IMPORTANT

This file constitutes a part of the official records of the National Park Service and should not be separated or papers withdrawn without express authority of the official in charge.

All Files should be returned promptly to the File Room.

Officials and employees will be held responsible for failure to observe these rules, which are necessary to protect the integrity of the official records.

NEWTON B. DRURY,

Director.

**SUMMARY OF THE APRIL 1947 MONTHLY EXECUTIVE REPORT FOR
YELLOWSTONE NATIONAL PARK**

	<u>Page</u>
<u>SPECIAL ACTIVITIES:</u>	
Superintendent Rogers made trips to Livingston and Bozeman in connection with Jackson Hole National Monument and to conduct research work.	1
First session of in-service training program conducted	2
<u>INSPECTIONS:</u>	
Downs and Bergerstedt, Vets. Employment Service, Helena; Holloway and Hesselgrave, Post Office Department Inspectors; Elaser, Montana State Employment Service; and Urquhart, Supervisor, Gallatin National Forest, in the Park during the month.	2
<u>GENERAL PUBLICITY:</u>	
Press release on road openings and operations sent out. "Yellowstone Nature Notes" March-April issue prepared and mailed. Supply of 1947 "Accommodations and Services" leaflets received.	3
<u>ROAD MAINTENANCE:</u>	
Spring opening of roads begun.	3
<u>NEW CONSTRUCTION:</u>	
Award made to McLaughlin, Inc., for Project 1-3-1, 3-3, bituminous surfacing of Old Faithful to Ice Lake road.	4
<u>CONCESSIONERS:</u>	
J. E. Haynes, Anna M. Fryer, Mar. Walppie, and Trevor Pevah, Park concessioners in. Yellowstone Park Company submitted plans for conversion of cooking units from coal to gas.	4
<u>TRAVEL:</u>	
1,216 visitors in 513 vehicles during April.	5
<u>VISITORS:</u>	
First 1947 visitors view Old Faithful.	5
<u>WILDLIFE:</u>	
Tracks of grizzly and occasional tracks of black bears noted during the month.	6

WILDLIFE:

Total winter loss in Lamar area was seven buffalo. A few calves born during early April.

6

Warmer April weather aid to the elk in the northern and Gallatin areas. Estimates of total winter loss being prepared.

7

Arrangements made for delivery of some 40,000 large rainbow trout for Madison, Firehole and Gibbon rivers.

7

FOREST PROTECTION:

Yellowstone Park Fire Organization Plan for Large Fires completed as well as the Superintendent's Report of Forest Fire Fighting Equipment.

8

PERSONNEL:

Reynolds and Vladimiroff SOO as Park Ranger; efficiency ratings completed for Yellowstone employees; Haines resigned; Jackson promoted; Carr, Cameron, and Murphy SOO as Clerk-Typist or Clerk-Stenographer; Ebert SOO Park Ranger at Rocky Mountain; Bird transferred to Lake Texoma and SOO April 25.

8

MISCELLANEOUS:

Parents-Teachers Association organized by community members and officers elected.

8

Frank Roody, 74, of Dallas, Texas, died on April 10, having been one of first persons to conduct organized parties in Yellowstone Park.

9

Final figures for National Red Cross drive.

9

May 12, 1917

MEMORANDUM for the Director.

Following is the report of activities for Yellowstone National Park during the month of April, 1917.

Weather Conditions. April was generally cold with frequent short storm periods and normal precipitation. Low temperatures retarded the melting of snow and the depths in most Park areas were well above normal by the end of the month. Precipitation for the month amounted to 1.09 inches as compared with .36 inch for April 1916. At Mammoth the maximum temperature of 66 degrees was recorded on the 27th and the minimum of -11 degrees was recorded on the 23rd. Only three clear days were recorded, but 9 were partly cloudy and 17 were cloudy.

Special Activities. On April 14, Superintendent Rogers and Chief Ranger LaRoue attended a meeting of the Montana Rural Fire Fighter's Service at Bozeman and contacted several Livingston and Bozeman people in connection with the Jackson Hole National Monument.

On April 6 Superintendent Rogers was in Livingston and Bozeman to contact officials of various organizations in connection with the Jackson Hole National Monument.

Superintendent Rogers and Assistant Superintendent Johnston, Assistant to the Superintendent Joffe and U. S. Commissioner Wilcox attended Rotary meeting in Livingston on April 14, and conducted the program.

Superintendent Rogers, Assistant Superintendent Johnston, and Park Engineer Wohlbrandt went to Mill Creek near Migrant on April 18 in connection with a Park lumber contract.

On April 22 Superintendent Rogers and Assistant to the Superintendent Joffe attended a meeting of the Montana Chamber of Commerce in Livingston, Montana, to discuss methods of improving the manner of handling reservations, travel, etc. Representatives were present from Livingston, Bozeman, Butte, Helena, Missoula, Billings, and Miles City. Also, Mr. Huntley Child, Jr., representing the Yellowstone Park Company, was in attendance.

Superintendent Rogers went to Bozeman on April 21, in connection with research work in the Bozeman Library.

Assistant Superintendent Johnston and Park Engineer Wohlbrandt returned on April 3 from trip to Denver and Salt Lake City in connection with the obtaining of surplus property and equipment.

A meeting of Yellowstone veterans was held at Mammoth on April 4 with a view to establishing a local veterans organization in Yellowstone Park.

Special Candlelight Master Services were held in the Chapel at 6:00 a.m., April 6. Dr. Arthur W. Seebart, Minister of the Helbrook Congregational Church, Livingston, Montana, officiated. About one hundred people were present for the services which were highly successful and well received by those attending.

O. W. Monson, head of the Department of Rural Engineering, Agricultural Experiment Station, Montana State Agricultural College, Bozeman; L. C. True, publicity man, and W. J. Sutter, instructor in agriculture at the Montana State Agricultural College, gave a demonstration of a snow sled which they had developed at the College. The demonstration was conducted on Swan Lake Flat on April 11.

On April 15 Willis Stanton, Acting Custodian, Devils Tower National Monument, visited Yellowstone Park to discuss repair of the Custodian's residence and other matters pertaining to the Monument, and to make delivery of the fire truck which was acquired for Devils Tower. A load of lumber was delivered from Yellowstone on the truck.

The first session of the program of in-service training was conducted on April 15 with Superintendent Rogers and Assistant Superintendent Johnston giving the talks. Since that date there have been regular training periods for all employees on each Tuesday and Thursday afternoons. A detailed outline of the in-service training program is attached.

The Wage Schedule, Construction, No. 3-47 and Wage Schedule, Maintenance, No. 2-47, were approved on April 22. These schedules will be in effect for the 1947 season.

Inspections. Mr. Robert Downs, Veterans' Employment Service, Helena, and Bernard Borgstede, Field Assistant, Veterans' Employment Service, Helena, in the Park on April 4 to discuss the employment of veterans.

L. A. Follows, Inspector, Post Office Department, Casper, Wyoming, and P. H. Besselièvre, Inspector, Post Office Department, Salt Lake City, came into the Park on April 15 to discuss seasonal operations and wage schedules.

Mr. James W. Blaser, Representative, Montana State Employment Service, came into the Park on April 22 to make arrangements for opening an office in the Park about May 15.

James Urquhart, Supervisor, Gallatin National Forest, and Mr. Johnson, Region I, U. S. Forest Service, in on April 24.

Plans, Maps, and Surveys. The Lamar, Norris and Mammoth Regional Development Master Plan Sheets have been revised or brought up-to-date.

1. The first of the three main points of the report is that the Commission has found that the Government of the United States has not taken adequate steps to ensure that the rights of the people of the United States are protected.

2. The second of the three main points of the report is that the Commission has found that the Government of the United States has not taken adequate steps to ensure that the rights of the people of the United States are protected.

3. The third of the three main points of the report is that the Commission has found that the Government of the United States has not taken adequate steps to ensure that the rights of the people of the United States are protected.

4. The fourth of the three main points of the report is that the Commission has found that the Government of the United States has not taken adequate steps to ensure that the rights of the people of the United States are protected.

5. The fifth of the three main points of the report is that the Commission has found that the Government of the United States has not taken adequate steps to ensure that the rights of the people of the United States are protected.

6. The sixth of the three main points of the report is that the Commission has found that the Government of the United States has not taken adequate steps to ensure that the rights of the people of the United States are protected.

7. The seventh of the three main points of the report is that the Commission has found that the Government of the United States has not taken adequate steps to ensure that the rights of the people of the United States are protected.

8. The eighth of the three main points of the report is that the Commission has found that the Government of the United States has not taken adequate steps to ensure that the rights of the people of the United States are protected.

9. The ninth of the three main points of the report is that the Commission has found that the Government of the United States has not taken adequate steps to ensure that the rights of the people of the United States are protected.

10. The tenth of the three main points of the report is that the Commission has found that the Government of the United States has not taken adequate steps to ensure that the rights of the people of the United States are protected.

11. The eleventh of the three main points of the report is that the Commission has found that the Government of the United States has not taken adequate steps to ensure that the rights of the people of the United States are protected.

The following studies or plans were also completed during the month: Campground Fireplace, NP-YSL-2195; Study Bedroom Addition to Plan, NP-YSL-2583-Supp.; Ramp for U. S. Commissioner's residence to permit use of invalid's chair, and specifications and sketches for carpeting and drapes for the Yellowstone Park Chapel, NP-YSL-3122-Supp.

General Publicity. 5,500 copies of the Yellowstone Park broadside for 1946 were received on April 1 from the Government Printing Office.

On April 11 a press release on road openings and operations for the 1947 season, and also one on lost and found articles, was sent out to the Park mailing list.

The first supply of "Accommodations and Services" leaflets for 1947, published by the Yellowstone Park Company, was furnished the National Park Service on April 29 for distribution.

The publication "Yellowstone Nature Notes", March-April issue, was prepared and placed in the mail on April 16 with a total of about 580 copies issued.

Free publications on hand at the end of April numbered 26,000 of the 1946 Information Folder, in the Chief Ranger's Office storeroom. There were 3,750 in the Museum storeroom, and also 3,500 Location Map No. 5.

A breakdown of publication sales was attached to the Report of the Naturalist Division for April, 1947.

Road Maintenance. The snow plows began the spring opening of the roads on April 8. About eight miles of the Tower Falls to Canyon road was plowed to allow late skiing on Mount Washburn. By the end of the month the roads open were Mammoth to Norris, to Madison, to Old Faithful and Madison to West Entrance, Norris to Canyon and Lake. On April 30 the roads from Mammoth to Old Faithful and West Yellowstone were opened to the public.

The snow plowing has been both difficult and easy, but the general depth has been above three feet with much plowing up to six feet and a few 10 to 20 feet drifts. The east approach of the Yellowstone River Bridge at Tower Falls was rebuilt. Surface patching was started as soon as the road surface had dried. Heavy patching is required between Mammoth and Tower Falls and on the Gallatin road inside the Park. A restricted load limit was placed on the Mammoth to Cooke section and on the Gallatin section during the entire month.

A hot boiling spring had developed on the inner edge of the road at Seryl Spring between Norris and Madison, extending about half way across the road, making a crater about ten feet in diameter and fifteen feet deep. It was possible to cap this geyser with concrete even though there was considerable pressure and high temperature.

Approximately two miles of the road surface, Norris to Madison section, is breaking up and will require heavy patching if not reprocessing. The roads in general are showing more wear than was anticipated last fall when estimates were made.

1. The first step in the process of identifying a problem is to determine the nature of the problem. This involves a thorough understanding of the situation and the factors that are contributing to the problem. Once the nature of the problem is understood, the next step is to identify the causes of the problem. This involves a detailed analysis of the situation and the factors that are contributing to the problem. Once the causes of the problem are identified, the next step is to develop a plan of action. This involves determining the steps that need to be taken to solve the problem. Once a plan of action is developed, the next step is to implement the plan. This involves carrying out the steps that have been determined in the plan of action. Finally, the last step in the process is to evaluate the results of the plan. This involves determining whether the plan has been successful in solving the problem and whether any further action is needed.

[illegible]

Road crews are now stationed at Mammoth (10 men) Gallatin (10 men) Snow Crew (11 men), and Special Crew (10 men).

New Construction. Work on project 401, temporary houses at Mammoth, has proceeded slowly due to the fact that flooring is unobtainable. Power lines were placed to all three houses in the Mammoth area. Sewer lines were connected to two houses, and water piped into one house. Cabinets are being installed in one.

Cleanup of fire damage to Building No. 5, Mammoth, was started. The pre-fabricating of fire places at the Fishing Bridge Campground and redecorating of Museum rooms at Mammoth was started.

The dressing up of the berm which protects the water from Opal Terrace Spring has been finished by resodding the slope. The water has not begun to fill the basin, but the depression gives a good setting for the springs which are now quite active and colorful.

Bids were open by the Public Roads Administration in Cheyenne on April 23 for constructing Project 1-D-1, D-3, bituminous surfacing of 7.01 miles, Old Faithful to Isa Lake. Award was made to McLaughlin, Inc., which contractor was low with a bid of \$130,094. The second low bidder was Peter Kiewit Sons Co., with a bid of \$182,009, and the third low was Inland Construction Company with a bid of \$196,184.

Concessioners. Mr. J. E. Haynes, Haynes, Inc., was in the Park on April 11, and on April 30 he arrived to open up his operations for the summer.

On April 18 Gar. Helppie and Trevor Povah, of the Hamilton Stores, Inc., arrived in the Park.

On April 20, Mrs. Anna K. Pryor, Operator of Pryor Stores, arrived in the Park.

Mr. Huntley Child, Jr., Manager of Lodges and Camps, Yellowstone Park Company, in on April 22 and the suggested plan for the Tourist Building at West Thumb was reviewed with the Superintendent. No definite conclusions were made as Mr. Child wanted to go over the plans more thoroughly before making any comments. The few comments which were made have been submitted to the Regional Office. A meeting will be held with Mr. Child and Architect Willson in the Park on May 3.

On April 30 the Hamilton Store at Old Faithful started taking care of over-night guests. This service is to continue to May 10 when the Yellowstone Park Company will start operating its tourist cabins and cafeteria at Old Faithful.

The Yellowstone Park Company has submitted plans for the converting of all of their cooking units from coal to gas. The plans show the installation of a number of tanks located in drives and parking areas and these will be checked in the field, and if necessary, the plans will be corrected before they are forwarded for clearance. The installations are to be made in 1947 for use in 1948.

10. The following are the names of the persons who have been appointed to the various committees of the Board of Directors:

in the past on July 2, 1952.

[illegible][illegible]

Heavy damage was done to several of the buildings at Canyon Lodge by snow this spring and Superintendent Rogers approved the repair of these structures.

Interpretive Services. On April 2, Mr. Kenneth Hungerford, Professor of the School of Forestry in the University of Idaho at Moscow, accompanied by a group of about 15 men, were given a three-hour lecture in the Mammoth Museum. On April 4, this group was shown a special wildlife movie in the Mammoth Museum basement.

Motion pictures were presented each Tuesday evening to the members of the Mammoth community in the Canteen Building. These are of a general educational character.

Museum Activities and Exhibits. The Firehole Canyon field exhibit was taken out and installed on April 30.

Work assembling projection screens for use at Mammoth, Fishing Bridge, and Old Faithful has been completed. The Old Faithful model geyser has been completely prepared for use, the wayside exhibit finished, many new labels prepared, wooden frames in glass covers for these made, and other preparatory work completed.

Research and Observation. Chief Park Naturalist Condon and Park Naturalist Watson made field trips into the Park on April 23 and 25 for the purpose of making geyser observations, checking wayside exhibits and museums. In addition to this, Chief Park Naturalist Condon, accompanied by Mr. George Harler, made an inspection of thermal areas, museums and wayside exhibits on April 30.

One porcupine skull was added to the skull collection during the month.

Increase or Decrease in Travel. One thousand two hundred sixteen visitors entered the Park during the month as compared with 1,968 for April, 1946. Five hundred thirteen vehicles entered as compared with 706 for April, 1946. The total persons entering the Park for the travel year is 11,852 as compared with 20,045 for last year.

Visitors. Mrs. Leon A. Spaulding of East Sebago, Maine, and Mrs. Mark Goodgard and Mrs. Arthur E. Fritz of Rochester, New York, with a chauffeur and maid entered the Park on April 25 and made the trip to Old Faithful. They were the first 1947 visitors to view Old Faithful geyser.

Ranger Service. All the principal winter ranges for the larger native animals were covered by patrols for the purpose of determining the winter losses and the condition of the remaining animals and the vegetative cover. The carcasses of animals which died near the roads were removed and disposed of. Snow course readings were taken at the various stations, equipment was repaired and considerable maintenance work accomplished. Rangers devoted considerable time to repair of fire equipment and building fire hazard inspections were made in the Mammoth area.

Revision of the Park Ranger's Administrative, Report and Checking Station manuals was completed and copies of revisions furnished for all manuals. A supply of forms, sufficient for the season, was mimeographed and sent to stations with stationery and other supplies.

Protection Division In-Service Training Program. Four new permanent rangers underwent an intensive in-service training for three days to acquaint them with their duties, the park organization and policies and procedures. All rangers who were able to reach Park Headquarters attended the semi-weekly in-service training meetings although some have to travel fifty miles from their stations to do so. The firearms training was continued so that all rangers except those at the isolated stations have now participated. A district ranger has been designated as training officer for the division and detailed outlines are being prepared for continued specific training for both permanent and seasonal personnel. A special training conference for all rangers was held in Mammoth on April 1 at which Chief Ranger Lakous reviewed the Chief Ranger's Conference held in the Director's Office.

Wildlife and Fish Cultural Activities. **ANTELOPE.** By mid-April many of the antelope had migrated up-country as far as Mammoth and the western slopes of Mt. Elbert. On April 21 the first antelope was observed near the Lamar Ranger Station. Although greatest concentrations still occur in the Goose Creek-Gardiner area, small groups are now distributed over the whole northern area as far eastward as the Lamar Valley.

BEARS. Tracks of a large grizzly were seen near Hailroaring Ranger Station on April 8. Occasional tracks of black bears were noted in various areas during the month and one black bear was seen along the roadside between Mammoth and Norris.

BIGHORN. Bighorn moved upward toward their summer range throughout the period and small groups were commonly seen along the Northeast Entrance road between Mammoth and Tower Junction. Five additional bighorn were counted in the Tower Falls district, making the total count of all areas 140. (Mammoth, 67; Tower Falls, 48; Lamar, 25).

BUFFALO. Total known winter loss among the buffalo of the Lamar area is seven. In addition, two 1947 calves have been found dead, one from injury during birth and the other cause unknown.

While many of the animals are still in poor condition as the result of a difficult winter and shortage of forage, they showed some improvement with the warmer days of April and opening up of additional range.

A few calves were born during early April, and at close of the period calves were numerous in all cow herds. Most of the cows, as heretofore, have congregated in the area between the confluence of the Yellowstone and Lamar rivers (the Horseshoe) for calving.

Several small herds of buffalo have been seen in the Old Faithful-Fountain Plate area since opening of the road, and these appeared to be in somewhat better condition than those in the Lamar area.

1. The first of these is the fact that the Commission has not yet received any information from the Government of the United States regarding the activities of the Committee for the Liberation of the People of the East (CLPE) in the United States. This is a serious omission, as the Commission is required to report on the activities of all such organizations.

[illegible]

No check has been made of other buffalo herds in the Pelican and Hayden valleys since January.

ELK. Warmer weather of April with resultant melting of snow and opening up of additional forage was a great aid to the elk in both the northern and Gallatin areas where icy winter conditions caused much malnutrition and considerable starvation. Deaths occurred in both areas during the month, and estimates of total winter loss are now being prepared. These losses will be proportionately higher than those of a year ago.

In the northern area there are still a considerable number of elk on the winter range outside the Park, although steady up-country migration has been in progress since the end of March.

A total of 68 elk was counted inside the Park in the Gallatin area on April 7, and on April 15, 173 were seen, indicating the first strong movement in up-country migration. By the end of the period old forage was fairly plentiful on areas from which snow had melted. Comparatively few winter deaths were noted on the Gallatin area within the Park, but it was reported that heavier losses had occurred on outside range areas where the bulk of the herd wintered.

TRUMPETER SWAN. A pair of trumpeter swans was observed on a small pond between Tower Junction and the Lamar River on April 15. They apparently did not remain in this area, however, as they were not again seen.

FISH. The State of Montana began spawn collection operations on the Madison River at the west park boundary on April 2. About 700 rainbow trout were spawned with an egg take of approximately 300,000. Rainbow run has been slow.

Arrangements have been made with the Superintendent of the Snnis Fish Cultural Station for the delivery of some 40,000 large rainbow trout to the waters of the Madison, Firehole and Gibbon rivers before high water in these streams.

Mr. William A. Dunn, Superintendent of the Yellowstone Park Fish Cultural Station, arrived at the Yellowstone Lake Hatchery on April 29, the day the road was plowed of snow, and began 1947 operations.

RANGE OPERATIONS. An average of 102 horses and mules was cared for during the month, and 44.5 tons of hay was fed.

Two unserviceable horses, Earl H. and Pat, were sold to Walter C. Latta of Bozeman and removed from the Park on April 15.

Five colts, four females and one male, were born in April and five others are expected in May. Colts were sired by Black Baron and Gypsy Chief, pure-blood Morgan stallions.

Six mules acquired from Army surplus were saddled and packed, and all appear to be well trained and useful pack animals.

At close of the month 41 tons of hay remained on hand, which it is hoped will be sufficient until new hay is harvested in July.

• 1990年12月1日

1. The first of these is the fact that the majority of the population of the United States is now living in urban areas. This is a result of the process of urbanization, which has been going on since the beginning of the 20th century. The process of urbanization is the movement of people from rural areas to urban areas. This movement is caused by a number of factors, including the search for better living conditions, the desire for education, and the need for employment. The process of urbanization has led to the growth of large cities and the decline of small towns. This has had a significant impact on the economy and society. The majority of the population now lives in urban areas, which are characterized by high population density, a high level of economic activity, and a high level of social organization. This has led to the development of a new type of society, which is based on the city. The city is now the center of economic and social life. The majority of the population now lives in urban areas, which are characterized by high population density, a high level of economic activity, and a high level of social organization. This has led to the development of a new type of society, which is based on the city. The city is now the center of economic and social life.

1. The following information is being provided for your information only. It is not intended to be used for any other purpose.

ALL INFORMATION CONTAINED HEREIN IS UNCLASSIFIED
DATE 08-27-2009 BY 60322 UCBAW/SJS

Forest Fire Protection. The job of packing forest fire hose into peck sacks was finished. These sacks are now ready for dispatch to fires or to outlying fire caches. All crosscut saws at the Mammoth Cache were filed and are now ready for fire use.

The Fire Trucks secured from the War Assets Administration were painted. The facilities to the Transportation Company's Garage were made available to us through Mr. F. E. Kammermeyer. Ladders for equipping these trucks were oiled, varnished and sanded.

The Yellowstone Park Fire Organization Plan for Large Fires was completed. The Superintendent's Report of Forest Fire Fighting Equipment was completed and transmitted to the Region Two Office.

Personnel. On April 7 Harry B. Reynolds, Jr., entered on duty as Park Ranger, CPC-7, under Section 2 of Regulation VIII.

The Yellowstone Park efficiency Rating Committee completed the regular ratings for Yellowstone employees and all employees rated were notified of the ratings received.

Boris T. Vladimiroff entered on duty April 8 as Park Ranger, CPC-7, under Section 2, Regulation VIII.

Wilma S. Haines started on sick leave on April 9 in connection with her resignation due to pregnancy. Her resignation is effective at 5:00 p.m., July 28, 1947. Stanley M. Jackson was promoted to the position of Clerk-Stenographer, CAF-4, vice Wilma S. Haines, resigned.

Authority was received from the Thirteenth Civil Service Region on April 11 to employ all seasonal employees under Section 4 of Regulation VIII.

Besse M. Carr entered on duty as Clerk-Stenographer, CAF-3, Position No. 62, on April 11.

On April 15 Hugh S. Hbert entered on duty as Park Ranger, Rocky Mountain National Park, by transfer from Yellowstone.

Mrs. Flora A. Cameron entered on duty as a seasonal Clerk-Typist, Position No. 401, CAF-3, on April 15.

Alice B. Murphy entered on duty on April 21 as a Clerk-Stenographer, CAF-3, Position No. 396, and was assigned to work in the Chief Ranger's Office under Blister Rust Control.

Mr. Edwin E. Bird, Accounting Clerk, entered on duty at Lake Texoma Recreational Area on April 25 by transfer from Yellowstone Park.

Miscellaneous. On April 1 a Yellowstone Park Parents-Teachers Association was organized by a group of the members of the community vitally interested in the school problems of the Park. Chief Park Naturalist Condon was elected president, Frank Mattson, vice-president, and Mrs. Francis P. Roylance, secretary-treasurer.

The regular monthly meeting of the Federal Employee's Union, Local No. 1465, was held in the Canteen Building on April 7.

Frank Reedy, 74, of Dallas, Texas, died in Dallas on April 10. Mr. Reedy was one of the first persons to conduct organized parties in the Yellowstone Park and gave many lectures in connection with the Park. He started bringing tourists into the Yellowstone some 30 years ago.

The Yellowstone Ski Club conducted a dance in the Mammoth Canteen on April 19.

Final figures for the annual National Red Cross fund drive, conducted in the Park during March, are \$116.50.

Encl.
In quintuple.

Edmund S. Rogers,
Superintendent.
