 5, 1920 (41 Stat. 1059), amendatory of the acts of May 14, 1898, and March 3, 1903, authorizing the Secretary of the Interior, within his discretion, to restore intervening shore spaces required between entries under the original laws, where the shore space so restored is not needed for haborage uses; and finally, the act of March 8, 1922, authorizing agricultural entries on lands valuable for coal, oil, or gas. The passage of this act, it is understood, will result in the issuance of many homestead patents that have been awaiting a relief enactment of this character.

Coal, oil, and gas.—For details as to the transactions in the Territory under this head, see "Mineral lands" herein, page 21.

CONCLUSION.

Special efforts were made during the year ended June 30, 1922, to bring up the arrearage of work which I found on assuming my official duties in this office, and the result has been very satisfactory. Many of the classes of work have been brought up current. By current is meant that the work on hand ready for action can be disposed of within a month, without counting the new cases or the old ones coming in for further action. Other classes of work, however, are somewhat in arrears, and employees are being transferred from the current work to that which is behind, so that in the near future such arrearage will be eliminated.

As an instance of the progress made, reference is had to the fact that approximately 5,000 more patents were issued during 1922 than in 1921, involving an increase of 2,787,011.81 acres; of this increase,

10280-22----3

2,459,833.40 acres were covered by entries under the homestead laws, making a total of 9,632,635.56 acres patented under said laws, thus giving title to several thousands of American citizens who have spent their time and money, and in many instances endured hardships, in order to have a home for the future. Final homestead entries are now acted upon within from 30 to 90 days after the final certificate has been issued, and it is no longer necessary for an entryman to wait two years or more after having submitted satisfactory final proof for his patent.

Our rapidly diminishing public domain calls for a careful scrutiny, in the ensuing year, of all proposed legislation looking toward the final disposition of any considerable acreage. During the past fiscal year 17,922 stock-raising homestead entries were made, covering an area of 7,070,175 acres, which is extremely significant when it is remembered that the great body of our remaining public lands is better suited to grazing uses than for ordinary farm culture without recourse to irrigation. At the beginning of the last fiscal year our area of vacant unappropriated public lands was 189,729,492 acres, while at the end of the year it was 182,886,310 acres. So that, with the public-land laws as they now stand, it is apparent that our remaining stock in hand will not long continue to supply the demand. All things considered, new laws operating to increase the demand for public lands should only be enacted where it appears that the highest use of such lands can not be secured under existing laws.

Very respectfully,

WILLIAM SPRY, Commissioner.

STATISTICS RELATING TO THE DISPOSITION OF THE PUBLIC DOMAIN.

Area of States and Territories.

[Based upon careful joint calculations made in the General Land Office, the Geological Survey, and the Bureau of the Census.]

¹ In the adjustment of this grant the road was treated as an entirety and without reference to the State line; hence Alabama has had approved to her more and Mississippi less than they would appear to be entitled to in proportion to the length of the road in the respective States. ² This grant was adjusted April 24, 1893, and 302,181.16 acres were allotted to the company. The balance of the previously certified lands were ordered restored to entry under the forfeiture act of Sept. 29, 1890. ³ Certified lands footing 719,189.79 acres were reconveyed to the United States by the Governor of Louisiana Feb. 24, 1888, the grant having been forfeited by the act of July 14, 1870 (16 Stat. 277).

Public lands surveyed and remaining unsurveyed in public land States, including Alaska.

Aggregate area surveys and resurveys accepted in the fiscal year 1922, 6,151,892 acres. NOTE,—In Arkansas, Florida, Michigan, Minnesota, and Wisconsin the lands surveyed last year were not regarded as public lands when the lands surrounding were originally surveyed, and are counted in the aggregate of each State.

Estimated area of existing national forests, June 30, 1922.

[A little over 86 per cent is public.]

Includes reclamation water-right charges.
 Includes \$152.88 originally erroneously reported as Indian sale.
 Does not include \$152.85 mentioned in footnote 2.

Reclamation water-right charges under act of Aug. 9, 1912 (37 Stat. 265), were collected from Jan. 1, 1913, by the Reclamation Service.

49

Amounts accrued and paid to States for purposes of education or of making public roads and improvements on account of grants 2, 3, and 5 per cent of net proceeds of sales of public lands lying within said States.
